Space and Incongruence J.V. Buroker, 2013-03-09 Kantian transcendental idealism is the thesis that fundamental aspects of experience are contributed by the perceiving subject rather than by the things experienced and are not features of things as they exist independently of sensible perceivers This is undoubtedly the most striking and at the same time the most puzzling of Kant's Critical views It is striking because nothing could be less commonsensical than the belief that things as we perceive them have nothing in common with things as they are independently of being perceived From a more technical point of view the doctrine is puzzling because Kant apparently does not support it very well Beginning with Kant's contemporaries critics have pointed out that among all the arguments for the theory in the Critique of Pure Reason none entails the conclusion that things in themselves cannot be like objects of sense experience in any way So for example although transcendental idealism is compatible with Kant's theory of synthetic a priori knowledge there is nothing in the analysis of the synthetic a priori ruling out the possibility that features contributed to experience by the perceiving subject correspond to characteristics of things in themselves although we might never know this to be so And even though Kant sees transcendental idealism as a solution to the Antinomies this is at best indirect support for the view there are undoubtedly other ways to get around these traditional metaphysical puzzles *Space and Incongruence* J.V. *The Arguments of Kant's Critique of Pure Reason* Bryan Hall, Mark Black, Matt Sheffield, 2010-12-27 The importance of Immanuel Kant's Critique of Pure Reason in the history of philosophy is matched only by its difficulty In particular readers are often frustrated by how difficult it is to extract Kant's arguments from his dense prose This book reconstructs using the tools of propositional logic the central arguments of the Critique In all the book reconstructs thirty six of Kant's arguments spanning the Transcendental Aesthetic Transcendental Analytic and Transcendental Dialectic For each argument they begin with a quote from Kant's text followed by a synopsis that explains the argument informally Finally each synopsis is followed by a formal reconstruction of the argument The synopses offer examples metaphors historical background and objections responses to aid the reader in appreciating Kant's arguments Even though many readers who approach Kant for the first time have a good philosophical vocabulary few will understand Kant's unique lexicon In addition to formally reconstructing Kant's arguments the book also includes a glossary that defines the technical terms that Kant uses in his arguments Finally since this book is directed largely at students Bryan Hall enlisted two of his own students to ensure that the book is maximally student friendly In contrast to most pedagogical philosophical literature the content of this book has been tailored by students for students

*Kant's Cosmology* Brigitte Falkenburg, 2020-12-18 This book provides a comprehensive account of Kant's development from the 1755-56 metaphysics to the cosmological antinomy of 1781 With the Theory of the Heavens 1755 and the Physical Monadology 1756 the young Kant had presented an ambitious approach to physical cosmology based on an atomistic theory of matter which contributed to the foundations of an all encompassing system of metaphysics Why did he abandon this system in favor of his critical view that cosmology runs into an antinomy according to the Critique of Pure Reason CPR This book answers this question by focusing on Kant's methodology and the internal problems of his 1755-56 theory of nature A decisive role for Kant's critical turn plays the argument from incongruent counterparts 1768 which drew much attention among philosophers of science though not sufficiently in Kant research Furthermore the book analyses the genesis of the cosmological antinomy in the 1770s the logical structure of the antinomy in the CPR its relation to transcendental idealism as explained in the experiment of pure reason

1787 and its role for the teleology of human reason The book is addressed to Kant scholars philosophers of science and students of Kant's philosophy

**The Cambridge Companion to Kant** Paul Guyer, 1992-01-31 The fundamental task of philosophy since the seventeenth century has been to determine whether the essential principles of both knowledge and action can be discovered by human beings unaided by an external agency No one philosopher contributed more to this enterprise than Kant whose Critique of Pure Reason 1781 shook the very foundations of the intellectual world Kant argued that the basic principles of the natural science are imposed on reality by human sensibility and understanding and thus that human beings are also free to impose their own free and rational agency on the world This 1992 volume is the only systematic and comprehensive account of the full range of Kant's writings available and the first major overview of his work to be published in more than a dozen years An internationally recognised team of Kant scholars explore Kant's conceptual revolution in epistemology metaphysics philosophy of science moral and political philosophy aesthetics and the philosophy of religion

**Kant's 'Critique of Pure Reason'** Jill Vance Buroker, 2006-10-06 In this introductory textbook to Kant's Critique of Pure Reason Jill Vance Buroker explains the role of this first Critique in Kant's Critical project and offers a line by line reading of the major arguments in the text She situates Kant's views in relation both to his predecessors and to contemporary debates explaining his Critical philosophy as a response to the failure of rationalism and the challenge of skepticism Paying special attention to Kant's notoriously difficult vocabulary she explains the strengths and weaknesses of his arguments while leaving the final assessment up to the reader Intended to be read alongside the Critique also published by Cambridge University Press as part of The Cambridge Edition of the Works of Immanuel Kant in Translation this guide is accessible to readers with little background in the history of philosophy but should also be a valuable resource for more advanced students

**Kant and the Double Government Methodology** Robert E. Butts, 2012-12-06 This is a book about dreaming and knowing and about thinking that one can ascertain the difference It is a book about the Bernards of the world who would have us believe that there is a humanly uncreated world existing en Boi that freely dis closes its forever fixed ontology even though they too must accept that many of the worlds we make as we try to under stand ourselves are counterfeit It is a book about the real estate of the human mind The book is about Leibniz and Kant and about methods of science It is also about what is now called pseudo science It tries to show how Kant struggled to mark the limits of the humanly knowable and how thi s strug gle involved him in trying to answer questions of importance then and now Some are philosophers questions the epistemo logical status of mathematics the role of space and time in knowing the nature of the conceptual constraints on our ef forts to hypothesize the possible Some are questions of per ennial human interest Can spirits exist How is the soul re lated to the body How can we legitimately talk about God if at all Finally Kant teaches that these are all questions bearing on our entitlements in claiming to know Leibniz fashioned a way of talking about nature and super nature that I call the Double Government Methodology

**Kant and the Demands of Self-Consciousness** Pierre Keller, 1998 In Kant and the Demands of Self Consciousness Pierre Keller examines Kant s theory of self consciousness and argues that it succeeds in explaining how both subjective and objective experience are possible Previous interpretations of Kant s theory have held that he treats all self consciousness as knowledge of objective states of affairs and also that self consciousness can be interpreted as knowledge of personal identity By developing this striking new interpretation Keller is able to argue that transcendental self consciousness underwrites a general theory of objectivity and subjectivity at the same time

**Minimally Invasive Hand Surgery; An Issue of Hand Clinics** Catherine Curtin, 2014-02-28 This issue of Hand Clinics will focus on minimally invasive hand and wrist surgery This surgery refers to the treatment of bone and soft tissue injuries without the need for traditional open surgical incision With the aid of new techniques and computerized machinery even a rather complex surgery can be performed with only a few small incisions This can be done using arthroscopy or other techniques that use alternate methods to visualize the work site This issue will cover all the basics of minimally invasive techniques including an overview paper on the current procedures

**Kant and the Subject of Critique** Avery Goldman, 2012-03-02 Immanuel Kant is strict about the limits of self knowledge our inner sense gives us only appearances never the reality of ourselves Kant may seem to begin his inquiries with an uncritical conception of cognitive limits but in Kant and the Subject of Critique Avery Goldman argues that even for Kant a reflective act must take place before any judgment occurs Building on Kant s metaphysics which uses the soul the world and God as regulative principles Goldman demonstrates how Kant can open doors to reflection analysis language sensibility and understanding By establishing a regulative self Goldman offers a way to bring unity to the subject through Kant s seemingly circular reasoning allowing for critique and ultimately knowledge

**From Kant to Husserl** Charles Parsons, 2012-03-15 In From Kant to Husserl Charles

Parsons examines a wide range of historical opinion on philosophical questions from mathematics to phenomenology Amplifying his early ideas on Kant's philosophy of arithmetic the author then turns to reflections on Frege Brentano and Husserl **The Natural and the Normative** Gary Carl Hatfield,1990 Gary Hatfield examines theories of spatial perception from the seventeenth to the nineteenth century and provides a detailed analysis of the works of Kant and Helmholtz who adopted opposing stances on whether central questions about spatial perception were amenable to natural scientific treatment At stake were the proper understanding of the relationships among sensation perception and experience and the proper methodological framework for investigating the mental activities of judgment understanding and reason issues which remain at the core of philosophical psychology and cognitive science Hatfield presents these important issues as living philosophies of science that shape and are shaped by actual research programs creating a complex and fascinating picture of the entire nineteenth century battle between nativism and empiricism His examination of Helmholtz's work in physiological optics and epistemology is a tour de force Gary Hatfield is Associate Professor of Philosophy at the University of Pennsylvania

Problems from Kant James Van Cleve,2003-09-25 This rigorous examination of Kant's Critique of Pure Reason provides a comprehensive analysis of the major metaphysical and epistemological questions of Kant's most famous work Author James Van Cleve presents clear and detailed discussions of Kant's positions and arguments on these themes as well as critical assessments of Kant's reasoning and conclusions Expansive in its scope Van Cleve's study covers the overall structure of Kant's idealism the existence and nature of synthetic a priori knowledge the epistemology of geometry and the ontological status of space time and matter Other topics explored are the role of synthesis and the categories in making experience and objects of experience possible the concepts of substance and causation issues surrounding Kant's notion of the thing in itself the nature of the thinking self and the arguments of rational theology A concluding chapter discusses the affinities between Kant's idealism and contemporary antirealism in particular the work of Putnam and Dummett Unlike some interpreters Van Cleve takes Kant's professed idealism seriously finding it at work in his solutions to many problems He offers a critique in Kant's own sense a critical examination leading to both negative and positive verdicts While finding little to endorse in some parts of Kant's system that have won contemporary favor for example the deduction of the categories Van Cleve defends other aspects of Kant's thought that are commonly impugned for instance the existence of synthetic a priori truths and things in themselves This vital study makes a significant contribution to the literature while at the same time making Kant's work accessible to serious students The Project of Positivism in International Law Mónica García-Salmones Rovira,2013-11

This book analyses international legal positivists' desire to emulate the success of the empirical methods applied in the biological and physical sciences their wish to work with law with the certainty that natural facts started to provide as the natural sciences method developed PREFACE **The Changing Faces of Space** Maria Teresa Catena,Felice

Masi,2018-01-11 This book focuses on various concepts of space and their historical evolution In particular it examines the

variations that have modified the notions of place orientation distance vacuum limit bound and boundary form and figure continuity and contingency in order to show how spatial characteristics are decisive in a range of contexts in the determination and comprehension of exteriority in individuation and identification in defining the meaning of nature and of the natural sciences in aesthetical formations and representations in determining the relationship between experience behavior and environment and in the construction of mental and social subjectivity Accordingly the book offers a comprehensive review of concepts of space as formulated by Kant Husserl Heidegger Einstein Heisenberg Penrose and Thorne subsequently comparing them to notions developed more recently in the current age which Foucault dubbed the age of space The book is divided into four distinct yet deeply interconnected parts which explore the space of life the space of experience the space of science and the space of the arts

### **Geometry and Chronometry in Philosophical Perspective**

Adolf Grünbaum, 1968 In this volume Professor Grünbaum substantially extends and comments upon his essay Geometry Chronometry and Empiricism which was first published in Volume III of the Minnesota Studies in the Philosophy of Science Commenting on the essay when it first appeared J J C Smart wrote in Mind England In my opinion Adolf Grünbaum's paper supersedes nearly all that has been written on the logical status of physical geometry and chronometry The full text of the essay is given here with the author's extension of it and his discussion of some of the critical comment it has evoked particularly a critique published by Hilary Putnam Adolph Grünbaum is Andrew Mellon Professor of Philosophy at the University of Pittsburgh and the current president of the Philosophy of Science Association

**Home and International Law** Henrietta Zeffert, 2024-03-26 This book is about home and international law More specifically it is about the profound and frequently devastating transformations of home that are happening almost everywhere in the world today and what international law has to do with them Through three stories of home the desert home the lake home and the city home this book traces how the everyday operations of international law shape the material affective and imaginative experience of home It argues that international law's homemaking work is characterised by acts of domination practices of resistance and the production of unhomely spaces However the book also considers whether and how the liberatory potential of international law could be unlocked through the metaphor of home This book draws from fieldwork conducted by the author in Palestine Cambodia and the United Kingdom It takes a global socio legal approach to home and international law informed by feminist political theory feminist geography home studies and contemporary critical approaches to international law It is the first academic work to examine the relationship between home and international law This book's global socio legal approach to home and international law will be of interest to those teaching and studying in international law socio legal studies legal pluralism and legal geography
