Space Apart A:

A Space Apart Meredith Sue Willis, 2005-03 Willis fleshes out with warmth and tenderness the complexities of family love which not only defines commitment but deepens the need. An important new talent. The Kirkus Reviews This is the story of a broken family trying to mend itself through three generations. It is a painful but essential process and like all such repair jobs it is only partly successful. Before it is over we come to know John and Vera and Mary Kay as well as Vera's daughters Lee and Tonie to understand the wars they must declare and the peaces that they are able to proclaim within the state of being Scarlins. The Philadelphia Inquirer Willis views the Scarlin family ties and loyalties limits and tensions with realism sensitivity and precision. A noteworthy first novel. Publisher's Weekly Worlds Apart? A Postcolonial Reading of post-1945 East-Central European Culture Cristina Sandru, 2013-01-16 This study explores the relation of the Eastern European problematic to postcolonial critical practice interrogating the extent to which postcolonialism can help illuminate instances of imperial domination in non Third World contexts. It argues that colonisation is to be understood principally as a condition of ideological domination that has engendered similar forms of literary and cultural resistance consequently it offers a comparative framework which enables a reading in differential contexts of texts that ostensibly have little in common but which on close examination reveal a shared imaginative space rhetoric and narrative agency. The book consists of two interrelated parts. Part one is a critical discussion of the ideologies cultural imaginaries and representational practices articulated in a diverse range of representative postcolonial and post 1945 East Central European texts these are shown to share despite dissimilar conditions of production uncannily related narrative modes and thematic emphases. Part two is a comparative literature case study which discusses two authors whose work is both highly representative of the cultural formations discussed in the first part Milan Kundera and Salman Rushdie and at the same time highly controversial. The chapters dedicated to Kundera's and Rushdie's work examine the cultural geography of their novels particularly in the writers use of memory and story telling to reconfigure history and personal identity in conditions of literal and metaphorical displacement. While their novels thrive on ironic subversion and ambiguity they simultaneously gesture towards a redemptive space of the imagination transcending the constraints of both locality and history. **Official Gazette of the United States Patent Office** United States. Cheating Mia Consalvo, 2009-08-21 A cultural history of digital gameplay that investigates a wide range of player behavior including cheating and its relationship to the game industry. The widely varying experiences of players of digital games challenge the notions that there is only one correct way to play a game. Some players routinely use cheat codes consult strategy guides or buy and sell in game accounts while others consider any or all of these practices off limits. Meanwhile the game industry works to constrain certain readings or activities and promote certain ways of playing. In **Cheating** Mia Consalvo investigates how players choose to play games and what happens when they can't always play the

way they'd like. She explores a broad range of player behavior including cheating alone and in groups, examines the varying ways that players and industry define cheating, describes how the game industry itself has helped systematize cheating, and studies online cheating in context in an online ethnography of Final Fantasy XI. She develops the concept of gaming capital as a key way to understand individuals' interaction with games, information about games, the game industry, and other players. Consalvo provides a cultural history of cheating in videogames, looking at how the packaging and selling of such cheat enablers as cheat books, GameSharks, and mod chips created a cheat industry. She investigates how players themselves define cheating and how their playing choices can be understood, with particular attention to online cheating. Finally, she examines the growth of the peripheral game industries that produce information about games rather than actual games. Digital games are spaces for play and experimentation the way we use and think about digital games, Consalvo argues, is crucially important and reflects ethical choices in gameplay and elsewhere.

The Poetics of Stage Space Bruce A. Bergner, 2013-05-11. This book analyzes theatre scene design through the powers and characteristics of physical space. Physical space is central to creative composition in the theatre, but the author extends the reach of the book to individuals concerned with spatial design: architects, interior designers, industrial designers, artists, and other performers. A theory is presented on how design and its creative process echo the process of human awareness and action. The book covers an array of considerations for the theatre designer: the observable features of given physical spaces, their layout, detailing, and atmosphere, and presents these features from the points of view of various disciplines. There are chapters on the physics of space, the geography of space, and the music of space. The author also speaks to the less tangible qualities sensed more personally, such as the spirituality or the psyche of space. A discussion of the collaborative process of creating space is included. Instructors considering this book for use in a course may request an examination copy here.

The Feeling of Space Christopher Bardt, 2024-12-31. A richly illustrated exploration of humanity's drive to shape life as a spatial project from Plato's time to the digital era. Place is something real, but space is generally conceived as abstract and immaterial. In *The Feeling of Space*, Christopher Bardt explores this damaging modern binary and

traces the contradictory impulses that have dematerialized our sense of space through history fear and wonder a yearning for the infinite and intimate and the need for autonomy and belonging Using rich illustrations and examinations of art technology and philosophy Bardt argues that if we can get back to first feeling space then we can treat space as the substance that gives agency to our intersubjectivity the exchange of conscious and unconscious thoughts we have with others Expertly connecting ideas with clear examples from lived experiences Bardt s revolutionary framework will appeal to a broad readership particularly those who are interested in the theoretical and philosophical aspects of spaces In an age where digital media has dissolved instead of increased our sense of connection The Feeling of Space shows that when we learn to experience space as a medium as real as a place we not only see ourselves as inherently spatialized beings but we can also rebuild the bonds that tie us together
