Capital and the Cosmos Peter Dickens, 2023-01-01. This book offers a new understanding of society's relations with the cosmos. Entrepreneurs such as Jeff Bezos and Elon Musk receive a great deal of publicity but offer unlikely and implausible visions of space tourism for the general public. Meanwhile, asteroids are seen as rare materials which will be extracted and used to produce untold riches for earthbound citizens. The reality is rather different. First, there is no evidence that owners of capital are attempting to extract rare materials in the cosmos. The costs would be out of this world. But capital, not governments, is determining how outer space should be used. Capital's investments in aerospace companies are actively determining forms of military interventions and the equipment used. And satellite television pumps out forms of culture aimed at a global audience. But these are being ignored and subverted by, for example, indigenous peoples. In short, this book sets out

a new understanding of our relations with the cosmos The forces of capital are certainly powerful but at the same time they are being challenged subverted and even overturned

The Films of Clint Eastwood Matt Wanat, Leonard Engel, 2018-05-15 The indefatigable Clint Eastwood the great old man of American film is still controversial after all these years Many of the critical essays in this collection focus on Eastwood's 2014 American Sniper a particularly controversial film and a devastating personal account of the horrors of war Additional essays within the collection address his films that deserve more recognition than they have received to date The chapters vary by topic and identify themes ranging from aging race and gender to uses of Western conventions and myth to the subtleties of quieter themes and stylistic choices in Eastwood's body of cinematic work As a collection these essays show that none of these themes account for Eastwood's entire vision which is multifaceted and often contradictory dramatizing complex issues in powerful character driven narratives

The Rhetoric of Project Apollo Kathy K. Previs, 2024-12-15 On July 20 1969 Americans not only landed on the Moon but the televised spectacle forever changed the ways in which news and commentary about historical events would be presented to audiences In The Rhetoric of Project Apollo Kathy Previs provides a comprehensive analysis of the rhetorical strategies that CBS News employed in covering the Apollo missions from 1968 1972 and documents the role that NASA's public relations office had in televising the exciting moonshots She illustrates how CBS's and NASA's symbolic representations followed a ritual view of communication enabling viewers to make sense of complex technological feats and scientific discoveries while garnering public support for the costly missions Based on four rhetorical categories nationalism romanticism pragmatism and technology Previs also provides an in depth analysis of which narratives have withstood the test of time in how Apollo is remembered on CBS News and across a variety of televised platforms including CNN the History Channel and PBS from 1973 2022 marking the 50th anniversary of Apollo's last mission From Cold War metaphors to now recognizing the role women had in Apollo's successes its story continues to resonate with and inspire audiences around the world
