Multi-objective Design Space Exploration of Multiprocessor SoC Architectures Cristina Silvano, William Fornaciari, Eugenio Villar, 2011-08-23 This book serves as a reference for researchers and designers in Embedded Systems who need to explore design alternatives It provides a design space exploration methodology for the analysis of system characteristics and the selection of the most appropriate architectural solution to satisfy requirements in terms of performance power consumption number of required resources etc Coverage focuses on the design of complex multimedia applications where the choice of the optimal design alternative in terms of application architecture pair is too complex to be pursued through a full search comparison especially because of the multi objective nature of the designer's goal the simulation time required and the number of parameters of the multi core architecture to be optimized concurrently

Stepping-Stones to the Future of Space Exploration National Research Council, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, 2004-05-27 NASA's Human Exploration and Development of Space HEDS program within the Office of Space Flight has proposed a new framework for space technology and systems development Advanced Systems Technology Research and Analysis ASTRA for future space flight capabilities To assist in the development of this framework NASA asked the National Research Council to convene a series of workshops on technology policy issues concerning the relationship of the various stakeholders in advancing human and robotic exploration and development of space The first workshop which is the topic of this report focused on policy issues about the development and demonstration of space technologies Four policy topics selected by the project steering committee as the foci of this first workshop are discussed in the report the rationale for human and robotic space exploration technology as a driver for capability transformation risk mitigation and perception and international cooperation and competition **Human Health and Performance Risks of Space Exploration Missions** Jancy C.
