Space Policy In The Twenty First Century:

Space Policy in the Twenty-First Century W. Henry Lambright, 2003 Though more than forty years old the space age has just begun and questions about its future abound What will replace the Space Shuttle Will the International Space Station justify its 100 billion potential cost Are asteroids real threats to Earth or just the subject of science fiction movies Will humans land on Mars Will the search for extraterrestrial life be rewarded In *Space Policy in the Twenty First Century* W Henry Lambright brings together ten top ranking observers of United States space exploration to address these and other issues relating to the future of the space program While the U S no longer competes with the Soviets for technological firsts they argue ideology and national image remain at the core of space policy with other factors playing subordinate roles Reminding readers of the historical highlights the authors pose searching questions about the priorities and applications of space science manned vs unmanned flights and commercial access to the space enterprise Contributors include Christopher F Chyba SETI Institute and Stanford University Ronald J Deibert University of Toronto Daniel H Deudney the Johns Hopkins University W Henry Lambright Syracuse University Roger D Launius NASA Karl A Leib Syracuse University John M Logsdon George Washington University Howard E McCurdy American University Scott N Pace White House Office of Science and Technology Policy and Debora L VanNijnatten Wilfrid Laurier University

Space Policy for the Twenty-First Century Wendy N. Whitman Cobb, Derrick V. Frazier, 2024-04-30 National Security Space Institute 2025 Space Professional Reading List A foundational accessible overview of space policy in the United States This book provides readers with the first comprehensive overview of major space policies in the United States and a framework through which to analyze them It examines all facets of space policy civilian military and commercial and presents this material accessibly for use by readers at multiple levels from undergraduate courses to government practitioners making and implementing policy The first section offers a history of space exploration focusing on the US within a global context The second section looks at the actors and institutions involved in setting space policy in a government based on the separation of powers including the president Congress NASA and the Department of Defense The book concludes with chapters on the different sectors of space policy as well as questions this field will face in the future As policymakers and business leaders become increasingly aware of the everyday systems that depend on space technologies such as communications mapping and weather monitoring and as space becomes a more visible arena for commercial competition potential humanitarian gain and military threats *Space Policy for the Twenty First Century* helps students and professionals navigate the complexity of space as a policy area

Space Strategy in the 21st Century Eligar Sadeh, 2013-02-11 This book offers an overview of space strategy in the 21st century The purpose of space strategy is to coordinate integrate and prioritize space activities across security commercial and civil sectors Without strategy space activities continue to provide value but it becomes difficult to identify and execute long term programs and projects and to optimize the use of space for security economic civil and environmental ends Strategy is

essential for all these ends since dependence on and use of space is accelerating globally and space is integrated in the fabric of activities across all sectors and uses This volume identifies a number of areas of concern pertinent to the development of national space strategy including intellectual foundations political challenges international cooperation and space governance space assurance and political organizational and management aspects specific to security space strategy The contributing authors expand their focus beyond that of the United States and explore and analyse the international developments and implications of national space strategies of Russia China Europe Japan India Israel and Brazil This book will be of much interest to students of space power and politics strategic studies foreign policy and International Relations in general

Space in the 21st Century Richard S. Lewis, 2010-06-01 James A Michener **NASA SP-7500** United States. National Aeronautics and Space Administration, **Management**, 1990 Global Nationalism: Ideas, Movements And Dynamics In The Twenty-first Century Pablo De Orellana, Nicholas Michelsen, 2022-10-04 The twenty first

century is witnessing a truly transnational revival of a very old set of ideas. Despite romantic attachments to old symbols, these late modern nationalism movements are not simply replicas of the previous two waves of nationalism in the 1860s and 1920s. Nor is it true that today's nationalism movements want simply to return to the past and effect a nationalist 1930s style retrenchment. From Putin's macho revivalism through to Trump's shocking victory and Xi's strongman regionalism, nationalists engage with the economic context of our time and address issues born of globalization. Crucially in their vision for international relations, they seek the destruction of key international norms in a drive to restore a vision of sovereignty predicated on a survivalist understanding of state power. **Global Nationalism**, edited and framed by Pablo de Orellana and Nicholas Michelsen, brings together the latest research by up and coming early career researchers and scholars. Beginning with a succinct history and typology of contemporary nationalism and its predecessors, this book offers analysis of several cases of contemporary nationalism, examining how specific movements define identity, address grievances, and propose identity based solutions. Key themes and lessons emerge from the study of a variety of cases, from the very ideas animating nationalist thought to their expression in a wide variety of nationalist movements around the world. The reflections on the ecosystem of nationalist ideas and movements offered in this volume are a vital starting point in the study of contemporary nationalism as a global twenty first century phenomenon.

Space Studies Board Annual Report 2017 National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, 2018-12-19. The original charter of the Space Science Board was established in June 1958, three months before the National Aeronautics and Space Administration (NASA) opened its doors. The Space Science Board and its successor, the Space Studies Board (SSB), have provided expert, external and independent scientific and programmatic advice to NASA on a continuous basis from NASA's inception until the present. The SSB has also provided such advice to other executive branch agencies including the National Oceanic and Atmospheric Administration (NOAA), the National Science Foundation (NSF), the U.S. Geological Survey (USGS), the Department of Defense, as well as to Congress. **Space Studies Board Annual Report 2017** covers a message from the chair of the SSB, David N. Spergel. This report also explains the origins of the Space Science Board, how the Space Studies Board functions today, the SSB's collaboration with other National Academies of Sciences, Engineering, and Medicine units, assures the quality of the SSB reports, acknowledges the audience and sponsors, and expresses the necessity to enhance the outreach and improve dissemination of SSB reports. This report will be relevant to a full range of government audiences in civilian space research, including NASA, NSF, NOAA, USGS, and the Department of Energy, as well as members of the SSB policy makers and researchers.
