30-Second Space Travel Charles Liu, Karen Masters, Allen Liu, 2021-06-29 As Space X works to reduce the barriers of access to space and Virgin Galactic forges a path to commercial spaceflight for the masses, we have begun to cross the realms of science fiction into the reality of humans viewing the cosmos with their own eyes. Part of an internationally bestselling series, 30 Second Space Travel sees a team of expert astronomers hand-pick the 50 most exciting topics and essential concepts in the field of space exploration and break down each subject into an easily accessible summary that takes just half a minute to understand. Beginning with Galileo and the early telescope explorers of the Renaissance, via the physics of orbital mechanics and the Apollo and Sputnik missions of the Space Race, and on to a future of space tourism and planetary colonisation, this book will open up a whole universe of space travel and leave you eager to research the field in more depth.

[Space Exploration and Humanity](#) American Astronautical Society, 2010-08-23 A complete history of human endeavors in space, this book also moves beyond the traditional topics of human spaceflight, space technology, and space science to include political, social, cultural, and economic issues, and also commercial, civilian, and military applications. In two expertly written volumes, *Space Exploration and Humanity: A Historical Encyclopedia* covers all aspects of space flight in all participating nations, ranging from the Cold War era beginnings of the space race to the lunar landings and the Apollo Soyuz mission, from the Shuttle disasters and the Hubble telescope to Galileo, the Mars Rover, and the International Space Station. The book moves beyond the traditional topics of human spaceflight, space technology, and space science to include political, social, cultural, and economic issues, and also commercial, civilian, and military applications. Produced in conjunction with the History Committee of the American Astronautical Society, this work divides its coverage into six sections, each beginning with an overview essay followed by an alphabetically organized series of entries on topics such as astrophysics and planetary science, civilian and commercial space applications, human spaceflight, and microgravity science, space and society, and space technology and engineering. Whether investigating a specific issue or event or tracing an overarching historic trend, students and general readers will find this an invaluable resource for launching their study of one of humanity's most extraordinary endeavors.
