Internalism and the Limits of Twin Earth Scenarios Jan Almäng, 2025-04-01 Internalism and the Limits of Twin Earth Scenarios A Study of Phenomenal Intentionalism explores visual perceptual experiences and whether or not visual intentional content is internal or external Coming from the standpoint of phenomenal intentionalism this book assumes that phenomenal consciousness is internal to the subject of a perceptual experience Jan Almäng argues that the structure of the phenomenal character of visual experiences sets certain limits with respect to whether Twin Earth thought experiments can be successful suggesting that while Twin Earth thought experiments are successful for entities such as colours they fail with respect to more complex geometrical structures Because visual perceptual experiences represent in an analogue manner this prevents certain kinds of Twin Earth scenarios from being successful Almäng then argues that some phenomenal intentional content is internal If visual experiences have a perspectival structure that this by necessity means that they are intentional

Destination Moon Richard Maurer, 2024-06-04 The history of NASA's Apollo program from Earth orbital missions to lunar landings in a propulsive nonfiction narrative Only now it is becoming

clear how exceptional and unrepeatable Apollo was At its height it employed almost half a million people many working seven days a week and each determined that it will not fail because of me Beginning with fighter pilots in World War II Maurer traces the origins of the Apollo program to a few exceptional soldiers a Nazi engineer and a young eager man who would become president Packed with adventure new stories about familiar people and undeniable danger Destination Moon takes an unflinching look at a tumultuous time in American history told expertly by nonfiction author Richard Maurer *Latinx Comics Studies* Fernanda Díaz-Basteris, Maite Urcaregui, 2025-04-15 *Latinx Comics Studies Critical and Creative Crossings* offers an intersectional and interdisciplinary approach to analyzing Latinx studies and comics studies The book draws together groundbreaking critical essays practical pedagogical reflections and original and republished short comics The works in this collection discuss the construction of national identity and memory undocumented narratives Indigenous and Afro Latinx experiences multiracial and multilingual identities transnational and diasporic connections natural disasters and unnatural colonial violence feminist and queer interventions Latinx futurities and more Together the critical and creative works in this collection begin to map out the emerging and evolving field of Latinx comics studies and to envision what might be possible in and through Latinx comics This collection moves beyond simply cataloguing and celebrating Latinx representation within comics It examines how comics by for and about Latinx peoples creatively and conceptually experiment with the very boundaries of Latinx and portray the diverse lived experiences therein Science Digest, 1973

Encyclopedia of Television Series, Pilots and Specials Vincent Terrace, 1985 **The Capitol**, 1970 **StarDate, Guide to the Solar System**, 1997 *The Impact of Lunar Dust on Human Exploration* Joel S. Levine, 2021-01-12 When the Apollo 11 astronauts landed on the Moon on July 20 1969 they made a very important discovery During their landing on the surface of the Moon the exhaust gases released from the Lunar Module landing rockets caused large amounts of surface dust to move into the thin lunar atmosphere causing obscuration of the lunar surface Once they landed they found that the surface of the Moon was covered with several inches of very fine tiny particles composed of sharp glassy material The lunar dust stuck to everything it came in contact with and once on the lunar surface the dust eroded their spacesuits caused overheating on equipment and instrumentation compromised seals on their spacesuits and on lunar sample collecting boxes irritated their eyes and lungs and generally coated everything very efficiently On the return to Earth in the Apollo Command Module lunar dust inadvertently brought aboard floated freely in their cabin causing problems Now 50 years later humans will return to the Moon in the Artemis Program as early as 2024 This book summarizes what we know about lunar dust its structure and chemical composition its impact on human health and how to reduce mitigate its effects on future human exploration The four dozen contributors to the 14 chapters in the book are planetary scientists engineers mission planners medical researchers and physicians from NASA and the European Space Agency ESA as well as universities and industry from the United States Australia Germany Italy the Netherlands Portugal and Sweden The Twin Sister Planets Venus and

Earth Robert J. Malcuit,2014-11-25 This book explains how it came to be that Venus and Earth while very similar in chemical composition zonation size and heliocentric distance from the Sun are very different in surface environmental conditions It is argued here that these differences can be accounted for by planetoid capture processes and the subsequent evolution of the planet satellite system Venus captured a one half moon mass planetoid early in its history in the retrograde direction and underwent its fatal attraction scenario with its satellite Adonis Earth on the other hand captured a moon mass planetoid Luna early in its history in prograde orbit and underwent a benign estrangement scenario with its captured satellite
