Kinetic Military Action and Next Generation Debt: Waveform Politics Vol. 10 Gary Clifford Gibson, 2012-04-19 Waveform Politics Ten is the final volume of contemporary history essays on empirical and philosophical topics from an ordinary American citizen's point of view. The wave forms in the title refer to the broadcast media's ubiquitous adverse conditioning of U.S. mass political thought. Volume One, named *Fade Into History*, started with essays written in 1999 and later with subsequent volumes viewing a panoramic presentation of concerns from the 9/11 attacks to major sociological restructuring of American moral concerns. From two foreign military engagements lasting most of the first decade of the third millennium to restructuring of the U.S. and Global economy, the Waveform Politics series collects the experience of contemporary U.S. history interactively rather than retroactively.

Ritual Journeys in South Asia Christoph Bergmann, Jürgen Schaflechner, 2019-08-09 This book focuses on the ritualized forms of mobility that constitute phenomena of pilgrimage in South Asia and establishes a new analytical framework for the study of ritual journeys. The book advances the conceptual scope of classical Pilgrimage Studies and provides empirical depth through individual case studies. A key concern is the strategies of ritualization through which actors create, assemble, and re-articulate certain modes of displacement to differentiate themselves from everyday forms of locomotion. Ritual journeys are understood as being both productive of and produced by South Asia's socio-economically uneven, politically charged, and culturally variegated landscapes. From various disciplinary angles, each chapter explores how spaces and movements in space are continually created, contested, and transformed through ritual journeys. By focusing on this co-production of space and mobility, the book

delivers a conceptually driven and empirically grounded engagement with the diverse and changing traditions of ritual journeying in South Asia Interdisciplinary in its approach the book is a must have reference work for academics interested in South Asian Studies Religious Studies Anthropology and Human Geography with a focus on pilgrimage and the socio spatial ideas and practices of ritualized movements in South Asia *Underground Space - The 4th Dimension of Metropolises, Three Volume Set +CD-ROM* Jirí Barták,Ivan Hrdina,Georgij Romancov,Jaromír Zlámal,2007-05-11 The so called fourth dimension of a metropolis is the underground space beneath a city which typically includes structures such as tunnels which facilitate transport and provide gas water and other supplies Underground space may also be utilised for living working and recreational facilities and industrial storage These volumes focus on underground space **Pioneers Of Space A Trip to The Moon, Mars, and Venus** George Adamski,2023-09-03 Were His Astounding Claims Fact Or Fiction Did He Really Ride In A Space Ship To The Moon And Beyond Or was It All Merely A Rewrite Of A Work of Science Fiction Published Some Years Before in the late 1940s Polish born George Adamski shocked the American public in the early 1950s claiming to have hard evidence that a number of planets in our solar system harbored life and that the occupants of these worlds were very human in appearance and have been visiting us at least since Biblical times His claims he said were based upon a firsthand encounter with an extraterrestrial in the California desert circa 1953 Adamski s book about this encounter *Flying Saucers Have Landed* became an international best seller Over the years Adamski claims to have held meetings with notables such as the Pope and the Queen of the Netherlands discussing with them his supposed flights into space long before the first Russian cosmonaut He also provided a set of flying saucer photos taken at his home only a few scant miles away from the base of the world famous Mount Palomar Observatory The public seemed to be impressed So much so that Adamski s legion of followers increased in size over the years Of course there were those who thought the stories were fantasies and the pictures crude hoaxes These detractors went so far as to point out that his first book closely resembled a science fiction novel written by Adamski and published in the late 1940 Copies of this initial work *PIONEERS OF SPACE A TRIP TO THE MOON MARS AND VENUS* have been almost impossible to obtain so that researchers could check the similarities for themselves A few copies recently turned up on the internet where they were being offered for over 700 00 Amazon *A Handbook of Transport Economics* André de Palma,Robin Lindsey,Emile Quinet,Roger Vickerman,2011-01-01 This Handbook is a stellar compilation of up to date knowledge about the important topics in transport economics Authors include the very best in the field and they cover the most important topics for today s research and policy applications Individual chapters contain sound readable well referenced explanations of each topic s history and current status I cannot think of a better place to start for anyone wanting to become current in the field or in any of its parts Kenneth Small University of California Irvine US Bringing together insights and perspectives from close to 70 of the world s leading experts in the field this timely Handbook provides an up to date guide to the most recent and state of the art advances in transport economics The comprehensive coverage includes
