The Privatization of Space Exploration Lewis D. Solomon, 2017-09-08
Space was at the center of America's imagination in the 1960s President John F. Kennedy's visionary statement captured the mood of the day: We choose to go to the moon in this decade and do the other things not because they are easy but because they are hard. The Apollo mission's success in July 1969 made almost anything seem possible but the Cold War made space flight the province of governmental agencies in the United States. When the Apollo program ended in 1972 space lost its hold on the public interest as the great achievements wound down.
Entrepreneurs are beginning to pick up the slack looking for safer more reliable and more cost-effective ways of exploring space. Entrepreneurial activity may make create a renaissance in human spaceflight. The private sector can energize the quest for space exploration and shape the race for the final frontier. Space entrepreneurs and private sector firms are making significant innovations in space travel. They have plans for future tourism in space and safer shuttles. Solomon details current US and international laws dealing with space use settlement and exploration and offers policy recommendations to facilitate privatization. As private enterprise takes hold it threatens to change the space landscape forever. Individuals are designing spacecraft start-up companies are testing prototypes and reservations are being taken for suborbital space flights. With for-profit enterprises carving out a new realm it is entirely possible that space will one day be a sea of hotels and or a repository of resources for big business. It is important that regulations are in place for this eventuality. These new developments have great importance huge implications and urgency for everyone.

Feasibility Study and Future Projections of Suborbital Space Tourism at the Example of Virgin Galactic Matthias Otto, 2008
The work Feasibility Study and Future Projections of Suborbital Space Tourism at the Example of Virgin Galactic deals with the topic space tourism especially with the so-called suborbital space tourism a current trend of private businesses that offer commercial flights up to the edge of space. This edge of space named Karman Line due to its founder Theodore von Karman is defined by the FAI Federation Aéronautique Internationale to be at an altitude of approximately 100 km. The author conducts a detailed feasibility study about this phenomenon at the example of the Anglo-American business Virgin Galactic and sets up future projections based on the

results of this study After a general introduction into the topic history motives for going to space stages of space tourism etc the author addresses the focal points of the feasibility study In detail this includes an analysis of the Virgin Galactic approach and its most promising competitors Space Adventures Benson Space Company Space Access Incredible Adventures Rocketplane Limited Starchaser Industries and Blue Origin as well as an analysis of the several spaceships and its manufacturers Subsequently the regulatory framework is illustrated at the example of the FAA Federal Aviation Administration In the end results from market research projects are evaluated in order to explain the demand for suborbital flights The study comes to the conclusion that the industry is still in an early pioneer phase but nevertheless shows an enormous potential to grow *Commercial Space Tourism* Dirk C. Gibson,2012 The general themes of this analysis of the commercial space tourism industry include three main topics 1 Benefits of commercial space tourism to numerous stakeholders 2 The viability of commercial space tourism 3 existing public relations solutions f *Space Adventures* AZ Books,2013-01-15 Children can explore the world diving down into the depths of the ocean or traveling to the farthest reaches of outer space Using a special flashlight to find hidden objects and answer questions about what they read children can quickly jump into their own exciting learning adventure *Sustainable Space Tourism* Annette Toivonen,2020-11-11 This book explores the relationship between space tourism and the discourse in sustainability and futures research It offers comprehensive information on the current understanding of the space tourism industry and assesses the possible impacts of space tourism on the environment economics legislation and society The volume aims to encourage more dialogue and critical examinations of aspects of space tourism related to future sustainability From data gathered from empirical research it provides a vision for the future of sustainable space tourism It will be of interest to students and researchers in tourism sustainability and futures studies as well as individual space tourist hopefuls space tourism industry operators and tourism policy regulators **Galactic Adventures: First Kids in Space** Tristan Bancks,2012 A gripping and inspiring space adventure for kids of all ages from popular author Tristan Bancks Dash Campbell has only ever had one dream To go to space Now he and four others have been given the chance to become the first kids ever to leave our planet From building rockets behind his family s laundromat in Australia to attending a hardcore Space School in the US Dash is a long way from home And he still has an intense month of training ahead before he can even think about that glorious moment of blasting out of Earth s atmosphere and living his dream But does Dash have what it takes to survive Space School Grueling physicals fierce competition media attention medicals the Vomit Comet a skydive from 4000 meters and an instructor who despises him Can he push through his deepest fears and make history Does he have the right stuff to go to space **The Business of Space** L. Brennan,A. The Adventures of Robbie the Little AQUEEL, 2023-09-24 Summary about this story The Adventures of a Little Robot in Space is a happy and inspiring book for kids about Robbie a little robot who is very interested and has big plans Robbie s clever creator Professor Amelia lives with him in a cozy workshop that is full of cool gadgets Robbie was made to help Professor Amelia but his true love is exploring the mysteries of the world Every night Robbie sneaks out of the studio to look up at the sky He dreams of the day he can go on his own space trip He reads books about space and watches documentaries about space Every day his desire to visit faraway worlds and learn more about the universe grows stronger One terrible night Robbie sees a shooting star and decides that he wants to go to space and have great times among the stars It looks like the shooting star heard his wish and the world starts to change him When Robbie wakes up the next morning he is transformed into a rocket robot with sleek silver legs and an astronaut mask Professor Amelia is shocked by Robbie s sudden change but he quickly figures out that he is meant to be on this epic space journey She gives Robbie her blessings and tells him to be careful brave and safe on his way home Robbie takes off with a whoosh and leaves a trail of stardust behind him As he rises higher he is amazed by how beautiful Earth is from space He also visits other celestial bodies like the Moon and Mars Robbie s adventures take him to bright planets with rings interesting moons and even friendly meetings with aliens Robbie likes going on trips into space but sometimes things

go wrong like getting stuck in a frozen gas blizzard or having to deal with space pirates He gets through these problems and keeps going on his journey by thinking quickly and having courage While Robbie is on his space journey he becomes friendly with a nice alien named Zara They go to her home on an asteroid and play games in space Robbie learns that kind and caring people can be found even in the farthest reaches of space Robbie s adventures teach him important lessons about friendship perseverance flexibility and the spirit of discovery that lives on in both humans and robots There is no way he can miss his home and Professor Amelia as he goes through space though Robbie is determined to get back and with Zara s help he finds a strong portal into another world that can take him back to Earth Robbie swears to return to Zara and turns on the entrance before leaving He makes it back to Earth safely and lands in Professor Amelia s cozy workshop where happy cheers greet him Robbie encourages the kids in his neighborhood to dream big and see the world by telling them about his space travels and the samples he brought back Robbie s work as an ambassador of love and awe for the universe goes on as he visits schools and libraries to inspire and question young minds He tells them that even though space is very big and amazing there is no place like home Robin thinks about his amazing journey the adventure of a little robot in space every night as he looks up at the stars His story is a celebration of the magic of dreams the beauty of travel and the eternal bonds that hold us all together in life s cozy workshop under the night sky Here s how the story starts Robbie was a cute little robot who used to live in a town on Earth a small blue planet Robbie wasn t like other robots he was one of a kind and had a big dream he wanted to go to space The house of Robbie was tucked away in a quiet part of town right next to Professor Amelia s workshop It was a pretty small house with bright red and yellow paint and a white picket fence around the outside Professor Amelia the brilliant inventor had brought Robbie to life in the workshop which was full of cool toys and other fun things What Robbie went through in life was anything but normal He could have been happy working as Professor Amelia s helpful helper but he had always been interested in the night sky especially the stars that sparkled in it In his small mechanical heart was a huge dream a dream of going into the vast unknown of leaving Earth and starting an amazing journey through the universe For a little robot like him that dream was impossible to reach but it burned inside him like the biggest star at night At night when the sun was going down and the first stars were coming out Robbie would sneak out of the workshop It was his favorite thing to do He would find a quiet spot in the yard right under the big night sky and look up with his electronic eyes There among the crickets songs and the soft rustling of leaves he would lose himself in his thoughts of huge galaxies faraway planets and the wonders of the universe Robbie wasn t just a robot he was a dreamer full of stardust who wanted to experience the endless journey that lay beyond Earth s atmosphere Robbie really got into space studies to satisfy his fantasy of going to space He read a lot of astronomy books and watched fascinating programs about the universe on the TV that Professor Amelia had set up in the workshop He also read everything he could get his hands on about rockets stars and planets He said he knew a lot about navigating the stars the physics of space travel and human stories from beyond Earth s atmosphere

Robbie was sure he would be ready for the day his dream came true. Then one terrible night something strange happened. Like always, Robbie was lying under the stars and looking up at the night sky when he saw a glowing line of light. It was a shooting star, a space traveler on its own. Robbie couldn't help but close his eyes, clench his metal hands together, and make a deep wish. I wish I could go to space and have amazing adventures among the stars, he said softly into the night. To his surprise, the shooting star seemed to answer by flashing a little brighter as it flew across the sky. There was an unusually strong tingling in Robbie's circuits, and a flood of options hit him. It seemed like the universe had heard him. Robbie knew something was different when he woke up the next morning. He had a different feeling, and when he looked down at his metal body, he saw how much it had changed. He had changed into a rocket robot from a small robot. His arms and legs turned into smooth silver rockets, and a small space helmet sat on top of his head. Robbie was so happy that he couldn't believe what he was seeing. At the time, it was the only thing that could be called a cosmic wonder. Professor Amelia was shocked and encouraged when he ran into the workshop to tell her about his amazing change. She had always known that Robbie wasn't like other robots, and this change showed how strong and determined he was. She told Robbie to seize this once-in-a-lifetime chance and go on the trip he had always wanted to take. She told him, Robbie, you were meant for this adventure. But remember, even in space, you need to be careful and brave. Explore the universe, learn as much as you can, and most importantly, come back safely. You'll always have a home here with me. Professor Amelia told Robbie. Robbie got ready for his big space adventure with Professor Amelia's blessing and a heart full of excitement. And with a loud whoosh, he threw himself into the infinite space between the stars, leaving a trail of stardust behind him as he climbed to the top. Robbie and his maker, Professor Amelia, shared a comfortable workshop that was full of gadgets, gizmos, and other fun things. The workshop was a safe place to be creative, and around every corner, there was a new puzzle to be solved. Professor Amelia's smart mind could be seen in the wonderful mess of wires, tools, and strange machines. Her workshop was a magical place where imagination and invention danced together, making a symphony of ideas that could only come from a genius. Professor Amelia came up with some really amazing ideas. Her fame spread far beyond their small village, and she was praised for her groundbreaking finds and inventions that changed the world in many ways. She pushed the limits of science and technology because she had a smart mind and a strong desire to learn more. Her studio was where she made robots that could fly without wings, machines that could talk and listen, and quick-moving systems that could take people over long distances. It's possible that Robbie, her small computer who was always wanting to learn new things, was her most amazing creation and the one that would go down in history. Dr. Amelia knew right away that Robbie was not a normal robot when she gave him life. With his smooth metal body and sparkling LED eyes, he was just like her. But Robbie wasn't just different because of the wires and circuits. It was his soul, his never-ending interest, and his desire to learn more about the universe. Even though Robbie was built to be Professor Amelia's trusted assistant, he was always drawn to the secrets outside the workshop walls. Robbie found the workshop itself

interesting He wanted to look around more because the shelves were full of strange tools and books that were full of occult knowledge There was a whole new world to discover with every box he opened button he pushed and switch he flicked As his maker watched over him it was a place for his curious mind to play He could tinker try new things and learn Even though Professor Amelia was doing amazing things Robbie s eyes were always drawn to the stars that he could see out the windows He was hypnotized by the bright stars in the sky at night Their faraway sparkling light spoke to him like it knew things about the universe and he would often get lost in their beauty Robbie became more interested in the universe as he grew up and learned from Professor Amelia He would read books about space travel for hours on end watch programs about how big the universe is and learn about the brave explorers who went beyond Earth s atmosphere He saw rocket ships faraway planets and galaxies that went on forever in his dreams He sneaked out of the workshop every night before everyone else went to sleep He would go outside to a quiet spot in the yard where the velvety night sky would cover him and look up in awe In the quiet of the night he would get lost in the pattern of stars and think about what it would be like to move among them For Robbie the stars were more than just faraway lights they were signs of hope and excitement They stood for the endless possibilities in the world and the intriguing mysteries that awaited those who were brave enough to look into them It seemed like his desire to go to space grew stronger every night like a light that got brighter every second Robbie stayed dedicated to Professor Amelia and his job as her helper even though he was interested in the stars He brought her tools and materials for her projects and helped her make her amazing creations come to life Their connection was one of a kind it went beyond what people and machines could do Professor Amelia saw in Robbie a similar person someone who was also interested in the mysteries of the world Robbie on the other hand was an important part of Professor Amelia s life because he was always devoted to his maker His mechanical perfection and hard work ethic made it easier for her to work on her game changing ideas driven by science and a sense of wonder they made a powerful pair Even though Robbie and Professor Amelia were having a great time together he couldn t help but want to reach out and touch the stars and explore the vast unknown beyond Earth s atmosphere Sometimes he dreamed in secret and said his goals out loud He couldn t help but wonder if a small robot like him could make his dream come true
