Space Dogs Pioneers Of Space Travel:

Space Dogs Chris Dubbs, 2003 Back when scientists knew nothing about space travel back when rockets were new a group of Russian cosmonauts rode rockets to the edge of space and into earth orbit These pioneer space travelers were dogs space dogs of the Soviet space program For 15 years space dogs occupied the world stage blazing trails as the first astronauts Their flights taught scientists how living beings reacted to rocket travel and tested the equipment that would be used for human space flight The age of the space dog extended from the first launch in 1951 until the final record breaking dog flight in 1966 Some dogs won world wide fame Most of them however worked and died in obscurity They were all pioneers of space travel And no one has ever told their story Until now Space Dogs dramatizes the training of the dogs the harrowing early flights the tragic accidents the fame that came to the program after the launch of Laika in Sputnik 2 and the final flights leading up to the first manned flight Space Dogs includes never before published photos from the archives of Novosti the Russian News Agency

Space Dogs Chris Dubbs, 2003-03-01 NULL [Laika](#) Nick Abadzis, 2007-09-04 Laika was the abandoned puppy destined to become Earth's first space traveler This is her journey Nick Abadzis masterfully blends fiction and fact in the intertwined stories of three compelling lives Along with Laika there is Korolev once a political prisoner now a driven engineer at the top of the Soviet space program and Yelena the lab technician responsible for Laika's health and life This intense triangle is rendered with the pitch perfect emotionality of classics like *Because of Winn-Dixie* and *Shiloh* and *Old Yeller* Abadzis gives life to a pivotal moment in modern history casting light on the hidden moments of deep humanity behind history Laika's story will speak straight to your heart

[Animals in Space](#) Colin Burgess, Chris Dubbs, 2007-01-24 This book is as a detailed but highly readable and balanced account of the history of animal space flights carried out by all nations but principally the United States and the Soviet Union It explores the ways in which animal high altitude and space flight research impacted on space flight biomedicine and technology and how the results both successful and disappointing allowed human beings to then undertake that same hazardous journey with far greater understanding and confidence This complete and authoritative book will undoubtedly become the ultimate authority on animal space flights

Space Oddities Joe Cuhaj, 2022-08-15 Nothing captivates the human imagination like the vast unknowns of space Ancient petroglyphs present renderings of the heavens proof that we have been gazing up at the stars with wonder for thousands of years Since then mankind has systematically expanded our cosmic possibilities What were once flights of fancy and dreams of science fiction writers have become nearly routine a continuous human presence orbiting the Earth probes flying beyond our solar system and men walking on the moon NASA and the Russian space program make traveling to the stars look easy but it has been far from that Space travel is a sometimes heroic sometimes humorous and always dangerous journey fraught with perils around every corner that most of us have never heard of or have long since forgotten Space Oddities brings these unknown offbeat and obscure stories of space to life From the showmanship and bravado of the earliest known space fatality German

Max Valier to the first ever indictment under the Espionage Act on an Army officer who leaked secrets concerning the development of early U S rockets and the story of a single loose bolt that defeated the Soviet Union's attempt to beat America to the moon Author Joe Cuhaj also sheds light on the human aspects of space travel that have remained industry secrets until now how the tradition of using a musical playlist to wake astronauts up began fascinating tales about inventions like the Fischer Space Pen Omega watches and even Tang breakfast drink In addition to fun and entertaining space trivia Space Oddities also features stories of the profound impact that space travel has had on challenges right here at home like the effort by civil rights leaders and activists in the 1960s to bring the money from the space program back home to those in need on Earth NASA's FLATs First Lady Astronaut Training program and the 13 women who were selected to become astronauts in 1960 but were denied a chance at flying even after successfully completing the rigorous astronaut training program and the animals who many times sacrificed their lives to prove that man could fly in space Filled with rare and little known stories Space Oddities will bring the final frontier to the homes of diehard space readers and armchair astronauts alike

Outside the Anthropological Machine Chiara Mengozzi, 2020-05-14 In the midst of the climate crisis and the threat of the sixth extinction we can no longer claim to be the masters of nature Rather we need to unlearn our species arrogance for the sake of all animals human and non human Rethinking our being in the world as Homo sapiens this monograph argues starts precisely from the way we relate to our closer companion species The authors gathered here endeavour to find multiple exit strategies from the anthropocentric paradigms that have bound the human and social sciences Part I investigates the unexplored margins of human history by re-reading historical events literary texts and scientific findings from an animal's perspective rather than a human's Part II explores different forms of human animal relationships putting the emphasis on the institutions spaces and discourses that frame our interactions with animals Part III engages with processes of translation that aim to render animals experience and perception into human words and visual language

Beastly Natures Dorothee Brantz, 2010-07-08 Jacket

Post-Koiné: Studies of Non-Anthropocentric (Poetic) Languages Anita Jarzyna, 2025-09-25 In this book you will come across an authorial formula of extrahuman community and communication The formula includes languages polemical with the narrow model of community that often excludes certain human and non human beings Alternative languages are sensitive to the codes of violence directed against animals so as to inclusively create a new interspecies non antagonistic collectivity What especially seeks such alternative languages is poetry It not only

represents the true character of existing relationships with animals or determines their shape but also can interfere in them suspend the control of logocentric order and as a result reduce the ambiguous human guardianship over animals that in turn requires the verification and questioning of the guardianship's position in language This publication treats Polish poetry as a statement equal with if not precursory for the discursive calls for the abolition of anthropocentric dominance The book proves that critical reflection on the language that consolidates the community redefines our attitude toward animals
