Capital Spaces Matthew Carmona, Filipa Wunderlich, 2013-05-02 In recent years it has become common place to hear claims that public space in cities across the globe has become the exclusive preserve of the wealthy and privileged at the expense of the needs of wider society Whether it is the privatization of public space through commercial developments like shopping malls and business parks the gentrification of existing spaces by campaigns against perceived anti social behaviour or the increasing domination of public areas by private transport in the form of the car the urban public space is seen as under threat But are things really that bad Has the market really become the sole factor that influences the treatment of public space Have the financial and personal interests of the few really come to dominate those of the many To answer these questions Matthew Carmona and Filipa Wunderlich have carried out a detailed investigation of the modern public spaces of London that most global of cities They have developed a new typology of public spaces applicable to all cities a typology that demonstrates that to properly assess contemporary urban places means challenging the over simplification of current critiques Global cities are made up of many overlapping public spaces good and bad this book shows how to analyze this complexity and to understand it

Theme Park Fandom Rebecca Williams, 2025-10-01 Theme Park Fandom argues that serious study of theme parks and their adult fans has much to tell us about contemporary transmediality and convergence themed and immersive spaces and audience relationships with places of meaning Considering the duopoly of Disney and Universal in Orlando the book explores a range of theme park experiences including planning trips meeting characters eating and drinking engaging in practices such as cosplay and re enactment and memorializing lost attractions Highlighting key themes such as immersion materiality cultural distinctions and self identity the book argues that theme parks are a crucial site for the exploration of transmediality and the development of paratexts Proposing the key concepts of spatial transmedia and haptic fandom the book offers analysis of the intersections between fandom media texts and merchandise as well as fans own affective and physical responses to visiting the parks

Performance and the Disney Theme Park Experience Jennifer A. Kokai, Tom Robson, 2025-07-02 Most scholars and critics deny agency to the tourist in their engagement with the Disney theme park experience The vast body of research and journalism on the Disney Imagineers the designers and storytellers who construct the park experience leads to the misconception that these exceptional artists puppeteer every aspect of the guest's experience This anthology now in its second edition re centers the park experience around its protagonist the tourist and addresses the Disney Parks using performance theory an approach few to no scholars had used prior to the first edition The authors of the individual essays as

well as the Introduction by Kokai and Robson and an Afterword by world renowned tourism and performance expert Susan Bennett recognize the inherently complicated nature of Disney. Many of the contributors consider themselves Disney fans but also recognize the potentially problematic aspects of Disney parks. This collection permits both perspectives to exist side by side informing rather than contradicting each other.

Organizational Spaces Alfons van Marrewijk, Dvora Yanow, 2010-01-01. *Organizational Spaces* explores a wide range of interfaces between built spaces and organizational actors including the ways the former can potentially affect and shape the behaviours and acts of employees at all levels as well as clients, other visitors and onlookers. Using innovative interpretive methods, the book provides detailed empirical and theoretical analyses of field research that focus on the meanings that organizational spaces can communicate to multiple audiences. Scholars and graduate students in the areas of organizational culture, cultural change and intervention in organizations, international business, design sciences as well as in organizational studies more broadly should not be without this important and highly original resource.

Diverse Spaces of Childhood and Youth Ruth Evans, Louise Holt, 2016-04-08. *Diverse Spaces of Childhood and Youth* focuses on the diverse spaces and discourses of children and youth globally. The chapters explore the influence of gender, age and other socio-cultural differences such as race, ethnicity and migration trajectories on the everyday lives of children and youth in a range of international contexts. These include the diverse urban environments of Istanbul, Copenhagen, Helsinki, Toronto, London and Bratislava and the contrasting rural settings of Ghana and England. The analyses of children's, young people's, parents' and professionals' experiences and discourses provide critical insights into how gender and other socio-cultural differences intersect. The importance of everyday practices and performances in the formation of children's and young people's identities is revealed through, for example, friendships and everyday sociality, mobilities and movements across space in both rural and urban environments. The volume shows how discourses of childhood, particularly those associated with risk, intersect with difference. The recognition of young people's agency and participation is central to many of the chapters whilst also raising methodological questions about how discourses of childhood and youth are researched. Overall, the book provides an original contribution to geographies of children, youth and families and research on diversity and difference in global contexts. This book was published as a special issue of *Children's Geographies*.

Queer Spiritual Spaces Kath Browne, Sally R. Munt, Andrew Kam-Tuck Yip, 2016-05-23. Drawn from extensive new and rich empirical research across the UK, Canada and USA, *Queer Spiritual Spaces* investigates the contemporary socio-cultural practices of belief by those who have historically been and continue to be excluded or derided by mainstream religions and alternative spiritualities. As the first monograph to be directly informed by queer subjectivities whilst dealing with divergent spiritualities on an international scale, this book explores the recently emerging innovative spaces and integrative practices of queer spiritualities. Its breadth of coverage and keen critical engagement mean it will serve as a theoretically fertile, comprehensive entry point for any scholar wishing to explore the queer spiritual spaces.

Masons, Tricksters and Cartographers David Turnbull,2003-09-02 In an eclectic and highly original study Turnbull brings together traditions as diverse as cathedral building Micronesian navigation cartography and turbulence research He argues that all our differing ways of producing knowledge including science are messy spatial and local Every culture has its own ways of assembling local knowledge thereby creating space through the linking of people practices and places The spaces we inhabit and assemblages we work with are not as homogenous and coherent as our modernist

The Changing Faces of Space Maria Teresa Catena, Felice Masi, 2018-01-11 This book focuses on various concepts of space and their historical evolution. In particular, it examines the variations that have modified the notions of place, orientation, distance, vacuum, limit, bound, and boundary, form, and figure, continuity, and contingency, in order to show how spatial characteristics are decisive in a range of contexts in the determination and comprehension of exteriority, in individuation and identification, in defining the meaning of nature and of the natural sciences, in aesthetical formations and representations, in determining the relationship between experience, behavior, and environment, and in the construction of mental and social subjectivity. Accordingly, the book offers a comprehensive review of concepts of space as formulated by Kant, Husserl,

Heidegger, Einstein, Heisenberg, Penrose, and Thorne, subsequently comparing them to notions developed more recently in the current age, which Foucault dubbed the age of space. The book is divided into four distinct yet deeply interconnected parts which explore the space of life, the space of experience, the space of science, and the space of the arts. *An Anxious Peace*

Hans Mark, 2019-04-23 By any measure, Hans Mark was a warrior of the Cold War. Born in Mannheim, Germany, in 1929, he spent his early childhood in Vienna before escaping the Nazi Anschluss in 1938 and eventually emigrating to the United States, settling in New York. He graduated from high school in 1947, went west to attend the University of California, Berkeley, and later earned a PhD in physics from MIT. His work in nuclear engineering soon set him on a path that would be shaped by aeronautics, space exploration, and national defense. It was through advanced technology that Mark believed the United States could win the Cold War. In *An Anxious Peace*, Mark recounts in detail his life as a twentieth-century rocket man. Here is the inside story of one who in a career spanning more than six decades was on the technological front line from long-range bombers to the space shuttle. Along the way, Mark reveals many never-before-told stories from life at NASA and more. Readers will revel in learning the background behind the decision to place a plaque on Pioneer 10, a space probe that the NASA Ames Research Center designed to fly past the asteroid belt, Jupiter, and Saturn to collect data and images. Mark tells how he, Carl Sagan, and NASA insider John Naugle kept secret the addition of the now iconic 6x9 inch aluminum message from humanity until the probe had been launched. To this day, Mark is pushing for a manned mission to Mars. One thing is sure: Hans Mark has left a major impact on academic and scientific communities that will be felt for decades to come. *1-2-3 Murals* Jean
