Space Power:

Measuring Space Power Marco Aliberti, Matteo Cappella, Tomas Hrozensky, 2019-08-02 This book provides an in depth investigation of the concept of space power and devises a novel conceptual framework for empirically measuring and comparing different typologies of space actors on the basis of clearly defined criteria In turn the book identifies a comprehensive set of conditions required to achieve and maintain the status of space power and explores the main political security and socio economic stakes involved Building on this basis the book conducts a comparative assessment of the major space actors the underlying aim of which is to examine Europe s relative position in the space arena and put into perspective its proclaimed goal to assert itself as a space power with all of the means and resources this would entail Given its scope the book represents a valuable and versatile tool to support European decision making and offers key insights for executives space professionals and scholars alike

Power, State and Space Marco Aliberti, Ottorino Cappelli, Rodrigo Praino, 2023-07-18 This book explains on what basis a nation can claim the status of space power what are the criteria differentiating a space power from lesser space actors and how their spacepower can be empirically measured and assessed To this end it sets forth a comprehensive multidisciplinary framework to enable a dynamic comparison of space actors and of the pathways that lead them in and out of the space powers club Drawing upon a critical review of the existing literature it conceptualises spacepower as a form of state power based on the complex interplay between the two defining dimensions of stateness namely the well studied dimension of capacity and the often neglected yet exceedingly important dimension of autonomy The book demonstrates that only actors possessing high levels of both autonomy and capacity qualify as space powers Different levels of either capacity or autonomy produce other types of space actors including skilled spacefarers self reliant spacefarers primed spacefarers and emerging space actors This innovative conceptual framework is complemented by an in depth comparative assessment that collects and processes a large amount of hard to find data on the most active global space actors and aggregates multiple indicators into a compound non hierarchical index of space power visualised in the form of a matrix
