Space Swimmers The:

The Space Swimmers Gordon R. Dickson, 2014-01-02 Patrick Joya lifted his head to scan the southern sky and saw a dark bluish shape flicker against the clouds Growing larger and larger the object undulated like a wide piece of cloth carried along on a moving current of water He could hear the babble of voices around him swelling to a mounting groan of panic The sound went racing like a cresting wave back toward the Terminal where the thousands there would be lifting their gaze skyward Another Space Swimmer Pat thought with sinking heart It seemed as if it intended to swallow up the sky for the brightness of day had blackened into night accepted their robot like existence Either way the human race was doomed

Bio-Mimetic Swimmers in Incompressible Fluids Alexander Khapalov, 2021-10-27 This monograph presents an original concise mathematical theory for bio mimetic swimmers in the framework of a coupled system of PDEs and ODEs The authoritative research pioneered by the author serves as the basis for the method adopted here This unique methodology consists of an original modelling approach well posedness results for the proposed models for swimmers and a controllability theory that studies the steering potential of the proposed swimmers A combination of this sort does not currently exist in the literature making this an indispensable resource Structured in five parts the author establishes the main modeling approach in Part One Part Two then presents the well posedness results for these models Parts Three through Five serve to develop a controllability theory for the swimmers which are conceived of as artificial mechanical devices that imitate the swimming motion of fish eels frogs and other aquatic creatures in nature Several illustrative examples are provided in the last portion

that serve as potential research topics Bio Mimetic Swimmers in Incompressible Fluids will appeal to graduate students and researchers studying fluid dynamics and control theory as well as engineers interested in these areas **Science Fact and Science Fiction** Brian M. Stableford,2006 Publisher description **On Pedagogical Spaces, Multiplicity and Linearities and Learning** Michael Crowhurst,2022-03-03 This book introduces a research method called auto teaching focused research a research process that aims to document understandings generated by and for the teacher when that teacher teaches or re teaches a course It demonstrates how this method is applied by the author researcher within the pedagogical space that is the teaching of a course one that has been taught numerous times by the author researcher over many years This book documents understandings about learning and teaching that have emerged within the pedagogical space that is the teaching of a course and the pedagogical space that is the writing of a book It explores the notion that pedagogical spaces are complex and that subjects navigate and are produced within them in a multiplicity of ways This book applies a research method that generates a knowledge product that research practitioners in a variety of settings might find useful to adopt or adapt **Just Add Watercolour** Helen Birch,2015 Just Add Watercolour is an innovative and accessible guide to this most dynamic of artforms packed with bite sized creative painting tips and advice offering aspiring artists the freedom to dip in and out for practical information or flick through for fresh inspiration and ideas *City Publics* Sophie Watson,2013-02-01 Some cities have grown into mega cities and some into uncontrolled sprawl others have seen their centres decline with populations moving to the suburbs In such times questions of the public realm and public space in cities warrant even greater attention than previously received Concerned with the borders and boundaries constraints and limits on accepting acknowledging and celebrating difference in public Sophie Watson through ethnographic studies interrogates how difference is negotiated and performed Focusing on spaces where to outside observers tension is relatively absent or invisible Watson also reveals how the boundaries between the public and private are being negotiated and redrawn and how public and private spaces are mutually constitutive Through her investigation of the more ordinary and less dramatic forms of encounter and contestation in the city Watson is able to conceive an urban public realm and urban public space that is heterogeneous and potentially progressive With numerous photographs and drawings City Publics not only throws new light on encounters with others in public space but also destabilizes dominant sometimes simplistic universalized accounts and helps us re imagine urban public space as a site of potentiality difference and enchanted encounters The Swimmer William R. Uttal,Gary Bradshaw,Sriram Dayanand,Robb Lovell,Thomas Shepherd,2014-02-25 This research monograph describes a large programming project in which an underwater organism capable of perceiving learning deciding and navigating is computationally simulated The developed computational model serves as a contemporary theory of perceptual motor performance embodying much of what is known about human vision and some of what is known about other cognitive processes This artificial intelligence project has substantial contributions to make to the development of autonomous

underwater vehicles It also makes a specific theoretical statement about the organization and nature of organic perceptual motor systems that may be useful to psychologists neuroscientists and theoreticians in a number of other fields **Tribune** Dennis Tallent,2002-04-28 Once a simple cook in the XXII Flavius Marcus Marcellus saved his Legion from certain annihilation on Deneb IV a hellhole of blazing heat and blowing sands He rose from the ashes of that disaster to earn one of the most powerful positions in the Roman Empire Sir Marcus Marcellus is now a newly elected Tribune of the people The Emperor s first assignment for him is to locate and contain beings from earth s most distant past The Romans called them Strigoi others called them vampires He also has to solve the mystery of the marauders pirates that prey upon Roman shipping In the midst of these problems he must conceal his forbidden love for Parthenia a Gallae priestess of the outcast temple of Cybele
