Spaces of Global Cultures Anthony King, 2004-08-02 SDraws on social cultural and postcolonial writings and architectural evidence from various cities around the world to examine existing theories of globalization and also develop new ones

Spaces of Global Cultures Anthony D. King, 2004 Spaces of Global Cultures Anthony King, 2004 *Writing the Global City* Anthony King, 2016-04-14 Over the last three decades our understanding of the city worldwide has been revolutionized by three innovative theoretical concepts globalisation postcolonialism and a radically contested notion of modernity The idea and even the reality of the city has been extended out of the state and nation and re positioned in the larger global world In this book Anthony King brings together key essays written over this period much of it dominated by debates about the world or global city Challenging assumptions and silences behind these debates King provides largely ignored historical and cultural dimensions to the understanding of world city formation as well as decline Interdisciplinary and comparative the essays address new ways of framing contemporary themes the imperial and colonial origin of contemporary world and global cities actually existing postcolonialisms claims about urban and cultural homogenisation and the role of architecture and built environment in that process Also addressed are arguments about indigenous and exogenous perspectives Eurocentricism ways of framing vernacular architecture and the global historical sociology of building types Wide ranging and accessible *Writing the Global City* provides essential historical contexts and theoretical frameworks for understanding contemporary urban and architectural debates Extensive bibliographies will make it essential for teaching reference and research **Visualizing the City** Alan Marcus, Dietrich Neumann, 2024-11-01 This anthology presents a range of interdisciplinary explorations into the urban environment through film photography digital imagery maps and signage Contributors examine our fascination with the city through the history of art and architecture urban studies environmental studies cultural geography and screen studies Bringing together a wide spectrum of urban contexts *Visualizing the City* s diverse essays explore visual representations of urbanism and modernity reflected through the prism of global cultures using an engaging variety of methods and texts New Islamist Architecture and Urbanism Bülent Batuman, 2017-12-22 *New Islamist Architecture and Urbanism* claims that in today s world a research agenda concerning the relation between Islam and space has to consider the role of Islamism rather than Islam in shaping and in return being shaped by the built environment The book tackles this task through an analysis of the ongoing transformation of Turkey under the rule of the pro Islamic Justice and Development Party In this regard it is a topical book a rare description of a political regime s reshaping of urban and architectural forms whilst the process is alive Defining Turkey s transformation in the past two decades as a process of new Islamist nation re building the book investigates the role of the built environment in the making of an Islamist milieu Drawing on political economy and cultural studies it explores the prevailing primacy of nation and nationalism for new Islamism and the spatial negotiations between nation and Islam It discusses the role of

architecture in the deployment of history in the rewriting of nationhood and that of space in the expansion of Islamist social networks and cultural practices Looking at examples of housing compounds mosques public spaces and the new presidential residence New Islamist Architecture and Urbanism scrutinizes the spatial making of new Islamism in Turkey through comparisons with relevant cases across the globe urban renewal projects in Beirut and Amman nativization of Soviet modernism in Baku and Astana the presidential palaces of Ashgabat and Putrajaya and the neo Ottoman mosques built in diverse locations such as Tokyo and Washington DC

Contemporary Urban Landscapes of the Middle East

Mohammad Gharipour, 2016-03-17 The Middle East is well known for its historic gardens that have developed over more than two millenniums The role of urban landscape projects in Middle Eastern cities has grown in prominence with a gradual shift in emphasis from gardens for the private sphere to an increasingly public function The contemporary landscape projects either designed as public plazas or public parks have played a significant role in transferring the modern Middle Eastern cities to a new era and also in transforming to a newly shaped social culture in which the public has a voice This book considers what ties these projects to their historical context and what regional and local elements and concepts have been used in their design

Transnational Architecture and Urbanism Davide Ponzini, 2020-05-28 Transnational Architecture and Urbanism combines urban planning design policy and geography studies to offer place based and project oriented insight into relevant case studies of urban transformation in Europe North America Asia and the Middle East Since the 1990s increasingly multinational modes of design have arisen especially concerning prominent buildings and places Traditional planning and design disciplines have proven to have limited comprehension of and little grip on such transformations Public and scholarly discussions argue that these projects and transformations derive from socioeconomic political cultural trends or conditions of globalization The author suggests that general urban theories are relevant as background but of limited efficacy when dealing with such context bound projects and policies This book critically investigates emerging problematic issues such as the spectacularization of the urban environment the decontextualization of design practice and the global circulation of plans and projects The book portends new conceptualizations evidence based explanations and practical understanding for architects planners and policy makers to critically learn from practice to cope with these transnational issues and to put better planning in place

About Star Architecture Nadia Alaily-Mattar, Davide Ponzini, Alain Thierstein, 2020-03-16 Cities across the world have been resorting to star architects to brand their projects spark urban regeneration and market the city image internationally This book shifts the attention from star architects to star architecture arguing that the process of deciding about and implementing relevant architectural and urban projects is not the product of any single actor Star architecture can in fact be better studied and understood as assembled by multiple actors and in its relationship with urban transformation In its 18 chapters the book presents a multidisciplinary collection of expert contributions in the fields of urban planning architecture media studies urban economics geography and sociology

consistently brought together for the first time to deal with this topic Through a vast array of case studies and analytical techniques touching over 20 cities in Europe the book shows the positive and more problematic impacts of star architecture with reference to the preservation of built heritage tourism and media The book will be of interest to architects sociologists urban planners and public administrators

Spaces of Aid Lisa Smirl, 2015-03-12 Aid workers commonly bemoan that the experience of working in the field sits uneasily with the goals they've signed up to visiting project sites in air conditioned Land Cruisers while the intended beneficiaries walk barefoot through the heat or checking emails from within gated compounds while surrounding communities have no running water Spaces of Aid provides the first book length analysis of what has colloquially been referred to as Aid Land It explores in depth two high profile case studies the Aceh tsunami and Hurricane Katrina in order to uncover a fascinating history of the objects and spaces that have become an endemic yet unexamined part of the delivery of humanitarian assistance

Travel, Space, Architecture Miodrag Mitrasinovic, 2016-02-17 Travel Space Architecture defines a new theoretical territory in architectural and urban scholarship that frames the processes of spatial production through the notion of travel By aligning architectural thinking with current critical theory debates this book explores whether dissociating culture from place and identity and detaching the idea of architecture from both can reframe our understanding of spatial and architectural practices The book presents seventeen key case studies from a diverse range of perspectives including historical theoretical and praxis based and range from interrogations of architectural travel and notions of belonging and nationhood to challenging established geopolitical hierarchies

Shopping Malls and Public Space in Modern China Nicholas Jewell, 2016-03-03 China's rise as an economic superpower has been inescapable Statistical hyperbole has been accompanied by a plethora of highly publicized architectural forms that brand the regeneration of its increasingly globalized urban centres Despite the sizeable body of literature that has accompanied China's modernization the essence and trajectory of its contemporary cityscape remains difficult to grasp This volume addresses a less explored aspect of China's urban rejuvenation the prominence of the shopping mall as a keystone of its public spaces Here the presence of the built form most representative of Western capitalism's excess is one that makes explicit the tensions between China's Communist state and its ascent within the free market This book examines how these interrelationships are manifested in the culturally hybrid built form of the shopping mall and its role in contesting the public space of the modern Chinese city By viewing these interrelationships as collisions of global and local narratives a more nuanced understanding of the shopping mall typology is explored Much architectural criticism has failed to address the levels of meaning implicit within the shopping mall yet it is a building type whose public popularity has guaranteed its endurance Consequently if architecture is to remain a relevant social art a more holistic understanding of this phenomenon will be indispensable to the process of adapting to globalizing forces This examination of Chinese shopping malls offers a timely and relevant case study of what is happening in all our cities today

Re-shaping Cities Michael

Guggenheim, Ola Söderström, 2009-12-04 How are building types such as skyscrapers mosques or living history museums imported adapted and contested in different societies Our urban landscapes are reshaped by the global circulation of models drawn from elsewhere This original collection examines how architectural ideas social models and building forms circulate round the world and become adapted to local conditions

Retailising Space Mattias Karrholm, 2016-04-08 Over the past few years there has been a proliferation of new kinds of retail space Retail space has cropped up just about everywhere in the urban landscape in libraries workplaces churches and museums In short retail is becoming a more and more manifest part of the public domain The traditional spaces of retail such as city centres and outlying shopping malls are either increasing in size or disappearing producing new urban types and whole environments totally dedicated to retail The creation of these new retail spaces has brought about a re and de territorialisation of urban public space and has also led to transformations in urban design and type of materials used and even in the logic and ways through which these design amenities meet the needs of retailers and or consumers This book describes how the retailisation of public domains affects our everyday life and our use of the built environment Taking an architectural and territorial perspective on this issue it looks specifically at how retail and consumption spaces have changed and territorialised urban life in different ways It then develops a methodology and a set of concepts to describe and understand the role of architecture in these territorial transformations

Critical Geographies of Sport Natalie Koch, 2016-10-04 Sport is a geographic phenomenon The physical and organizational infrastructure of sport occupies a prominent place in our society This important book takes an explicitly spatial approach to sport bringing together research in geography sport studies and related disciplines to articulate a critical approach to sports geography Critical Geographies of Sport illustrates this approach by engaging directly with a variety of theoretical traditions as well as the latest research methods Each chapter showcases the merits of a geographic approach to the study of sport ranging from football to running horseracing and professional wrestling Including cases from Asia Africa the Middle East Europe and the Americas the book highlights the ways that space and power are produced through sport and its concomitant infrastructures agencies and networks Holding these power relations at the center of its analysis it considers sport as a unique lens onto our understanding of space Truly global in its perspective it is fascinating reading for any student or scholar with an interest in sport and politics sport and society or human geography

Cities and Cultures Malcolm Miles, 2007-04-26 Cities and Cultures is a critical account of the relations between contemporary cities and the cultures they produce and which in turn shape them The book questions received ideas of what constitutes a city s culture through case studies in which different kinds of culture the arts cultural institutions and heritage distinctive ways of life are seen to be differently used in or affected by the development of particular cities The book does not mask the complexity of this but explains it in ways accessible for undergraduates The book begins with introductory chapters on the concepts of a city and a culture the latter in the anthropological sense as well as denoting the arts citing cases from modern literature The book then

moves from a critical account of cultural production in a metropolitan setting to the idea that a city too is produced through the characteristic ways of life of its inhabitants. The cultural industries are scrutinised for their relation to such cultures as well as to city marketing and attention is given to the European Cities of Culture initiative and to the hybridity of contemporary urban cultures in a period of globalisation and migration. In its penultimate chapter the book looks at incidental cultural forms and cultural means to identify formation and in its final chapter examines the permeability of urban cultures and cultural forms. Sources are introduced, positions clarified and contrasted and notes given for selective further reading. Playing on the two meanings of culture Miles takes a unique approach by relating arguments around these meanings to specific cases of urban development today. The book includes both critical comment on a range of literatures being a truly interdisciplinary study and the outcome of the author's field research into urban cultures.

Aspects of Urbanization in China Gregory Bracken, 2012. China's opkomst als wereldmacht is een van de ingrijpendste gebeurtenissen van deze tijd. Honderden miljoenen mensen zijn de armoede ontvlucht dankzij de snelle industrialisatie van het land. De wonderbaarlijke economische groei van China heeft zijn nadelen: iets wat vaak het meest pijnlijk duidelijk wordt in de steden. Deze studie is geschreven door wetenschappers uit verschillende disciplines waaronder architectuur, stedenbouw, sociale wetenschappen, aardrijkskunde en antropologie. Een deel van de auteurs behandelt de mondiale ambities van de steden terwijl andere hun culturele en architecturale uitingen onderzoeken.

Interdisciplinary Unsettling of Place and Space Sarah Pinto, Shelley Hannigan, Bernadette Walker-Gibbs, Emma Charlton, 2019-04-25. This book brings together researchers from different fields, traditions and perspectives to examine the ways in which place and space might be unsettled. Researchers from across the humanities and social sciences have been drawn to the study of place and space since the 1970s and the term unsettled has been an occasional but recurring presence in this body of scholarship. Though it has been used to invoke a range of meanings from the dangerous to the liberating, the term itself has rarely been at the centre of sustained examination. This collection highlights the idea of the unsettled in the scholarly investigation of place and space. The respective chapters offer a dialogue between a diverse and eclectic group of researchers crossing significant disciplinary and interdisciplinary boundaries in the process. The purpose of the collection is to juxtapose a range of different approaches to and perspectives on the unsettling of place and space. In doing so, *Interdisciplinary Unsettling of Place and Space* makes an important contribution and offers new insights into how scholarship and research into different fields and practices may help us re-envision place and space.

The Routledge Handbook on Cities of the Global South Susan Parnell, Sophie Oldfield, 2014-03-26. The renaissance in urban theory draws directly from a fresh focus on the neglected realities of cities beyond the west and embraces the global south as the epicentre of urbanism. This Handbook engages the complex ways in which cities of the global south and the global north are rapidly shifting the imperative for multiple genealogies of knowledge production as well as a diversity of empirical entry points to understand contemporary urban dynamics. The Handbook works

towards a geographical realignment in urban studies bringing into conversation a wide array of cities across the global south the ordinary mega global and peripheral With interdisciplinary contributions from a range of leading international experts it profiles an emergent and geographically diverse body of work The contributions draw on conflicting and divergent debates to open up discussion on the meaning of the city in or of the global south arguments that are fluid and increasingly contested geographically and conceptually It reflects on critical urbanism the macro and micro scale forces that shape cities including ideological demographic and technological shifts and constantly changing global and regional economic dynamics Working with southern reference points the chapters present themes in urban politics identity and environment in ways that re frame our thinking about cities The Handbook engages the twenty first century city through a southern urban lens to stimulate scholarly professional and activist engagements with the city

Architecture and Identity Peter Herrle, Erik Wegerhoff, 2008 This book brings together complex fields of knowledge and globally splintered discourses on a subject that is experienced not only by scholars but in the everyday lives of people around the world There is a common complaint about the loss of identity which to a substantial degree is being associated with the built environment in cities and specifically with their architecture Architecture and Identity takes a global multidisciplinary look on how identities in contemporary architecture are constructed The general hypothesis underlying this book is that in a globalized world identity in architecture cannot be easily derived from distinct indigenous patterns The book presents forty contributions from various disciplines aiming to destroy the myth of an inheritable or otherwise prefabricated identity Some authors dismantle constructs of identity that have long been considered as solid and unbreakable while others meticulously unravel the construction process of identities in
