Symbol and Ritual in the New Spain Laura Desfor Edles,1998-04-16 This is a book about the role of culture in social change and the Spanish transition to democracy after Franco Laura Desfor Edles takes a distinctively culturalist approach to the strategy of consensus deployed by the Spanish elite and uses systematic textual interpretation with a particular focus on Spanish newspapers to show how a new symbolic framework emerged in post Franco Spain which enabled the resolution of specific events critical to the success of the transition In addition to uncovering underlying processes of symbolization she shows that politico historical transitions can themselves be understood as ritual processes involving as they do phases and symbols of separation liminality and re aggregation

Elites and Democratic Transitions by Regime Transformation in Southern Europe Ioannis Tzortzis, 2022-09-16 This book examines three cases of democratic transitions by self transformation of the non democratic regimes in Southern Europe the Spanish reforma pactada ruptura pactada of 1976 77 the Greek Markezinis experiment of 1973 and the Turkish democratic transition of 1983 in a comparative perspective The author argues that a democratic transition initiated by the regime elites is in contrast to widely held assumptions and notwithstanding some reservations on whether democracy can be re introduced by non democrats worth viewing as a window of opportunity for democratisation It is up to the democratic counter elites to respond to it using the civil society and the international factor as allies to achieve their goal of acquiring more concessions from the regime

Social Capital in Development Planning Raffaella Y. Nanetti, Catalina Holguin, 2016-01-28 The pursuit of sustainable development and smart growth is a main challenge today in countries around the world Social capital is an asset of their territorial communities It is also a precondition for national and local policies that aim to better the economic base and quality of life for all This change is socially diffused economically sustainable over time and smart in its content A significant stock of social capital facilitates such results because it links into the process of development planning institutional decision makers and socioeconomic stakeholders who share trust solidarity norms and a community vision In the last thirty years social capital has become a forceful concept in the social sciences the subject of many scholarly works and a topic of keen interest and debate in policy circles Yet the main focus has been on defining and measuring social capital with little attention given to its value in promoting development policies Social Capital in Development Planning updates and advances the debate on social capital through the analysis of the application of the concept of social capital to programs for sustainable and smart socioeconomic development empirical findings and a new paradigm for development planning

Transitional Justice Neil J. Kritz, 1995 KGB Files and Agents **The Politics of Southern Europe** José Magone, 2003-02-28 European integration has had a profound impact on the politics of Southern Europe a region that was initially at the margin of the decision making processes of the European Union but is gradually becoming more and more influential This volume offers a comparative overview of modern politics in Spain Portugal Italy and

Greece focusing in particular on the process of integration of these countries into the European Union and on the impact of European public policy The author analyzes the development of Southern European political systems from the establishment of democratic governments to the most recent political events looking at each individual system and finding patterns similarities of development as well as differences between them Among the topics examined are the building of institutions the parties and party systems foreign policies the political culture of each country and the recent efforts towards the creation of a space of security and peace in the Mediterranean *State*, 1988 *Changing Patterns of Power* Thomas S.

Popkewitz, 1993-01-01 The reform of teacher education has been a focal point of state action in industrial countries since the early 1980s Given this convergence of educational and governmental activity the studies presented here are a significant departure from conventional discourse on reform because they explore the ways that social regulation and political power operate through the processes of educational reform This book considers the reform of teacher education to be an integral part of the larger system of social regulation that takes place in the arena of schooling Reforms in teacher education involve complex sets of interactions among and within social institutions These interactions help shape power relations and patterns of social regulation that operate through state university and school interactions Nevertheless the patterns that give direction and value to teacher education are not easily discerned in public discussions of educational change Instead many of the most important regulatory aspects of teacher education reform are partly obscured by a public discourse that focuses attention on formal responses to socioeconomic events and that tends to divert critical attention away from the power that is exercised and the interests that are served during reform This volume presents studies of reform in Australia Finland Iceland Portugal Spain Sweden the United Kingdom and the United States Although these countries differ in their political and social histories rates and levels of industrialization and patterns of educational practice there is a striking commonality in both the strategies that are employed to reform teacher education and in the nature of social regulation that is a concomitant of reform *The Foreign Policy of Spain Toward Latin America During the Transition from Authoritarianism to Democracy*
