**Spatial Schemas and Abstract Thought** Merideth Gattis, 2001      **Spatial Dimensions of Social Thought** Thomas W. Schubert, Anne Maass, 2011-10-28 Space provides the stage for our social lives social thought evolved and developed in a constant interaction with space The volume demonstrates how this has led to an astonishing intertwining of spatial and social thought For the first time research on language comprehension metaphors priming spatial perception face perception art history and other fields is brought together to provide an integrative view This overview confirms that often metaphors reveal a deeper truth about how our mind uses spatial information to represent social concepts Yet the evidence also goes beyond this insight showing for instance how flexible our mind operates with spatial metaphors how the peculiarities of our bodies determine the way we assign meaning to space and how the asymmetry of our brain influences spatial and face perception Finally it is revealed that also how we write language from left to right or from right to left shapes how we perceive interpret and produce horizontal movement and order The evidence ranges from linguistics to social and spatial perception to neuropsychology seamlessly integrating such diverse findings as speed in word comprehension children's depictions of abstract concepts estimates of the steepness of hills and archival research on how often Homer Simpson is depicted left or right of Marge The chapters in this book offer a topology of social cognition and explore the pivotal role language plays in creating links between spatial and social thought      Toward a Visually-Oriented School Mathematics Curriculum Ferdinand Rivera, 2011-01-06 What does it mean to have a visual representation of a mathematical object concept or process What visualization strategies support growth in mathematical thinking reasoning generalization and knowledge Is mathematical seeing culture free How can information drawn from studies in blind subjects help us understand the significance of a multimodal approach to learning mathematics Toward a Visually Oriented School Mathematics Curriculum explores a unified theory of visualization in school mathematical learning via the notion of progressive modeling Based on the author's longitudinal research investigations in elementary and middle school classrooms the book provides a compelling empirical account of ways in which instruction can effectively orchestrate the transition from personally constructed visuals both externally drawn and internally derived into more structured visual representations within the context of a socioculturally grounded mathematical activity Both for teachers and researchers a discussion of this topic is relevant in the history of the present The ubiquity of technological tools and virtual spaces for learning and doing mathematics has aroused interest among concerned stakeholders about the role of mathematics in these contexts The book begins with a prolegomenon on the author's reflections on past and present visual studies in mathematics education In the remaining seven chapters visualization is pursued in terms of its role in bringing about progressions in mathematical symbolization abduction pattern generalization and diagrammatization Toward a Visually Oriented School Mathematics Curriculum views issues surrounding visualization through the eyes of a classroom teacher researcher it draws on findings within and outside of mathematics

education that help practitioners and scholars gain a better understanding of what it means to pleasurable experience the symmetric visual symbolic reversal phenomenon that is seeing the visual in the symbolic and the symbolic in the visual

Evolution, Rationality and Cognition Antonio Zilhao, 2006-01-16 Evolutionary thinking has expanded in the last decades spreading from its traditional stronghold the explanation of speciation and adaptation in biology to new domains Fascinating pieces of work the essays in this collection attest to the illuminating power of evolutionary thinking when applied to the understanding of the human mind The contributors to Cognition Evolution and Rationality use an evolutionary standpoint to approach the nature of the human mind including both cognitive and behavioural functions Cognitive science is by its nature an interdisciplinary subject and the essays in this collection investigate the workings of the mind through a variety of disciplines including the philosophy of science the philosophy of mind game theory robotics and computational neuroanatomy Topics covered range from general methodological issues to long standing philosophical problems such as how rational human beings actually are With contributions from leading experts in the areas involved this book will be of interest across a number of fields including philosophy evolutionary theory and cognitive science

Speech Accompanying-Gesture Sotaro Kita, 2020-10-28 When we speak we often spontaneously produce gestures Such gestures are an integral part of face to face verbal communication The relationship between speech and gesture is the theme of this Special Issue The articles cover a wide range of issues cultural differences language and gesture development cognitive development bilingualism foreign language learning persuasion and common grounds between the speaker and the addressee The Special Issue is of interest not only to those who study the multimodal nature of communication but also to those who seek new insights into psycholinguistic issues using gesture as the window into the speaker's mind

**The Sacred in the City** Liliana Gómez, Walter Van Herck, 2012-02-09 This book reflects the way in which the city interacts with the sacred in all its many guises with religion and the human search for meaning in life As the process of urbanization of society is accelerating thus giving an increasing importance to cities and the metropolis it is relevant to investigate the social or cultural cohesion that these urban agglomerations manifest Religion is keenly observed as witnessing a growth crucially impacting cultural and political dynamics as well as determining the emergence of new sacred symbols and their inscription in urban spaces worldwide The sacred has become an important category of a new interpretation of social and cultural transformation processes From a unique broader perspective the volume focuses on the relationship between the city and the sacred Taking a multidisciplinary approach combining the expertise of philosophers historians architects social geographers sociologists and anthropologists it draws a nuanced picture of the different layers of religion of the sacred and its diverse forms within the city with examples from Europe South America and the Caribbean and Africa
