Spatial Patterns Of Office Growth And Location:

Spatial Patterns of Office Growth and Location P. W. Daniels, 1979-01-01 *The Office Pattern in New York City, 1960-75* -- In "Spatial Patterns of Office Growth and Location" Gail Garfield Schwartz, 1979 *Office Development* Michael Bateman, 2021-12-01 Originally published in 1985 this book examines the impact financial institutions have on the location of investment of vast resources including office development An analysis of their behaviour is crucial to an understanding of the 20th Century urban development process This book documents some of the international activity of property investment Some cities in the UK USA and France are examined in detail to demonstrate the huge physical impact of this development process The constraints on office development are also discussed A recurring theme is the power of the supply side of the development industry in comparison with the relatively weak position of the office end user *Progress in Industrial Geography (Routledge Revivals)* Michael Pacione, 2014-06-03 This edited collection first published in 1985 deals with a number of the major themes central to the study of industrial geography Topics under discussion include new methodologies the growing service industries foreign investment and the industrial geography of the developing world With a detailed introduction from Michael Pacione and comprehensive coverage the title reflects the extent to which the field of industrial geography changed over the second half of the twentieth century in response to economic change incorporating the growth of multinational enterprises and the influence of globalisation alongside traditional discussion of the manufacturing industry Providing an essential background to developments in industrial geography this title will be valuable to students with an interest in the economics characteristics and advancement of industrial change *Urban Geography (Routledge Revivals)* David Clark, 2013-09-13 This book first published in 1982 addressed the need for a fresh and comprehensive guide to the rapidly expanding area of urban geography Drawing on examples from cities in a number of countries including the U S A David Clark outlines the contribution of geographers to the understanding of the city and urban society and analyses the growth of the urban environment alongside planning and policy A thorough and unique study this title will be of particular value to undergraduate students as well as laying the foundations for a more advanced study in urban geography and planning **The Dublin-Belfast Development Corridor** John R. Yarwood, 2006 This volume brings together an interdisciplinary team of leading scholars and practitioners from both sides of the border to discuss the Dublin Belfast corridor and the associated challenges of cross border development from economic geographic regional studies sociological and planning perspectives **Sick Building Syndrome** Jack Rostron, 2005-08-04 Sick building syndrome is for many of us an enigma The legislative precedents currently being set in North America underline the need for rational examination of the problem This new collection of expert writing will help unravel the complex issues involved The book explores sick building syndrome from a range of perspectives architectural medical psychological and legal Each chapter offers detailed insights into the condition and taken together they highlight the need for a collaborative approach The effects of sick building

syndrome should not be underestimated as it is thought that up to 30 percent of refurbished buildings may suffer from the condition. Extreme cases may lead to increased absenteeism among employees, reduced performance and ultimately building closure.

New Models In Geography Richard Peet, Nigel Thrift, 2013-10-11. First published in 1989. It seems such a long time ago, another age yet it is a mere twenty odd years since the original *Models in Geography* was published. It is an even shorter time since the first tentative steps were taken towards an alternative formulation of what might constitute a geographical perspective within the social sciences. What came to be called the political economy perspective has progressed with remarkable speed and energy to generate its own framework of conceptualization and analysis, its own questions and debates. The papers in these two volumes are witness to the richness and range of the work which has developed over this relatively short period within the political economy approach. Moreover, from being a debate within an institutionally defined discipline of geography to introducing into that discipline ideas and discussions from the wider fields of philosophy and social science and the humanities more generally, it has now flowered into a consistent part of enquiries that span the entire realm of social studies.

Handbook of Regional and Urban Economics P. Nijkamp, Edwin S. Mills, P. C. Cheshire, 1986. This second volume of the *Handbook* presents professional surveys of all the important topics in urban economics. The first section contains 6 surveys on locational analysis, the second 5 surveys of specific urban markets and the third part presents 5 surveys of government policy issues. The book brings together exhaustive research by distinguished scholars from many countries. It is the only complete survey volume of urban economics and should serve as a reference volume to scholars and graduate students for many years. For more information on the *Handbooks in Economics* series, please see our home page on <http://www.elsevier.nl/locate/hes>.

The Uncertain Future of the Urban Core Christopher M. Law, 2017-10-12. Originally published in 1988. Inner city problems in advanced countries are being exacerbated by the decentralisation of economic activities and higher income groups. Only offices and tourism offer some prospects of growth but these vary in their potential from one city to another. This book assesses changes in the structure of urban areas, concentrating on the process of decentralisation and the consequences for the inner city and city centre. It examines and evaluates policies and makes suggestions for the future management of the city.

The Urban and Regional Transformation of Britain John Goddard, Anthony Champion, 2018-05-30. Originally published in 1983. *The Urban and Regional Transformation of Britain* analyses economic and social changes recorded across the cities and regions of Britain since the Barlow Report. The collection analyses the whole country at a more detailed scale than the ten Standard Regions for which most official statistics are produced. Although there are important differences between the major regions of Britain, many of the recent processes of change appear to have operated at a local level within rather than between regions. The essays in this volume bring together change at the regional and local labour market scales and provides a comprehensive statement of urban and regional change, seeking to highlight the new spatial priorities of the 1980s.

Western Europe Hugh Clout, Mark (Reader in Geography, University Of Exeter) Blacksell, Russell

(Professor Of Geography, University Of Sussex) King, David (Professor Of Economic Geography, University Of Plymouth) Pinder, 2014-09-19 Western Europe provides a balanced appraisal of common characteristics and shared problems of the eighteen states lying to the west of the former Iron Curtain **The New Economy of the Inner City** Thomas A.

Hutton, 2009-12-07 Following the restructuring process which swept away the traditional manufacturing economy of the inner city 25 years ago new industries are transforming these former post industrial landscapes These creative technology intensive industries include Internet services computer graphics and imaging and video game production The development dynamics of these new sectors are volatile in comparison with those of the classic Industrial City But these new industries highlight the unique role of the inner city in facilitating creative processes innovation and social change Further they reflect the intensity of interaction between the global and the local in the metropolis and represent key agencies of urban place making and re imaging This book addresses the critical intersections between process and place which underpin the formation of creative enterprises in the emergent industrial districts of the new inner city It contains intensive case studies of industrial restructuring within exemplary sites in prominent world cities such as London Singapore San Francisco and Vancouver The studies demonstrate the global reach of development and innovation across these cities and sites marked by clustering rapid firm turnover and interdependency between production and consumption activity The evocative case studies brought to life by interviews sequential mapping exercises media narratives and photography also disclose the importance of local factors including urban scale built form property markets and policy which shape both the specific industrial structures and socio economic impacts The New Economy of the Inner City places inner city new industry formation within the development history of the city and underscores its role in larger processes of urban transformation The findings inform a critique and synthesis of urban theory which frame the evolving conditions of the 21st century metropolis This book would be useful to researchers and students of Geography Urban Studies Economics and Planning Service Industries Peter W. Daniels, 1985-12-19 The first major synthesis of an emerging geography which is undoubtedly changing the way in which academics planners and policy makers identify and interpret the spatial development of cities and regions in the 1980s

Buildings and Society Anthony D. King,2003-10-04 Buildings are essentially social and cultural products They result from social needs and accommodate a variety of functions economic social political religious Their size appearance location and form result not simply from physical factors such as materials climate or technology nor from architects designs but from a society's ideas its forms of economic and social organisation and the beliefs and values which prevail at any one time Society produces its buildings and the buildings help to maintain many of its social forms

The Impact of Recession Alan R. Townsend,2024-09-18 Rich industrialised countries entered the 1980s with unemployment higher than before the Second World War Britain experienced the impact of recession more

immediately and sharply over one million factory jobs were lost Originally published in 1983 and now reissued with a new Preface by the author this book points to the industries corporations and places in which job losses occurred between 1976 and 1981 The Impact of Recession opens with an examination of national trends which includes the post war rise and fall of manufacturing employment and the fashionable concept of de industrialisation It considers the possible and actual roles of leading industrial corporations in distributing decline to different areas The effects of the crisis on individual regions is examined in detail and the author emphasizes that it is not only the traditional areas of recession such as the North East that were affected but also the manufacturing centres of the Midlands and the normally prosperous South East Alternative explanations of the distribution of employment are examined and the adequacy of previous explanations of unequal growth and decline are questioned The book also looks at the extent to which New Towns have suffered in the crisis and whether the well established consensus about the merits of regional planning has been broken down by the recession

The Global City Saskia Sassen, 2025-09-09 In her classic book The Global City Saskia Sassen tells how New York London and Tokyo became command centers of the emerging global economy and in the process underwent massive and parallel changes The book reorients the way we think about how cities shape and are shaped by globalization and provides lessons for the future
