*History and Precedent in Environmental Design* Anatol Rapoport, 2013-06-29 This book is about a new and different way of approaching and studying the history of the built environment and the use of historical precedents in design. However, although what I am proposing is new for what is currently called architectural history, both my approach and even my conclusions are not that new in other fields as I discovered when I attempted to find supporting evidence. In fact, of all the disciplines dealing with various aspects of the study of the past, architectural history seems to have changed least in the ways I am advocating. There is currently a revival of interest in the history of architecture and urban form; a similar interest applies to vernacular design and culture-environment relations. After years of neglect, the study of history and the use of historical precedent are again becoming important. However, that interest has not led to new approaches to the subject nor have its bases been examined. This I try to do. In so doing, I discuss a more rigorous and I would argue a more valid way of looking at historical data and hence of using such data in a theory of the built environment and as precedent in environmental design. Underlying this is my view of Environment-Behavior Studies (EBS) as an emerging theory rather than as data to help design based on current theory. Although this will be the subject of another book, a summary statement of this position may be useful.

**History of Psychiatry and Medical Psychology** Edwin R. Wallace, John Gach, 2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below. Nevertheless, the Preface would be grossly incomplete without touching on some of these issues, books, and scholars. Too many of this book's chapters (e.g., Moras, Marx, S.D.B. Weiner's) examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German, French, Italian, and Spanish. Also in his 1968 *Short History of Psychiatry* discussed below, Ackerknecht (pp. xi-xii) references important nineteenth and earlier twentieth-century psychiatric histories in English, French, and German. Such citations will, of course, not be repeated here. Finally, thanks to several publishers' re-editions of dozens of classical psychiatric texts, one can consult their bibliographies as well. See Prolegomenon for references to these splendid series. In a rough and ready sense, medical history began in classical Greece; for example, *On Ancient Medicine*, while traditionally included in the Hippocratic corpus, this text seems more likely to have been written by a non- or even anti-Hippocratic doctor. Moreover, the Hippocratic and other schools were hardly as secular as we now suppose. *On Epilepsy*, for example, does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease.

**Archaeology and History of the Chinese in Southern New Zealand During the Nineteenth Century** Neville A. Ritchie, 2023-11-01 This revised edition of Dr Neville A. Ritchie's 1986 PhD dissertation explores the history and archaeology of the 19th-century Chinese mining communities in the Clutha Valley, New Zealand. Lavishly illustrated with black and white line drawings of Chinese domestic and industrial sites and of the artefacts excavated from them, this study

offers unprecedented insight into the life and material culture of these male only sojourner communities Widely considered the most comprehensive archaeological study of overseas Chinese miners experience anywhere in the world this volume contains the total summation and analysis of artefacts found in 23 Chinese sites excavated over nine years which included two camps with 40 individual huts and other features a Chinese store and 20 rural sites including miner s huts and rock shelters Considered by the Australian Society for Historical Archaeology to be a seminal work in the field of historical archaeology this 2023 edition introduces Dr Ritchie s groundbreaking work to the next generation of archaeologists The Routledge History of Poverty, c.1450-1800 David Hitchcock, Julia McClure, 2020-12-31 The Routledge History of Poverty c 1450 1800 is a pioneering exploration of both the lives of the very poorest during the early modern period and of the vast edifices of compassion and coercion erected around them by individuals institutions and states The essays chart critical new directions in poverty scholarship and connect poverty to the environment debt and downward social mobility material culture empires informal economies disability veterancy and more The volume contributes to the understanding of societal transformations across the early modern period and places poverty and the poor at the centre of these transformations It also argues for a wider definition of poverty in history which accounts for much more than economic and social circumstance and provides both analytically critical overviews and detailed case studies By exploring poverty and the poor across early modern Europe this study is essential reading for students and researchers of early modern society economic history state formation and empire cultural representation and mobility *The British National Bibliography* Arthur James Wells, 2000

Dawson, 2023-04-06 This book examines treasure law and practice from the rise of the new science of archaeology in the early Victorian period to the present day Drawing on largely unexamined state records and other archives the book covers several legal jurisdictions England and Wales Scotland Ireland pre and post independence and post partition Northern Ireland From the Mold gold cape 1833 to the Broughton hoard 1896 from Sutton Hoo 1939 to the Galloway hoard 2014 the law of treasure trove and the Treasure Act 1996 are considered through the prism of notable archaeological discoveries and from the perspectives of finders landowners archaeologists museum professionals collectors the state and the public Literally and metaphorically treasure law is revealed as a ground breaking chapter in the history of the legal protection of cultural property and cultural heritage in Britain and Ireland The Universal Pattern Within History Rachamim Dayan, 2002-09-23 This book is a work of synthesis which argues that an all encompassing blueprint governs the evolution of all parts of our universe In its first half it discerns interdisciplinary symmetry in the early development of history and six other disciplines It then uses this discovery to formulate testable predictions about the form and content of later history In its second half the book attempts to verify these intimations of our more recent past and to envision the human

**King Arthur** Rodney Castleden, 2003-03-13 King Arthur is often written off as a medieval fantasy the dream of those yearning for an age of strong just rulers and a contented kingdom Those who accept his existence at all generally discard the stories that surround him This exciting new investigation argues not only that Arthur did exist as a Dark Age chieftain but that many of the romantic tales of Merlin Camelot and Excalibur are rooted in truth In his quest for the real King Arthur Rodney Castleden uses up to date archaeological and documentary evidence to recreate the history and society of Dark Age Britain and its kings He revives the possibility that Tintagel was an Arthurian legend and proposes a radical new theory that Arthur escaped alive from his final battle A location is even suggested for perhaps the greatest mystery the whereabouts of Arthur s grave King Arthur The Truth Behind the Legend offers a more complete picture of Arthur s Britain and his place in it than ever before The book s bold approach and compelling arguments will be welcomed by all readers with an interest in Arthuriana

*Critique as Critical History* Bregman Dalgliesh, 2017-08-22 This book presents the first sustained articulation of a Foucauldian uvre It situates Foucault s critique within the tradition of Kant s call for a philosophical archaeology of reason in parallel it demonstrates the priority in Foucault s thought of Nietzsche over Heidegger and the

framing of reason against an ontology of power Bregman Dalgliesh hereby claims that at the heart of the Foucauldianuvre is the philosophical method of critical history Its task is to make the will to know that drives thought conscious of itself as a problem especially the regimes of truth that define our governmentalities By revealing the contingency of their constituent parts of knowledge power and ethics Dalgliesh demonstrates that critical history offers an alternative mode of critique to the hithertofore singular reading of the intellectual heritage of enlightenment while it fosters an agonistic concept of freedom in respect of our putatively necessary limits
