wake of Scientific Revolution of the sixteenth and seventeenth centuries which viewed man as a participant in the cosmos not as an isolated observer Arguing that the holistic world view must be revived in some credible form before we destroy our society and our environment he explores the possibilities for a consciousness appropriate to the modern era Ecological rather than animistic this new world view would be grounded in the real and intimate connection between man and nature

Gnosis and Hermeticism from Antiquity to Modern

Times R. van den Broek, Wouter J. Hanegraaff, 1998-01-01 This volume introduces what has sometimes been called the third component of western culture It traces the historical development of those religious traditions which have rejected a world view based on the primacy of pure rationality or doctrinal faith emphasizing instead the importance of inner enlightenment or gnosis a revelatory experience which was typically believed to entail an encounter with one's true self as well as with the ground of being God The contributors to this book demonstrate this perspective as fundamental to a variety of interconnected traditions In Antiquity one finds the gnostics and hermetics in the Middle Ages several Christian sects The medieval Cathars can to a certain extent be considered part of the same tradition Starting with the Italian humanist Renaissance hermetic philosophy became of central importance to a new religious synthesis that can be referred to as Western Esotericism The development of this tradition is described from Renaissance hermeticists and practitioners of spiritual alchemy to the emergence of Rosicrucianism and Christian theosophy in the seventeenth century and from post enlightenment aspects of Romanticism and occultism to the present day New Age movement

Nature in the Middle Ages and the Early Modern Times Albrecht Classen,2024-07-01 The study of pre modern anthropology requires the close examination of the relationship between nature and human society which has been both precarious and threatening as well as productive soothing inviting and pleasurable Much depends on the specific circumstances as the works by philosophers theologians poets artists and medical practitioners have regularly demonstrated It would not be good enough as previous scholarship has commonly done to examine simply what the various writers or artists had to say about nature While modern scientists consider just the hard core data of the objective world cultural historians and literary scholars endeavor to comprehend the deeper meaning of the concept of nature presented by countless writers and artists Only when we have a good grasp of the interactions between people and their natural environment are we in a position to identify and interpret mental structures social and economic relationships medical and scientific concepts of human health and the messages about all existence as depicted in major art works In light of the current conditions threatening to bring upon us a global crisis it matters centrally to take into consideration pre modern discourses on nature and its enormous powers to understand the topoi and tropes determining the concepts through which we perceive nature Nature thus proves to be a force far beyond all human comprehensibility being both material and spiritual depending on our critical approaches

The Macabresque Edward Weisband, 2017-10-05 Studies of genocide and mass atrocity most often focus on their causes and consequences their aims and effects and the number of people killed But the question remains if the main goal is death then why is torture necessary This book argues that genocide and mass atrocity are committed not as an end in themselves but as a means to pursue sustained and systemic torture the spectacle of violence against its victims Extermination is not the only or even the primary goal of genocidal campaigns In The Macabresque Edward Weisband looks at different episodes of mass violence Chinese Cultural Revolution the Holocaust post Ottoman Turkey Cambodia Rwanda and Bosnia among other instances to consider why different methods of violence were used in each and how they related to the particular cultural milieu in which they were perpetrated He asserts that it is not accidental that certain images capture our memory as emblematic of specific genocides or mass atrocities the death marches of the Armenian genocide mass starvation in the Ukraine the killing apparatus and laboratories of the Holocaust the killing fields of Cambodia because such violence assumes a kind of style each time and place it arises Weisband looks at these variations in terms of their aesthetic or dramaturgical style or what he calls the macabresque The macabresque is ever present in genocide and mass atrocity across time place and episode Beyond the horrors of lethality it is the defining feature of concentration and or death camps detention centers prisons ghettos killing fields and the houses schools and hospitals converted into hubs for torture Macabresque dramaturgy also assumes many aesthetic forms all designed to inflict hideous pain and humiliating punishments sometimes in controlled environments but also during frenzied moments of staged public horror These kinds of performative violations permit perpetrators to revel in their absolute power but simultaneously to project hatred revenge and revulsion onto victims who embody the shame humiliation and loss felt by their torturers By understanding how and why mass violence occurs and the reasons for its variations The Macabresque aims to explain why so many seemingly normal or ordinary people participate in mass atrocity across cultures and why such egregious violence occurs repeatedly through history

The Formation of Arab Reason Mohammed Abed Al-Jabri, 2011-01-05 Since the earliest period of Islamic history Arab thought has been dominated by a reverence for tradition and textual analysis In this groundbreaking work the great contemporary Arab philosopher Mohammed Abed Al Jabiri seeks to chart a route towards modernity via the proposition that respect for textualism and tradition are not inconsistent with rationalism and that both history and philosophy are key to the evolution of knowledge

systems and ways of reasoning in Arab culture This book has been an enormous influence within the Arab world on the Islam and Modernity discourse It is published here for the first time in English and provides a fascinating insight into the currents of contemporary Arab thought

Keats, Hermeticism, and the Secret Societies Jennifer N. Wunder, 2016-04-22 Jennifer Wunder makes a strong case for the importance of hermeticism and the secret societies to an understanding of John Keats's poetry and his speculations about religious and philosophical questions Although secret societies exercised enormous cultural influence during the late eighteenth and early nineteenth centuries they have received little attention from Romantic scholars And yet information about the societies permeated all aspects of Romantic culture Groups such as the Rosicrucians and the Freemasons fascinated the reading public and the market was flooded with articles pamphlets and books that discussed the societies's goals and hermetic philosophies debated their influence and drew on their mythologies for literary inspiration Wunder recovers the common knowledge about the societies and offers readers a first look at the role they played in the writings of Romantic authors in general and Keats in particular She argues that Keats was aware of the information available about the secret societies and employed hermetic terminology and imagery associated with these groups throughout his career As she traces the influence of these secret societies on Keats's poetry and letters she offers readers a new perspective not only on Keats's writings but also on scholarship treating his religious and philosophical beliefs While scholars have tended either to consider Keats's aesthetic and religious speculations on their own terms or to adopt a more historical approach that rejects an emphasis on the spiritual for a materialist interpretation Wunder offers us a middle way Restoring Keats to a milieu characterized by simultaneously worldly and mythological propensities she helps to explain if not fully reconcile the insights of both camps

Community Building Leonard Jason, 1997-07-23 This work is a description of vulnerabilities that help account for many of the serious problems facing contemporary society in industrialized countries including high rates of crime homelessness alcohol tobacco and other drug addictions and a breakdown of the psychological sense of community Historical philosophical and epistemological issues are also explored in this book as a foundation for understanding what appears to have gone wrong Several solutions are suggested borrowing heavily from the fields of education religion and mythology Several wisdom traditions are presented as illustrations of alternative conceptualizations for defining mental

health along with discussion of the implications of borrowing from these models to set new directions for the helping fields. The final chapters provide examples from communities of healing to successful community based interventions of how these elements promote human well being and social improvement today.
