The Story of Life in 10 1/2 Species Marianne Taylor,2020-10-20 Souvenirs of the planet Ten and a half life forms each of which explains a key aspect of life on Earth If an alien visitor were to collect ten souvenir life forms to represent life on earth which would they be This is the thought provoking premise of Marianne Taylor s The Story of Life in 10 and a Half Species Each life forms explains a key aspect about life on Earth From the sponge that seems to be a plant but is really an animal to the almost extinct soft shelled turtle deemed extremely unique and therefore extremely precious these examples reveal how life itself is arranged across time and space and how humanity increasingly dominates that vision Taylor a prolific science writer considers the chemistry of a green plant and ponders the possibility of life beyond our world investigates the virus in an attempt to determine what a life form is and wonders if the human a distinct and very dominant species with an inevitably biased view of life could evolve in a new direction She tells us that the giraffe was one species but is now four that the dusky seaside sparrow may be revived through re evolution or cloning explains the significance of Darwin s finch to evolution and much more The half species is artificial intelligence Itself an experiment to understand and model life AI is central to our future although from the alien visitor s standpoint unlikely to inherit the earth in the long run **Media Science before**

the Great War Peter Broks,1997-01-12 The rise of the mass media and professional science makes the years before the Great War an important formative period in the history of popular science Peter Broks explores the magazines of the time and uncovers the scientist as hero and villain science for and against religion animal biographies and a new empathy with nature technology as evolutionary progress utopian visions and degenerationst fears Through this cultural analysis of popular science he shows how Victorian hopes turned into Edwardian disillusion **Imperialism and the natural world** John M.

MacKenzie,2017-03-01 Imperial power both formal and informal and research in the natural sciences were closely dependent in the nineteenth century This book examines a portion of the mass produced juvenile literature focusing on the cluster of ideas connected with Britain's role in the maintenance of order and the spread of civilization It discusses the political economy of Western ecological systems and the consequences of their extension to the colonial periphery particularly in forms of forest conservation Progress and consumerism were major constituents of the consensus that helped stabilise the late Victorian society but consumerism only works if it can deliver the goods From 1842 onwards almost all major episodes of coordinated popular resistance to colonial rule in India were preceded by phases of vigorous resistance to colonial forest control By the late 1840s a limited number of professional positions were available for geologists in British imperial service but imperial geology had a longer pedigree Modern imperialism or municipal imperialism offers a broader framework for understanding the origins long duration and persistent support for overseas expansion which transcended the rise and fall of cabinets or international realignments in the 1800s Although medical scientists began to discern and control the microbiological causes of tropical ills after the mid nineteenth century the claims for climatic causation did not undergo a corresponding decline Arthur Pearson's Pearson's Magazine was patriotic militaristic and devoted to royalty The book explores how science emerged as an important feature of the development policies of the Colonial Office CO of the colonial empire
