The Height Of The Sky:

How High is the Sky? Su Jun Wei,2021-08-30 From sea level to outer space there is about 100 000 meters in height This section is what we usually call the sky The height range that ordinary humans move within daily is usually limited to less than 100 meters Compared to the highest mountain of 8 848 meters on earth and the sky which is 100 000 meters we humans technically move on a plane Even with human footprints all over the world the understanding and use of the sky is less than 0.1% Even when we are on an airplane we merely quickly pass through about 10% Gazing at and exploring the sky are our next goals Now follow our lead to explore this mysterious realm First of all let's start from 1 meter above sea level

Lights in the Sky Michael Maunder, 2007-11-07 Many lights and other objects in the sky go unrecognised or at least are little understood by those observing them Such things range from the commonplace like rainbows and meteors to the

distinctly unusual like the green flash and ball lightning And there is still a residuum of objects that remain unidentified by the watcher classed generally as UFOs a description which today has connotations of the mysterious even of extraterrestrial visitors The first part of this book is an identification guide very much like the plant identifier sections found in a good gardening or botany book It allows quick and structured identification of known aerial phenomena whether at night or during the day The objects thus found are referenced to the second part of the book The second part gives a full description physical explanation and where relevant notes on observing and photographing the various phenomena Some will need optical aids such as binoculars or telescopes but the main thrust of the book is identification and explanation rather than imaging The final chapter approaches UFOs from a scientific standpoint particularly the way in which human perception and often preconception affects the outcome It does however finish with a short section on extraterrestrial UFOs emphasising the burden of proof aspect and touching on the scientific theories of life on other worlds and the improbability of visitors
