Fork explores northwest California's magnificent Klamath Mountains a region that boasts a remarkable biodiversity a terrain
so rugged that significant landscape features are still being discovered there and a wealth of natural resources that have
been used and more recently abused by humans for millennia James K. Agee a forest ecologist with more than fifty years
experience in the Klamaths provides a multidimensional perspective on this region and asks how can we most effectively
steward this spectacular landscape toward a sustainable future In an engaging narrative laced with personal anecdotes he
introduces the dynamics of the Klamath's ecosystems including its geology and diverse flora and fauna and then discusses its
native cultures and more recent inhabitants laying out the effects of industries such as logging mining water development
and fishing Assuming that people will continue to have a close tie to the Klamaths Agee introduces the principles of
restoration ecology to offer a vision of how we can responsibly meet the needs of both people and natural organisms
including plants fish and wildlife This debate over the future of the Klamath's rich landscape widens into a provocative
