Some Aspects Of Economic Policy In Tanga:

A Theory of Ideology John R. Nellis, 1972 *Economic Policies for Sustainable Development* Thomas Sterner, 2012-12-06

This book focuses on describing policy instruments in different countries. Its purpose is not only descriptive but also to some extent advocacy. We believe that economic instruments can make an important contribution to an environmentally less disruptive path of development. The design of economic instruments is however a fine art and depends among other things on their political acceptability and this acceptability is of course influenced by experience. It is therefore important to provide information on the use of policy instruments in other countries. Policies are currently developing quite fast and thus a book such as this one can inevitably not capture more than a snapshot view at a single moment of time. We would hope that the book encourages more experimentation with economic instruments and that countries will make a fuller use of the whole arsenal of economic policy instruments. If the book does succeed in this sense then it will soon become dated as policies change but that would be a price well worth paying. The book combines a dozen country monographs together with a few international surveys on particular topics: gasoline pricing, vehicle regulations, acid rain, deforestation and global warming. These papers are intended to illustrate the diversity of policy options available. The actual policies adopted depend on economic as well as ecological conditions. The country studies cover two Western countries and then concentrate on formerly planned and developing countries. They show that economic instruments are still generally thought of as new and innovative.

Putting Tanzania's Hidden Economy to Work, 2008-01-01. Tanzania's annual real economic growth rate has in recent years been between 6 and 7 percent with Gross National Income equivalent to about US 3 40 per person. A hidden economy could potentially have contributed an additional US 1 00 per person. Forestry, fisheries, mining and wildlife make traditional contributions to the economy. Hidden values and untapped potential remain uncounted. Some 582 000 tourists visited Tanzania in 2004 contributing US 7 50 million to export earnings. A recent single shipment of illegal ivory left Tanga valued at US 2 00 million. Commercial fishing fleets operating **Index Africanus** J. O. Asamani, 1975.
