### **Some British Empiricists In The Social Sciences 1650 1900:**

*Some British Empiricists in the Social Sciences, 1650-1900* Richard Stone, 1997 This book describes the development of economic demographic and social statistics in the British Isles from the mid seventeenth century to the end of the nineteenth as represented by the work of twelve pioneers in these fields Its most distinctive feature is its tables which bring together in clear and succinct form an impressive body of data collected from a large number of disparate sources and are complemented by an exhaustive description of their historical context An important aspect of the book is the short biographies that open each chapter and bring to life the personalities of its central characters

*Some British Empiricists in the Social Sciences, 1650-1900* Richard Stone, 1997 **Ibss: Sociology: 1998** Compiled by the British Library of Political and Social Science, 1999-12-16 Renowned for its international coverage and rigorous selection procedures this series provides the most comprehensive and scholarly bibliographic service available in the social sciences Arranged by topic and indexed by author subject and place name each bibliography lists and annotates the most important works published in its field during the year of 1997 including hard to locate journal articles Each volume also includes a complete list of the periodicals consulted

**The Orders of Knighthood and the Formation of the British Honours System, 1660-1760** Antti Matikkala, 2008 Sheds considerable new light on the nature development and functions of the orders in a key phase of their history and goes a long way to explaining how such archaic institutions could flourish in a culture that is commonly thought anti traditional and especially hostile to the middle ages Professor JONATHAN BOULTON University of Notre Dame This is the first comprehensive study to set the British orders of knighthood properly into the context of the honours system by analysing their political social and cultural functions from the Restoration of the monarchy to the end of George II s reign It examines the revival of the Order of the Garter and the proposals to establish the Orders of the Royal Oak and the Esquires of the Martyred King at the Restoration the foundation 1687 and the revival 1703 4 of the Order of the Thistle as well as the foundation of the Order of the Bath 1725 It establishes just how central a part the orders played in the British high political life and its comprehensive and multidimensional approach carefully contrasts the idealistic discourse of virtue and honour to the real workings of the honours system it also makes the case for the Chivalric Enlightenment The orders over the water the Garter and the Thistle conferred by the Jacobite claimants are discussed for the first time in the context of the established British honours system Overall the comparison between the socially very restricted British and the increasingly meritocratic Continental orders highlights the isolation of the British honours system from the European tendencies
