Something Is Happening:

Something's Happening Here Mark Berger, 2019-03-25 The meadow outside Bethel New York is eerily empty and silent Yesterday it held half a million cheering people and only a few hours ago the closer Jimi Hendrix recast the Star Spangled Banner as a firestorm in the Mekong Delta Mark Berger's been here the whole time Arriving four days early he helped set up kitchens and paths During the festival he worked to calm kids tripping out on bad acid maneuvered a water truck through a sea of spectators and fell in love twice Woodstock was the sixties condensed into seventy two hours and proof that peace and love could turn a potential disaster into a mythic celebration of life Now it's decision time Does he drop out and move to a commune in New Mexico or return to Brooklyn and become a teacher *Something's Happening Here* begins in Brooklyn eight years earlier in 1961 where Berger determined to be true to himself pledges to live his life boldly With buddies like Zooby Bird and Spider he experiences the thrilling fear of joy rides and the roller coaster of mind altering drugs He's swept up in the energy of revolutionary writers and musicians and connects with the counterculture's spirit Scenes abound from catching the Coasters at a Brooklyn R B club to digging Allen Ginsberg reading his poetry in a Tennessee steak house to having only a second to talk his way out of being sent to Vietnam At Woodstock it all comes together who he is what he believes and which path he has to take Berger's vivid storytelling brings the moments to life with an immediacy that show you why something's happening here

Experience, Evidence, and Sense Anna Wierzbicka, 2010-06-24 This book is based on two ideas first that any language English no less than any other represents a universe of meaning shaped by the history and experience of the men and women who have created it and second that in any language certain culture specific words act as linchpins for whole networks of meanings and that penetrating the meanings of those key words can therefore open our eyes to an entire cultural universe In this book Anna Wierzbicka demonstrates that three uniquely English words evidence experience and sense are exactly such linchpins Using a rigorous plain language approach to meaning analysis she unpacks the dense cultural meanings of these key words disentangles their multiple meanings and traces their origins back to the tradition of British empiricism In so doing she reveals much about cultural attitudes embedded not only in British and

American English but also English as a global language An interdisciplinary work Experience Evidence and Sense will be of interest to both scholars and students in linguistics and English as well as historians of ideas sociologists anthropologists literary scholars and scholars of communication The Making of Americans - Gertrude Stein Gertrude Stein,2025-03-03

The Making of Americans by Gertrude Stein is an experimental modernist novel that explores themes of identity history and the nature of American culture The novel presents a detailed and repetitive narrative about the lives of the Dehning and Hersland families using an unconventional stream of consciousness style that reflects Stein s interest in linguistic rhythm and psychological depth Through this fragmented and abstract approach Stein examines the ways in which individuals and families evolve over generations capturing the essence of human behavior and societal change Since its publication The Making of Americans has been recognized as a groundbreaking work in modernist literature challenging traditional narrative structures and redefining the novel s form Its emphasis on repetition variation and observation creates a unique reading experience that mirrors the process of memory and perception Though complex and demanding the novel has been influential in literary circles inspiring later experimental writers The novel s enduring significance lies in its ambitious attempt to chronicle the American experience through language and structure rather than conventional plot The Making of Americans remains a landmark of literary innovation offering readers a profound meditation on identity transformation and the fluidity of personal and collective history *FCS Mathematical Literacy L4* ,2009 Introductory Statistics for the Health Sciences Lise DeShea,Larry E. Toothaker,2015-03-25

Slips of the Mind Jennifer Soong, 2025-04-07 An audacious account of what happens when forgetting becomes a way of writing and writing becomes a way of forgetting In Slips of the Mind poet and critic Jennifer Soong turns away from forgetting s long standing associations with suppression privation and error to argue that the absence or failure of memory has often functioned as a generative creative principle Exploring forgetting not as the mere rejection of a literary past or a form of negative poetics Soong puts to the test its very aesthetic meaning What new structures forms of desires styles and long and short feelings do lapses in time allow What is oblivion s relationship to composition And how does the twentieth century poet come to figure as the quintessential embodiment of such questions Soong uncovers forgetting s influence on Gertrude Stein Lyn Hejinian Tan Lin Harryette Mullen Lissa Wolsak and New York School poets John Ashbery James Schuyler Bernadette Mayer and Ted Berrigan among others She reveals that forgetting s shapeshifting produces differences in poetic genre interest and degrees of intentionality and that such malleability is part of forgetting s nature Most provocatively Soong shows how losing track of things leaving them behind or finding them already gone resists overdetermination and causality in the name of surprise as

poets leverage forgetting in order to replace identity with style Slips of the Mind is the kind of literary criticism that will reward all readers of modern and contemporary poetry **A Basic Theory of Everything** Atle Ottesen Søvik,2022-04-04 What are the basic building blocks of the world This book presents a naturalistic theory saying that the universe and everything in it can be reduced to three fundamental entities a field a set of values that can be actualized at different places in the field and an actualizer of the values The theory is defended by using it to answer the main questions in metaphysics such as What is causality existence laws of nature consciousness thinking free will time mathematical entities ethical values etc The theory is compared with the main alternatives and argued to solve problems better than the existing theories Several new theories are suggested such as how to understand mental causation free will and the truth of ethics and mathematics
