*Producing Power* Sonja D. Schmid, 2015-02-13 An examination of how the technical choices social hierarchies economic structures and political dynamics shaped the Soviet nuclear industry leading up to Chernobyl The Chernobyl disaster has been variously ascribed to human error reactor design flaws and industry mismanagement Six former Chernobyl employees were convicted of criminal negligence they defended themselves by pointing to reactor design issues Other observers blamed the Soviet style of ideologically driven economic and industrial management In *Producing Power* Sonja Schmid draws on interviews with veterans of the Soviet nuclear industry and extensive research in Russian archives as she examines these alternate accounts Rather than pursue one definitive explanation she investigates how each of these narratives makes sense in its own way and demonstrates that each implies adherence to a particular set of ideas about high risk technologies human machine interactions organizational methods for ensuring safety and productivity and even about the legitimacy of the Soviet state She also shows how these attitudes shaped and were shaped by the Soviet nuclear industry from its very beginnings Schmid explains that Soviet experts established nuclear power as a driving force of social not just technical progress She examines the Soviet nuclear industry's dual origins in weapons and electrification programs and she traces the emergence of nuclear power experts as a professional community Schmid also fundamentally reassesses the design choices for nuclear power reactors in the shadow of the Cold War's arms race Schmid's account helps us understand how and why a complex sociotechnical system broke down Chernobyl while unique and specific to the Soviet experience can also provide valuable lessons for contemporary nuclear projects

*The Cambridge History of Communism: Volume 3, Endgames? Late Communism in Global Perspective, 1968 to the Present* Juliane Fürst, Silvio Pons, Mark Selden, 2017-09-21 The third volume of *The Cambridge History of Communism* spans the period from the 1960s to the present documenting the last two decades of the global Cold War and the collapse of Soviet socialism An international team of scholars analyze the rise of China as a global power continuing to proclaim its Maoist allegiance and the transformation of the geopolitics and political economy of Cold War conflict in an era of increasing economic interpenetration Beneath the surface profound political social economic and cultural changes were occurring in the socialist and former socialist countries resulting in the collapse and transformations of the existing socialist order and the changing parameters of world Marxism This volume draws on innovative research to bring together history from above and below including social cultural gender and transnational history to transcend the old separation between Communist studies and the broader field of contemporary history

[The World of Andrei Sakharov](#) Gennady Gorelik, Antonina W. Bouis, 2005-04-14 How did Andrei Sakharov a theoretical physicist and the acknowledged father of the Soviet hydrogen bomb become a human rights activist and the first Russian to win the Nobel Peace Prize In his later years Sakharov noted in his diary that he was simply a man with an unusual fate To understand this deceptively straightforward statement by an extraordinary man The World of Andrei Sakharov the first authoritative study of Andrei Sakharov as a scientist as well as a public figure relies on previously inaccessible documents recently declassified archives and personal accounts by Sakharov's friends and colleagues to examine the real context of Sakharov's life In the course of doing so Gennady Gorelik answers a fascinating question whether the Soviet hydrogen bomb was really fathered by Sakharov or whether it was based on stolen American secrets Gorelik concludes that while espionage did initiate the Soviet effort the Russian hydrogen bomb was invented independently Gorelik also elucidates the reasons that brought about the seemingly sudden transformation of the top secret physicist into a public figure in 1968 when Sakharov's famous essay Progress Peaceful Coexistence and Intellectual Freedom was distributed in samizdat in the USSR and smuggled out to the West Recently declassified documents show that Sakharov's metamorphosis was caused by professional concerns particularly regarding the development of an anti ballistic missile defense An insider's view of how the upper echelons of the Soviet regime functioned had led Sakharov to the conclusion that the goals of peace progress and human rights were inextricably linked His free thinking and free feeling were manifested in his hope that scientific thought and religious perception would find a profound synthesis in the future
