St Xavier's The Making Of A Calcutta Institution:

St. Xavier's, the Making of a Calcutta Institution Udayan Namboodiry, 1995 **Synthesizing the Vedanta** Sean Doyle, Sean M. Doyle, 2006 Fr Pierre Johanns is a key figure in the history of Christian intellectual engagement with Hindu philosophy. He was the most articulate figure in a group of Belgian Jesuits in Calcutta who sought to develop the theological project initiated by Brahmanabandhab Upadhyay, a convert to Catholicism whose theology conveyed a positive appreciation of aspects of Hindu Advaitic philosophy. Johanns began to publish a steady stream of articles in the monthly *Light of the East* that analysed pertinent features of Vedantic thought from the perspective of his neo-Thomistic presuppositions. Johanns engaged in a thorough explication and analysis of the thinking of the Hindu teachers Sankara Ramanuja and Vallabha. He attempted to fashion a creative synthesis of their views, constructing a new holistic metaphysic from the raw material of their respective philosophical theologies. This book examines the theological writings of Pierre Johanns by situating him within his historical context, by discussing how Johanns interacted with Vedantic philosophy and by assessing the success of his project.

Somaditya Banerjee, 2020-05-14. This monograph offers a cultural history of the development of physics in India during the first half of the twentieth century, focusing on Indian physicists Satyendranath Bose (1894-1974), Chandrasekhara Venkata Raman (1888-1970), and Meghnad Saha (1893-1956). The analytical category *bhadralok* physics is

introduced to explore how it became possible for a highly successful brand of modern science to develop in a country that was still under colonial domination. The term *Bhadralok* refers to the then emerging group of native intelligentsia who were identified by academic pursuits and manners. Exploring the forms of life of this social group allows a better understanding of the specific character of Indian modernity, that as exemplified by the work of *bhadralok* physicists combined modern science with indigenous knowledge in an original program of scientific research. The three scientists achieved the most significant scientific successes in the new revolutionary field of quantum physics with such internationally recognized accomplishments as the Saha ionization equation (1921), the famous Bose-Einstein statistics (1924), and the Raman Effect (1928), the latter discovery having led to the first ever Nobel Prize awarded to a scientist from Asia. This book analyzes the responses by Indian scientists to the radical concept of the light quantum and their further development of this approach outside the purview of European authorities. The outlook of *bhadralok* physicists is characterized here as cosmopolitan nationalism, which allows us to analyze

how the group pursued modern science in conjunction with and as an instrument of Indian national liberation
