Contemporary Ideas on Ship Stability Vadim L.

Belenky, Kostas J. Spyrou, Frans van Walree, Marcelo Almeida Santos Neves, Naoya Umeda, 2019-01-01 This book contains a selection of research papers presented at the 11th and 12th International Ship Stability Workshops Wageningen 2010 and Washington DC 2011 and the 11th International Conference on Stability of Ships and Ocean Vehicles Athens 2012 The book is directed toward the ship stability community and presents innovative ideas concerning the understanding of the physical nature of stability failures and methodologies for assessing ship stability Particular interest of the readership is expected in relation with appearance of new and unconventional types of ships assessment of stability of these ships cannot rely on the existing experience and has to be based on the first principles As the complexity of the physical processes responsible for stability failure have increasingly made time domain numerical simulation the main tool for stability assessment particular emphasis is made on the development an application of such tools The included papers have been selected by the editorial committee and have gone through an additional review process with at least two reviewers allocated for each Many of the papers have been significantly updated or expanded from their original version in order to best reflect the state of knowledge concerning stability at the time of the book s publication The book consist of four parts Mathematical Model of Ship Motions in Waves Dynamics of Large Motions Experimental Research and Requirements Regulations and Operations
