Kenneth Pomeranz

The Great Divergence China Europe And The Making Of The Modern World Economy:

The Great Divergence Kenneth Pomeranz, 2000 This made Europe's failure to use its land intensively much less of a problem while allowing growth in energy intensive industries Another crucial difference that he notes has to do with trade Fortuitous global conjunctures made the Americas a greater source of needed primary products for Europe than any Asian periphery This allowed Northwest Europe to grow dramatically in population specialize further in manufactures and remove labor from the land using increased imports rather than maximizing yields Together coal and the New World allowed Europe to grow along resource intensive labor saving paths Meanwhile Asia hit a cul de sac Although the East Asian hinterlands boomed after 1750 both in population and in manufacturing this growth prevented these peripheral regions from exporting vital resources to the cloth producing Yangzi Delta

The Great Divergence Kenneth Pomeranz, 2009

The Great Divergence Kenneth Pomeranz, 2000 Why did sustained industrial growth begin in Northwest Europe despite surprising similarities between advanced areas of Europe and East Asia Pomeranz argues that Europe's nineteenth century divergence from the Old World owes much to the fortunate location of coal which substituted for timber This made Europe's failure to use its land intensively much less of a problem while allowing growth in energy intensive industries Another crucial difference that he notes has to do with trade Fortuitous global conjunctures made the Americas a greater source of needed primary products for Europe than any Asian periphery This allowed Northwest Europe to grow dramatically in population specialize further in manufactures and remove labor from the land using increased imports rather than maximizing yields Together coal and the New World allowed Europe to grow along resource intensive labor saving paths

Ingram, James M. Vaughn, 2025-01-28 Charts the emergence and development of capitalism across the world from a variety of perspectives providing a deep understanding of how capitalism came to be the dominant economic force This book re examines the historical emergence and evolution of capitalism Why did a radically new way of organizing economic life emerge in regions of the early modern world Why did it eventually encompass the globe tying the peoples of the world together in a common economic fate These questions have been at the heart of historical and social scientific inquiry since the nineteenth century They are explored and answered anew by the scholars gathered together in this geographically and theoretically capacious volume The chapters explore the emergence and development of capitalism in Africa Western Europe Eastern Europe South Asia East Asia North America and the Atlantic world and they engage with many of the major intellectual approaches for understanding capitalism from the New Institutional Economics to world systems theory The authors share a common commitment but not a common approach to understanding the historical development of capitalism They believe that the emergence and evolution of capitalism must be understood by examining the concrete conditions of socioeconomic life in a particular country empire or region and that such empirically and archivally driven historical analysis must be combined with theoretical discussion of the concepts and categories used to make sense of capitalism and its dynamics This work offers different accounts of capitalist development across and within major regions of the world It is a histories of rather than a history of capitalism As such it introduces readers to new historical research on capitalist development in different regional and national contexts and to several significant intellectual approaches for understanding what Max Weber called the most fateful force of our modern life

Marjolein 't Hart, Manon van der Heijden, Karel Davids, Lex Heerma van Voss, Leo Lucassen, Jeroen Touwen, 2023-01-26 This is the first book to examine the history of the country in a way that connects global processes to local developments Taking account of social political and economic dynamics over the last thousand years the book addresses key questions that get to the heart of the Netherlands role in the world both historically and in more recent times Why did the West become such a significant actor in the world and what part did the Netherlands play What were the driving forces in state formation and in what respects and why did the Netherlands take a different path to most of Europe How did globalisation impact economic structures and socio cultural life and how did the Netherlands react to these new challenges How did this very Christian and bourgeois nation develop into a flagship for liberal tolerance The book carefully balances a wider investigation of these issues with close inspections of how ordinary people experienced the changes they prompted It also provide a convincing judicious assessment of the ebbs and flows of this small country s global influence over time prominent as a Golden Age economic powerhouse colonial power and bastion of political freedom in some eras and yet impotent on the world stage at others Supplemented with 35 images 10 maps a wealth of text boxes charts and tables as well as a companion website this book is the definitive history of the Netherlands in a global context **Burdens of Freedom** Lawrence M. Mead, 2019-04-23

Burdens of Freedom presents a new and radical interpretation of America and its challenges The United States is an individualist society where most people seek to realize personal goals and values out in the world This unusual inner driven culture was the chief reason why first Europe then Britain and finally America came to lead the world But today our deepest problems derive from groups and nations that reflect the more passive deferential temperament of the non West The long term poor and many immigrants have difficulties assimilating in America mainly because they are less inner driven than the norm Abroad the United States faces challenges from Asia which is collective minded and also from many poorly governed countries in the developing world The chief threat to American leadership is no longer foreign rivals like China but the decay of individualism within our own society The great divide is between the individualist West for which life is a project and the rest of the world in which most people seek to survive rather than achieve This difference although clear in research on world cultures has been ignored in virtually all previous scholarship on American power and public policy both at home and abroad Burdens of Freedom is the first book to recognize that difference It casts new light on America s greatest struggles It re evaluates the entire Western tradition which took individualism for granted How to respond to cultural difference is the greatest test of our times **What is Gender History?** Sonya O.
