Hourly History

The Great Famine:

The Great Irish Potato Famine James S Donnelly, 2002-11-01 In the century before the great famine of the late 1840s the Irish people and the poor especially became increasingly dependent on the potato for their food So when potato blight struck causing the tubers to rot in the ground they suffered a grievous loss Thus began a catastrophe in which approximately one million people lost their lives and many more left Ireland for North America changing the country forever During and after this terrible human crisis the British government was bitterly accused of not averting the disaster or offering enough aid Some even believed that the Whig government's policies were tantamount to genocide against the Irish population James Donnelly's account looks closely at the political and social consequences of the great Irish potato famine and explores the way that natural disasters and government responses to them can alter the destiny of nations [The Great Irish Famine](#) Cormac Ó'Gráda, Economic History Society, 1995-09-28 The Irish Famine of 1846-50 was one of the great disasters of the nineteenth century whose notoriety spreads as far as the mass emigration which followed it Cormac O'Grada's concise survey suggests that a proper understanding of the disaster requires an analysis of the Irish economy before the invasion of the potato killing fungus *Phytophthora infestans* highlighting Irish poverty and the importance of the potato but also finding signs of economic progress before the Famine Despite the massive decline in availability of food the huge death toll of one million from a population of 8.5 million was hardly inevitable there are grounds for supporting the view that a less doctrinaire attitude to famine relief would have saved many lives This book provides an up to date introduction by a leading expert to an event of major importance in the history of nineteenth century Ireland and Britain [The Great Famine](#) John Percival, 1995 Discusses the potato famine that struck Ireland in 1845 resulting in the starvation deaths of over a million Irish citizens the displacement of thousands and the immigration of over one million to America and Australia **The Great Famine** Robert Dudley Edwards, 1957 [The Great Famine](#) Ciarán Ó Murchadha, 2011-08-04 An engaging and moving account of this most destructive event in Irish history [The Great Famine](#) John Gibney, 2018 The Irish potato famine of the 1840s the Great Famine or An gorta mór is one of the defining events in modern Irish history Over a five year period a population of 8.2 million was reduced to 6.5 million through starvation disease and emigration The famine permanently changed one of the constituent parts of the United Kingdom as it then stood and its legacies of depopulation socio economic and cultural change political resentment and the expansion through mass emigration of an Irish diaspora in Britain North America and the British Empire still have a resonance today Now in the first installment of a new collaboration between Pen and Sword and History Ireland magazine some of the world's leading experts on the Great Famine explore the crisis from a range of perspectives From the importance of the potato in Irish history to food exports political change the provision of charity the impact of disease the role of the authorities the experience of emigration and the changing interpretation of the famine this volume explores how this seminal event in Irish British and world history still has a relevance to the globalised world of the twenty

first century **The Great Famine** Hourly History,2019-06-11 The Great Famine The Great Famine which afflicted Ireland from 1845 to 1849 was one of the most catastrophic events in Europe during the nineteenth century More than one quarter of the population of Ireland died of starvation or associated disease or were forced to emigrate Ireland after the famine was a completely different country in many ways The direct causes of the famine are simple to understand a large part of the population of Ireland mainly the poorest families had become completely dependent on the potato as a source of food In 1845 the blight appeared a disease which affected the potato crop Successive failures of the potato crop in Ireland led to more than one million people dying as a direct result What is less easy to understand is why this famine was confined to Ireland and why the British government did not do more to help The potato blight affected parts of Great Britain and other countries in Europe but nowhere else did it lead to famine For much of the famine food continued to be exported from Ireland and at its height there was food stored in warehouses which could have been used to alleviate the suffering of the starving that it was not represents at the very least a complete failure of understanding on the part of the British government Inside you will read about Farming in Ireland The Blight Arrives Full blown Famine Mass Emigration Poor Laws Revolt and the Return of the Blight Aftermath and Legacy And much more The Great Famine left a legacy of distrust and animosity between large segments of the population of Ireland and Great Britain and this in part led to the movements which finally produced Irish independence The famine also left a deep impression on the psyche of the people of Eire and even today Ireland remains at the forefront of international famine relief This is the story of the Irish Potato Famine **The Great Famine** Charles River Charles River Editors,2016-07-12 Includes pictures Includes accounts of the famine by Irishmen who suffered through it Includes online resources and a bibliography for further reading Includes a table of contents I have called it an artificial famine that is to say it was a famine which desolated a rich and fertile island that produced every year abundance and superabundance to sustain all her people and many more The English indeed call the famine a dispensation of Providence and ascribe it entirely to the blight on potatoes But potatoes failed in like manner all over Europe yet there was no famine save in Ireland John Mitchel Young Ireland Movement Anyone who has ever heard of the luck of the Irish knows that it is not something to wish on someone for few people in the British Isles have ever suffered as the Irish have As one commissioner looking into the situation in Ireland wrote in February 1845 It would be impossible adequately to describe the privations which they habitually and silently endure in many districts their only food is the potato their only beverage water their cabins are seldom a protection against the weather a bed or a blanket is a rare luxury and nearly in all their pig and a manure heap constitute their only property Even his fellow commissioners agreed and expressed our strong sense of the patient endurance which the laboring classes have exhibited under sufferings greater we believe than the people of any other country in Europe have to sustain Still in their long history of suffering nothing was ever so terrible as what the Irish endured during the Great Potato Famine that struck the country in the 1840s and produced massive upheaval for several years While countless

numbers of Irish starved the famine also compelled many to leave and all the while the British were exporting enough food from Ireland on a daily basis to prevent the starvation Over the course of 10 years the population of Ireland decreased by about 1.5 million people and taken together these facts have led to charges as severe as genocide At the least it indicated a British desire to remake Ireland in a new mold As historian Christine Kinealy noted As the Famine progressed it became apparent that the government was using its information not merely to help it formulate its relief policies but also as an opportunity to facilitate various long desired changes within Ireland These included population control and the consolidation of property through various means including emigration Despite the overwhelming evidence of prolonged distress caused by successive years of potato blight the underlying philosophy of the relief efforts was that they should be kept to a minimalist level in fact they actually decreased as the Famine progressed Although the Famine obviously weakened Ireland and its people it also stiffened Irish resolve and helped propel independence movements in its wake By the time the Famine was over it had changed the face of not just Ireland but also Great Britain and it had even made its effects felt across the Atlantic in the still young United States of America The Great Famine The History of the Irish Potato Famine during the Mid 19th Century looks at the history of the notorious famine and its results Along with pictures and a bibliography you will learn about the Irish Potato Famine like never before in no time at all **The Great Irish Famine** Christine Kinealy, 2017-03-14

The Great Irish Famine of 1845-51 was both one of the most lethal famines in modern history and a watershed in the development of modern Ireland This book based on a wide range of little used sources demonstrates how the Famine profoundly affected many aspects of Irish life the relationship between the churches the nationalist movement and the relationship with the monarchy In addition to looking at the role of the government Kinealy shows the importance of private charity in saving lives One of the most challenging aspects of the publication is the chapter on food supply in which Kinealy concludes that despite the potato blight Ireland was still producing enough food to feed its people The long term impact of the tragedy notably the way in which it has been remembered and commemorated is also examined **Ireland's Great Famine and Popular Politics** Enda Delaney, Breandán Mac Suibhne, 2015-11-19 Ireland's Great Famine of 1845-52 was among the most devastating food crises in modern history A country of some eight and a half million people lost one million to hunger and disease and another million to emigration According to land activist Michael Davitt the starving made little or no effort to assert the animal's right to existence passively accepting their fate But the poor did resist In word and deed they defied landlords merchants and agents of the state they rioted for food opposed rent and rate collection challenged the decisions of those controlling relief works and scorned clergymen who attributed their suffering to the Almighty The essays collected here examine the full range of resistance in the Great Famine and illuminate how the crisis itself transformed popular politics Contributors include distinguished scholars of modern Ireland and emerging historians and critics This book is essential reading for students of modern Ireland and the global history of collective action
