**The Science and Archaeology of Materials** Julian Henderson, 2013-04-15 The Science and Archaeology of Materials is set to become the definitive work in the archaeology of materials Henderson's highly illustrated work is an accessible and fascinating textbook which will be essential reading for all practical archaeologists With clear sections on a wide range of materials including ceramics glass metals and stone this work examines the very foundations of archaeological study Anyone interested in ancient technologies especially those involving high temperatures kilns and furnaces will be able to follow in each chapter how raw materials are refined transformed and shaped into objects This description is then followed by appropriate case studies which provide a new chronological and geographical example of how scientific and archaeological aspects can and do interact They include Roman pale green and highly decorated glass 17th Century glass in Britain and Europe the effect of the introduction of the wheel on pottery technology the technology of Celadon ceramics early copper metallurgy in the Middle East chemical analysis and lead isotope analysis of British Bronzes early copper alloy metallurgy in Thailand the chemical analysis of obsidian and its distribution the origins of the Stonehenge bluestones This book shows how archaeology and science intersect and feed off each other Modern scientific techniques have provided data which when set within a fully integrated archaeological context have the potential of contributing to mainstream archaeology This holistic approach generates a range of connections which benefits both areas and will enrich archaeological study in the future

**The Iron Age in Northern Britain** Dennis W. Harding, 2017-02-24 The Iron Age in Northern Britain examines the archaeological evidence for earlier Iron Age communities from the southern Pennines to the Northern and Western Isles and the impact of Roman expansion on local populations through to the emergence of historically recorded communities in the post Roman period The text has been comprehensively revised and expanded to include new discoveries and to take account of advanced techniques with many new and updated illustrations The volume presents a comprehensive picture of the long Iron Age allowing readers to appreciate how perceptions of Iron Age societies have changed significantly in recent years New material in this second edition also addresses the key issues of social reconstruction gender and identity as well as assessing the impact of developer funded archaeology on the discipline Drawing on recent excavation and research and interpreting evidence from key studies across Scotland and northern England The Iron Age in Northern Britain continues to be an accessible and authoritative study of later prehistory in the region

**The Handbook of British Archaeology** Lesley Adkins, Roy Adkins, Victoria Leitch, 2017-04-13 For over 25 years The Handbook of British Archaeology has been the foremost guide to archaeological methods artefacts and monuments providing clear explanations of all specialist terms used by archaeologists This completely revised and updated edition is packed with the latest information and now includes the most recent developments in archaeological science Meticulously researched every section has been extensively updated by a team of experts There are chapters devoted to each of the archaeological periods found in Britain as well as two chapters on

techniques and the nature of archaeological remains All the common artefacts types of sites and current theories and methods are covered The growing interest in post medieval and industrial archaeology is fully explored in a brand new section dealing with these crucial periods Hundreds of new illustrations enable instant comparison and identification of objects and monuments from Palaeolithic handaxes to post medieval gravestones Several maps pinpoint the key sites and other features include an extensive bibliography and a detailed index The Handbook of British Archaeology is the most comprehensive resource book available and is essential for anyone with an interest in the subject from field archaeologists and academics to students heritage professionals Time Team followers and amateur enthusiasts *Controlling Colours*

Marlies Hoecherl, 2016-01-22 Colour defines our material world operates as a communication tool and creates meaning This book revisits well known and well documented sites or artefacts and explores their colours and colour connotations by looking at various contexts such as processes landscape iconography body decoration or the colour connotations of death

*Coton Park, Rugby, Warwickshire: A Middle Iron Age Settlement with Copper Alloy Casting* Andy Chapman, 2020-05-28 A total area of 3.1 ha taking in much of a settlement largely of the earlier Middle Iron Age was excavated in 1998 in advance of development The Iron Age settlement comprised several groups of roundhouse ring ditches and associated small enclosures forming an open settlement set alongside a linear boundary ditch *Enclosing Space, Opening New Ground* Tanja

Romankiewicz, Manuel Fernández-Götz, Gary Lock, Olivier Büchsenschütz, 2019-03-31 Enclosures are among the most widely distributed features of the European Iron Age From fortifications to field systems they demarcate territories and settlements sanctuaries and central places burials and ancestral grounds This dividing of the physical and the mental landscape between an inside and an outside is investigated anew in a series of essays by some of the leading scholars on the topic The contributions cover new ground from Scotland to Spain between France and the Eurasian steppe on how concepts and communities were created as well as exploring specific aspects and broader notions of how humans marked bounded and guarded landscapes in order to connect across space and time A recurring theme considers how Iron Age enclosures created curated formed or deconstructed memory and identity and how by enclosing space these communities opened links to an earlier past in order to understand or express their Iron Age presence In this way the contributions examine perspectives that are of wider relevance for related themes in different periods **The Early Anglo-Saxon Kingdoms of Southern**

**Britain AD 450-650** Sue Harrington, Martin Welch, 2014-07-31 The Tribal Hidage attributed to the 7th century records the named groups and polities of early Anglo Saxon England and the taxation tribute due from their lands and surpluses Whilst providing some indication of relative wealth and its distribution rather little can be deduced from the Hidage concerning the underlying economic and social realities of the communities documented Sue Harrington and the late Martin Welch have adopted a new approach to these issues based on archaeological information from 12 000 burials and 28 000 objects of the period AD 450 650 The nature distribution and spatial relationships of settlement and burial evidence are examined over

time against a background of the productive capabilities of the environment in which they are set the availability of raw materials evidence for metalworking and other industrial craft activities and communication and trade routes This has enabled the identification of central areas of wealth that influenced places around them Key within this period was the influence of the Franks who may have driven economic exploitation by building on the pre existing Roman infrastructure of the south east Frankish material culture was as widespread as that of the Kentish people whose wealth is evident in many well furnished graves but more nuanced approaches to wealth distribution are apparent further to the West perhaps due to ongoing interaction with communities who maintained an essentially Romano British way of life

**Rethinking Roundhouses** D. W. Harding, 2023 Of all structural or material remains from later British prehistory roundhouses are probably the most archetypical with a great range of regional variants in terms of ground plans and structural materials used This study rethinks the archaeology of roundhouses based on the latest development led research excavation

**European Prehistory** Sarunas Milisauskas, 2012-12-06 Sarunas Milisauskas

1 1 INTRODUCTION The purpose of this book is four fold to introduce English speaking students and scholars to some of the outstanding archaeological research that has been done in Europe in recent years to integrate this research into an anthropological frame of reference to address episodes of culture change such as the transition to farming the origin of complex societies and the origin of urbanism and to provide an overview of European prehistory from the earliest appearance of humans to the rise of the Roman empire In 1978 the Academic Press published my book European Prehistory which typically for that period emphasized cultural evolution culture process technology environment and economy To produce a new version and an up to date prehistory of Europe I have invited contributions from specialists in the Palaeolithic Mesolithic Bronze and Iron Ages Thus while this version of European Prehistory is a new book however it still incorporates some data

from the 1978 version particularly in The Present Environment and Neolithic chapters Like its predecessor this edition is structured around selected general topics such as technology trade settlement warfare and ritual

Down the Bright Stream: The Prehistory of Woodcock Corner and the Tregurra Valley, Cornwall Sean R. Taylor, 2022-06-23 This volume reports on a series of fieldwork projects carried out in the Tregurra Valley to the east of Truro Cornwall between 2009 2015 The fieldwork led to the identification of a large number of pits and hearths across the site the majority of which that have proved dateable spanning the Early Neolithic to the end of the Early Bronze Age

Defining Spaces in Iron Age Northumberland Josh Gaunt, Claire Christie, Candy Hatherley, 2022-12-01 The Iron Age settlements excavated by Headland Archaeology UK Ltd at Morley Hill and Lower Callerton lie within the rich later prehistoric landscape of the Northumberland coastal plain This monograph presents the results of the excavation specialist analyses and provides a key dataset upon which to discuss regionally and nationally important later prehistoric research themes The excavations at Morley Hill and Lower Callerton offer two large scale new datasets to compare within the corpus of enclosed Iron Age settlement sites across the region allowing for an increased understanding of settlement patterns architectural forms and farming practices These include settlement development longevity and tempo the relationship between lowland and upland sites settlement organization and identity roundhouse architecture and the impact of contact with the Roman world At Morley Hill work revealed two later Iron Age settlements defined by rectilinear enclosures surrounding groups of roundhouses with evidence for earlier phases of activity The settlements at Morley Hill are comparable to many such distinctive settlements identified across the region and explored in recent years largely through developer funded excavations Lower Callerton represents a less explored form of extensive settlement with the excavation revealing evidence of earlier prehistoric activity overlain by a large Iron Age enclosure with over 53 structures multiple sub enclosures and boundaries Comprehensive Bayesian modeling at Lower Callerton has provided a robust chronological framework indicating complex and continual settlement development from the middle Iron Age The implications of this in terms of wider settlement development tempo and longevity are explored While the monograph focuses on the Iron Age the identification and influence of earlier prehistoric activity is also explored The discussion is again enhanced by the program of radiocarbon dating and isotopic analysis of cereal grains from Neolithic pits at Lower Callerton

Dress and Ideology Shoshana-Rose Marzel, Guy D. Stiebel, 2014-12-18 Dress and fashion are powerful visual means of communicating ideology whether political social or religious From the communist values of equality simplicity and solidarity exemplified in the Mao suit to the myriad of fashion protests of feminists such as French revolutionary women s demand to wear trousers dress can symbolize ideological orthodoxy as well as revolt With contributions from a wide range of international scholars this book presents the first scholarly analysis of dress and ideology through accessible case studies Chapters are organized thematically and explore dress in relation to topics including nation identity religion politics and utopias across an impressive chronological reach from antiquity to the present day Dress

Ideology will appeal to students and scholars of fashion history sociology cultural studies politics and gender studies

*Exploring Prehistoric Identity in Europe* Victoria Ginn, Rebecca Enlander, Rebecca Crozier, 2014-03-19 Identity is relational and a construct and is expressed in a myriad of ways For example material culture and its pluralist meanings have been readily manipulated by humans in a prehistoric context in order to construct personal and group identities Artefacts were often from or reminiscent of far flung places and were used to demonstrate membership of an imagined regional or European community Earthworks frequently archive maximum visual impact through elaborate ramparts and entrances with the minimum amount of effort indicating that the construction of identities were as much in the eye of the perceiver as of the perceived Variations in domestic architectural style also demonstrate the malleability of identity and the prolonged intermittent use of particular places for specific functions indicates that the identity of place is just as important in our archaeological understanding as the identity of people By using a wide range of case studies both temporally and spatially these thought processes may be explored further and diachronic and geographic patterns in expressions of identity investigated

**Mortuary Ritual and Society in Bronze Age Cyprus** Priscilla Keswani, 2004 A ground breaking investigation of burial practices and social transformations in the era when Cypriot agricultural communities moved from village to urban life and became major players in the eastern Mediterranean copper trade The author develops an innovative theoretical and methodological approach that enables her to define and elucidate the shifting spatial relationships between tombs and habitation areas the elaboration of rituals involving secondary treatment and collective burial and changing patterns of mortuary expenditure and symbolism throughout the Bronze Age Keswani proposes that during the Early Middle Bronze periods the growing elaboration of mortuary festivities and their crucial importance in negotiating status hierarchies contributed to the intensification of Cypriot copper production and the expansion of interregional exchange relations Subsequent changes in mortuary practice suggest that the importance of collective burial rites and traditional modes of ritual display diminished over the course of the Late Bronze Age as urban institutions multiplied and the bases of social prestige were transformed

**BAR International Series** , 1999 **Eight Human Skulls in a Dung Heap and More** Annet Nieuwhof, 2015-06-30 The study of ritual practice in the past is an accepted part of archaeological research these days Yet its theoretical basis is still not fully mature This book aims at making a contribution to the study of ritual practice in the past by assembling a theoretical framework which is tailored to the needs of archaeology and which helps to identify and interpret the remains of rituals in the past This framework is applied in a special archaeological region the coastal area of the northern Netherlands a former salt marsh area In the past people lived here on artificial dwelling mounds so called terps Preservation conditions are excellent in this wetland area This study makes use of the well preserved remains of rituals in terps to examine the role of ritual practice in the societies of the pre Roman and Roman Iron Age in this area
