**Six Degrees** Mark Lynas,2008 In astonishing and unflinching detail a noted science journalist explains how Earth's climate will be impacted with every degree of increase in global warming and what can be done about it now **Six Degrees: The Science of a Connected Age** Duncan J. Watts,2004-02-17 The pioneering young scientist whose work on the structure of small worlds has triggered an avalanche of interest in networks In this remarkable book Duncan Watts one of the principal architects of network theory sets out to explain the innovative research that he and other scientists are spearheading to create a blueprint of our connected planet Whether they bind computers economies or terrorist organizations networks are everywhere in the real world yet only recently have scientists attempted to explain their mysterious workings From epidemics of disease to outbreaks of market madness from people searching for information to firms surviving crisis and change from the structure of personal relationships to the technological and social choices of entire societies Watts weaves together a network of discoveries across an array of disciplines to tell the story of an explosive new field of knowledge the people who are building it and his own peculiar path in forging this new science *The six degrees of crime; or, Wine, women, gambling, theft, murder and the scaffold [a play]*. Senate,1889 **New York Magazine** ,1993-06-07 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea Massachusetts, Rhode Island, Connecticut Washington Parker Gregg,Benjamin Pond,1851 *Post-Punk Perception* Edmund Wong,2013-07 Growing up in Singapore in the 80s has been challenging I didn't know much about life or economy I didn't know what I want to do apart from playing I know I had to study and get a job In school we had to write composition about our profession when we grow

up I had never wanted to be a philosopher let alone writing about social philosophy It is just that growing up with a single parent is tough It is tougher when she is uneducated and I had to learn most things by myself After my National Service I decided to further studies That was when I was exposed to philosophy and psychology in the UK After graduation in 1999 with a degree in Electronics I came back home to resume my National Service I disrupt it and had about 2 months left The life in UK exposed me to something that I did not notice when growing up in Singapore I find local social scene unsatisfactory They are Confucians Muslims Christians freethinkers and humanists Most time they are preoccupied with how to earn more money Religion does not give me the fulfillment that it promised In addition most were based on Singaporeans interpretation of the Bible and Buddhism s dharma Most times I feel that everything that Singaporeans do has got to do with wealth creation or at least with the expenditure of it It end up like what Pope Francis referred to as the cult of money Organised religion involves more fear mongering than cultivating an inner grace and peace Hence this book is about how I relate an ancient thinker s ethics Aristotle to the present day I find Aristotle s ethics to most suit my needs as a man and lover It does not pretend to be more than what it seek the golden mean It does require us to think and explore the values to find balance and achieve wisdom with intellectual and moral virtues I also find other philosophers French or not particularly insightful and thought provoking They offer me explanation and exploration on subjects like love sex and death Freudian psychoanalysis are also very penetrating in their findings and insights Moreover I needed some contemporary psychological theory not in depth psychoanalysis to back Aristotle s model of ethics intellectual and moral virtues Hence the psychological background of my book I got acquainted with these psychological theories when I was preparing myself to be a financial consultant I later found out more about them and they became useful in my work and life Hence I would like to share it with people in Asia so that they can ask the right kind of questions in life in order to learn more about themselves and the social milieu they are living in Because everyone of us are affected by the social sciences politics economics and sociology This book will I hope allow us to understand why we are irrational and how we can make rational changes through reasonings in their life and achieving eudaimonia My wish is simply to share what I enjoy doing apart from creating useful ideas to improve the world Through my book I hope to make others understand religion science and philosophy and how they play an increasingly integral part in the Asian century
