Lankford, 2007-12-18 A compact engrossing narrative that vividly reimagines the events that led to the outbreak of the Civil War What separates historian Nelson D Lankford s engaging examination of the causes of the Civil War from other books on the subject is its willingness to consider the alternative possibilities to history Cry Havoc recounts in riveting detail the small quirks of timing character and place that influenced the huge trajectory of events during eight critical weeks from Lincoln s inauguration through the explosion at Fort Sumter and the embattled president s response to it It addresses the what ifs the might have beens and the individual personalities that played into circumstances a chain of indecisions and miscalculations influenced by swollen vanity and wishful thinking that gave shape to the dreadful conflict to come **Counter-thrust B.**

Franklin Cooling, 2007-01-01 During the summer of 1862 a Confederate resurgence threatened to turn the tide of the Civil War When the Union s earlier multitheater thrust into the South proved to be a strategic overreach the Confederacy saw its chance to reverse the loss of the Upper South through counteroffensives from the Chesapeake to the Mississippi Benjamin Franklin Cooling tells this story in Counter Thrust recounting in harrowing detail Robert E Lee s flouting of his antagonist George B McClellan s drive to capture the Confederate capital at Richmond and describing the Confederate hero s long dreamt of offensive to reclaim central and northern Virginia before crossing the Potomac Counter Thrust also provides a window into the Union s internal conflict at building a successful military leadership team during this defining period Cooling

shows us Lincoln's administration in disarray with relations between the president and field commander McClellan strained to the breaking point. He also shows how the fortunes of war shifted abruptly in the Union's favor, climaxing at Antietam with the bloodiest single day in American history and in Lincoln's decision to announce a preliminary Emancipation Proclamation. Here, in all its gritty detail and considerable depth, is a critical moment in the unfolding of the Civil War and of American history.

The Making of Harpers Ferry National Historical Park Teresa S. Moyer, Paul A. Shackel, 2008 Harpers Ferry National Historical Park is most widely known today for the attempted slave revolt led by John Brown in 1859, the nucleus for the interpretation of the current national park. Here Teresa S. Moyer and Paul A. Shackel tell the behind-the-scenes story of how this event was chosen and preserved for commemoration, providing lessons for federal, state, local, and non-profit organizations who continually struggle over the dilemma about which past to present to the public. Professional and non-professional audiences alike will benefit from their important insights into how federal agencies interpret the past and in turn shape public memory.

Honor Bound Stuart I. Rochester, Frederick T. Kiley, 1998 Honor Bound is the result of a fruitful collaboration between Stuart I. Rochester and Frederick Kiley. In examining the lives of the prisoners in captivity, it presents a vivid, sensitive, sometimes excruciating account of how men sought to cope with the physical and psychological torment of imprisonment under wretched and shameful conditions. It includes insightful analyses of the circumstances and conditions of captivity and its varying effects on the prisoners, the strategies and tactics of captors and captives, the differences between captivity in North and South Vietnam and between Laos and Vietnam, and analysis of the quality of the source materials for this and other works on the subject.

Glacier Girl Richard L. Taylor,2022-09-01 Glacier Girl The Quest The Prize is a memoir based on the journals of seven expeditions co led by Richard Taylor and Pat Epps Taylor s journals cover eleven years of the search and retrieval of the P 38 Lightning later called Glacier Girl On her way to war in 1942 she and seven other planes in their squadron ran out of gas and crash landed on the Greenland ice cap After a two week wait all of the pilots and crew were rescued no one left behind They then went back to war and the eight planes were abandoned Eventually they became known as the Lost Squadron Thirty nine years later in 1981 Pat and Richard heard about this aviation event and formed the Greenland Expedition Society GES They teamed up with a couple of other pilots and headed north to find the planes Their ambitious plan was to put fresh gas in the tanks attach skis and fly as many of the fighters as they could back to the States What greater way to store airplanes than in a giant deep freeze As it turned out the planes turned out to be difficult to find The first four expeditions to the ice cap ended were conspicuous mission failures In situ lessons in Arctic survival are not offered without startlingly high payments of personal sacrifice On the upside some thrilling and harrowing stories of Mother Nature exercising her unlimited fury are shared The ice cap adage of shovel or die takes on new meaning It was not until the fifth expedition using ground penetrating radar of a discrete frequency that the planes were finally located At a glacial rate they had moved more than a mile from their original location But that wasn t the big problem The bad news was that they were now encased in solid blue ice 260 feet deep in the bowels of the glacier To

melt a shaft through the ice and down to the planes the GES invented and built a system they called the thermal meltdown generator TMG In its first field application at seventy feet deep in the glacier the melt head lost directional control gravity and started heading horizontally Henceforth the future TMGs were affectionately called gophers In 1990 the team returned to the glacier with a new gopher melted a four foot diameter shaft down to the B 17 bomber Big Stoop They then descended down the ice shaft melted out a hangar area around the bomber and salvaged an array of historical aviation paraphernalia machine guns throttle quadrants instruments the upper gun turret and so on The near impossible was accomplished In 1992 now a little more seasoned and with a few garlands of hard earned achievement they returned again with a new super gopher Their sights were now set on retrieving at least one complete Lockheed P 38 Lightning fighter plane The mission started with melting five ice shafts closely in a row The webs between the holes were then melted out to create a four foot by twenty foot slot in the glacier 260 feet deep This was the right sized opening through which they could lift large wings and fuselage sections to the surface The airplane was then carefully deconstructed hauled to the surface and then delivered to the States for reassembly It took ten years and two million dollars to put the plane back into flying condition They called her Glacier Girl The renovation was performed by Roy Shoffner a GES partner in the seventh expedition In 2002 Glacier Girl flew again and was featured in the one hour History Channel presentation The Hunt for the Lost Squadron Glacier Girl now flies and is the feature star attraction in airshows all over the country Citius altius fortius
