Dept. of Agriculture. Economics, Statistics, and Cooperative Service, 1980 **Widowhood in an American City** Helena Lopata, 2017-09-29 Widowhood in an American City focuses on the roles and lifestyles of urban American widows fifty years of age or older These women form a segment of two generations of one society they present a historical instance of people born and brought up under conditions that are not likely to be duplicated Not only the U S but many other countries are undergoing modifications in the degrees and forms of urbanization industrialization and social complexity Helena Znaniecki Lopata argues that the way women re engage society following the death of a husband is different due to their location in the modern social system She notes that the trends in social structure

are toward increasingly voluntaristic engagement in achieved functionally oriented social roles that are performed in large groups and contain secondary social relations The cultural background of many societal members prevents the utilization of most resources of the complex urban world restricting them to a small social life space with almost automatically prescribed social relations Those who argue that the elderly are socially isolated contend that this is a result of the natural process of withdrawal of the person and the society from each other These arguments focus on those who are isolated or lonely and those who lack the skills money health and transportation for engaging or re engaging society Lopata s study indicates that this assumption is false for many widows If such people are to be helped a fresh view of the relation between the urban industrial and complex modern world and its residents is required and new action programs must be creatively developed This is a timely ground breaking work that addresses and shatters common myths associated with growing old alone in an urban society

Berkeley at War : The 1960s W.J. Rorabaugh Professor of History University of Washington,1989-05-04 Berkeley California was the bellwether of the political social and cultural upheaval that made the 1960s a unique period of American history a time when the top down methods of a conservative establishment collided head on with the bottom up grass roots ethos of the civil rights movement and an increasingly well educated and individualistic middle class W J Rorabaugh who attended the graduate school of the University of California at Berkeley in the early 1970s presents a lively and informative account of the events that overtook and changed forever what had once been a quiet conservative white suburb The rise of the Free Speech Movement which gave a voice to disfranchised students the growth and increasing militance of a black community struggling to end segregation the emergence of radicalism and the anti war movement the blossoming of hippie culture with its scorn for materialism and enthusiasm for experimentation with everything from sex and drugs to Eastern philosophies the beginnings of modern day feminism and environmentalism and how all of these coalesced in the explosive conflict over People s Park are traced in a meticulously researched and authoritative narrative At issue was the question of power and the struggle between the establishment and the powerless led to developments that the advocates of a freer society could scarcely have foreseen Ronald Reagan elected governor of California in reaction to the events at Berkeley and Edwin H Meese III who battled against the student movement and People s Park rose to national power in the 1980s without however gaining any popularity in Berkeley where Walter Mondale won 83 percent of the vote in 1984 An invaluable account of its time and place this book anchors the 60s in American history both before and since that colorful decade

Rhodes,2001-04-30 The tide of 1960s political upheaval while mistaken at the time by some as a unified assault against America carried out by revolutionaries at home and abroad was actually hundreds of locally constructed expressions of political discourse reflecting the influences of race class gender and local conditions on each unique group of

practitioners This is a comparative study of how radicals at the local level staged displayed and ultimately narrated symbolic acts of performative violence against the symbols of the American system The term performative violence refers to a method of public protest whereby participants create the conditions in which their violent actions become a political text a powerful symbol with a strong historical precedent Recognizing the textuality of history this interdisciplinary examination deconstructs the performative violence within its historically specific and socially constructed contexts using four representative case histories of late 1960s and early 1970s activism These are the African American rioters in Kansas City the Black Panther Party in Detroit campus radicals at Kansas State University and activists at the University of Kansas Rather than focusing on the major clashes of the Vietnam era this book contributes to recent scholarship on the 1960s which has attempted to offer a more textured analysis of the era s activism particularly its political violence based on more local studies
