Small Maps Of The World:

Small-Scale Map Projection Design Frank Canters, 2002-02-21 The use of computers in cartography has made it easier for map makers to transform data from one map projection to another and experiment with alternative representations of geographical data This has created new challenges and opportunities for map projection scientists Small Scale Map Projection Design focuses on numerical map projection research and is written from the perspective of the map projection user It demonstrates how advances in the measurement of map projection distortion and in the development of low error map projections can help map makers decide what type of map projection is best for their purpose and shows how they can eventually design their own map projections

The Evolution of Washington, DC James M. Goode, 2015-03-17 The Evolution of Washington DC is a striking volume featuring select pieces of the extraordinary collection of Washingtoniana donated by Albert H Small to the George Washington University in 2011 It showcases treasures such as an 1860 lithograph of the equestrian statue of Andrew Jackson in front of the White House and a contemporary print of old Potomac River steamboats Other unique pieces include early designs for the White House the Capitol and the Washington Monument as well as presidential portraits and Civil War memorabilia Each object from architectural plans and topographical maps to letters and advertisements tells a fascinating story and together they illustrate the history of our nation's capital and indeed our nation itself

An Atlas of the World's Conifers Aljos Farjon, Denis Filer, 2013-11-11 A 2014 Choice Magazine Outstanding Academic Title An Atlas of the World's Conifers is the first ever atlas of all known conifer species It is based on locality information of ca 37 000 collected herbarium specimens held in scientific institutions As well as providing natural distribution maps for each species Farjon and Filer give the reader comprehensive insight into the biogeography diversity

and conservation status of conifers on all continents dispelling the widely held view that they are primarily a northern boreal plant group. Conifer diversity is analysed and presented with a taxonomic and geographic perspective. Distribution patterns are interpreted using the latest information on continental drift, dispersal and phylogeny. The entire dataset supporting the Atlas can be consulted and verified online. These data can also be used for further research and are an invaluable resource for anyone working on conifer systematics, biogeography or conservation. An Atlas of the World's Conifers indicates the known distribution of all conifers including an analysis of their biogeography, diversity and conservation status. Also available from Brill is Aljos Farjon's *A Handbook of the World's Conifers* published in 2010, ISBN 978 90 04 17718 5, which is a 2017 Choice Magazine Outstanding Academic Title.

Japan and the Pacific, 1540-1920 Matsuda Koichiro, 2017-05-15. This volume seeks to capture the rich array of images that define Japan's encounters with the Pacific Ocean. Contemporary Japanese most readily associate the Pacific with the devastating war that their country fought over a half century ago. The ensuing occupation realized a situation that this people had striven to avoid ever since the Portuguese first arrived in 1543: their subjugation by a foreign power. But the Pacific Ocean also extended Japan's overseas contacts. From antiquity, Japanese and their neighbours crossed it to trade ideas and products. From the mid 16th century it carried people from more distant lands, Europe and America, and thus expanded and diversified Japan's cultural and economic exchange networks. From the late 19th century it provided the highway to transport Japanese imperial expansion in Northeast Asia and later to encourage overseas migration into the Pacific and the Americas. The studies selected for inclusion in this volume, along with the introduction, explain how the Pacific Ocean thus nurtured images of both threat and opportunity to the island nation that it surrounds. [To the Ends of the Earth](#) Philip Parker, 2023-09-14. This lavishly illustrated book provides a unique insight into the evolution of mapmaking and the science behind it, from the stone age to the digital age. Britain's leading cartographic author takes us on a historical journey through how the greatest maps were created. Exploring key cartographers and mapmaking methods, as well as fascinating interludes on subjects such as the very first maps, deliberate mistakes and superlative maps, this comprehensive guide explores how the

techniques and technology have developed throughout human history Evolving methods of surveying from the Roman groma through the naval instruments of the magnetic compass astrolabes and sextants to the 20th century revolution of aerial photography Drawing tools and materials from Babylonian maps carved in clay to digital maps created via touchscreen The introduction of various mapping conventions and key components of a map from Ptolemy s introduction of longitude and latitude through the 13th century origins of having north at the top to the various projections used to represent the Earth With visually stunning historic maps and antique instruments this book will engross readers with its fascinating stories of how we came to chart our world The Geographical Teacher ,1902
