Taxing Choice William Shughart II, 2018-04-24 Taxing behavior deemed politically incorrect has long been a convenient way for politicians to fund programs benefiting special interest groups to the public's disadvantage Government policy toward various goods drugs tobacco and alcohol for example has been locked into a regulatory cycle of tax and taboo Support for legalizing other substances is buttressed by the revenue generating power of so called sin taxes And the products subjected to excise taxation have varied from soft drinks fishing gear and margarine to airline tickets telephone calls and gasoline Taxing Choice thoroughly addresses the costs and benefits of these predatory public policies Shughart notes that the record of such punitive selective taxation has been anything but successful hindering economic progress and failing to deliver the promised social benefits In addition the costs of selective taxes fall disproportionately on lower income people while more politically powerful interest groups benefit At the same time such policies are a poor way to raise funding for public services and foster political corruption and self serving bureaucracies accountable to no one Indeed policies discriminating against certain products may represent ominous trends easily extended into virtually every facet of people's lives One can envision policies proscribing foods sun bathing obesity and even books

Decline of the American City Sam Staley, 2017-07-05 The drug trade is a growth industry in most major American cities fueling devastated inner city economies with revenues in excess of 100 billion In this timely volume Sam Staley provides a detailed in depth analysis of the consequences of current drug policies focusing on the relationship between public policy and urban economic development and on how the drug economy has become thoroughly entwined in the urban economy The black market in illegal drugs undermines essential institutions necessary for promoting long term economic growth including respect for civil liberties private property and nonviolent conflict resolution Staley argues that America s cities can be revitalized only through a major restructuring of the urban economy that does not rely on drug trafficking as a primary source of employment and income the inadvertent outcome of current prohibitionist policy Thus comprehensive decriminalization of the major drugs marijuana cocaine and heroin is an important first step toward addressing the economic and social needs of depressed inner cities Staley demonstrates how decriminalization would refocus public policy on the human dimension of drug abuse and addiction acknowledge that the cities face severe development problems that promote underground economic activity and reconstitute drug policy on principles consistent with limited government as embodied in the U S Constitution and Bill of Rights Designed to cross disciplinary boundaries Staley s provocative analysis will be essential reading for urban policymakers sociologists economists criminologists and drug treatment specialists The

Tax Policy and the Economy Lawrence H. Summers, 1987 Tax policy debates generated by one of the most sweeping reforms of the Federal income tax system since its inception are certain to continue for years to come providing a fertile field for economic research This book is the first in a series of annual publications on tax policy and the economy initiated by the National Bureau of Economic Research and designed to convey research results in a way that is accessible to a wide body of lawyers policymakers and businesspeople involved in formulating tax policy Volume 1 of Tax Policy and the Economy presents six studies of diverse tax policy issues each bringing new data to bear on an important policy issue Alan Auerbach and James Poterba examine the striking decline in corporate tax revenues as a share of GNP John Shoven describes new developments in corporate finance and tax avoidance concluding that these devices have helped and will continue to help corporate shareholders escape the double taxation of dividends Herman Leonard and Richard Zeckhauser review the experience of several states with tax amnesty programs and consider the likely effects of a Federal tax amnesty program Jeffrey Harris explores the economic effects of tobacco taxation particularly the effect the recent hike in the Federal excise tax on cigarettes had on prices and on the number of smokers Douglas Bernheim suggests that the Federal estate tax could conceivably reduce Federal tax revenues And in a concluding chapter Michael Boskin and Douglas Puffert show that the redistributions between married workers and single workers in the Social Security system far outweigh the much discussed marriage tax effects of the individual income tax Lawrence H Summers is Professor of Economics at Harvard University and Research Associate at the National Bureau of Economic Research
