Ezra Pound Among the Poets George Bornstein, 1988-10-03 Be influenced by as many great writers as you can said Ezra Pound Pound was an assimilative poet par excellence as George Bornstein calls him a writer who more often adhered to a classical conception of influence as benign and strengthening than to an anxiety model of influence To study Pound means to study also his precursors Homer Ovid Li Po Dante Whitman Browning as well as his contemporaries Yeats Williams and Eliot These poets discussed here by ten distinguished critics stimulated Pound's most important poetic encounters with the literature of Greece Rome China Tuscany England and the United States Fully half of these essays draw on previously unpublished manuscripts **Poetic License** Marjorie Perloff, 1990 In Poetic License Perloff insists that despite the recent interest in opening up the canon our understanding of poetry and poetics is all too often rutted in conventional notions of the lyric that shed little light on what poets and artists are actually doing today **Now, Time and Quantum Mechanics** Michel Bitbol, Eva Ruhnau, 1994 The Publishers' Trade List Annual, 1982 *The Oxford Handbook of the History of Quantum Interpretations* Guido Bacciagaluppi, Olivier Darrigol, Thiago Hartz, Christian Joas, Alexei Kojevnikov, 2022 This Oxford Handbook provides a rigorous interdisciplinary review of the history of interpretations of quantum physics presenting the key controversies within the field as well as outlining its successes and its extraordinary potential across various scientific fields *Congressional Record* United States. Congress, 2000 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873 *Indigenous American Women* Devon Abbott Mihesuah, 2003-01-01 Oklahoma Choctaw scholar Devon Abbott Mihesuah offers a frank and absorbing look at the complex evolving identities of American Indigenous women today their ongoing struggles against a centuries old legacy of colonial disempowerment and how they are seen and portrayed by themselves and others Mihesuah first examines how American Indigenous women have been perceived and depicted by non Natives including scholars and by themselves She then illuminates the pervasive impact of colonialism and patriarchal thought on Native women's traditional tribal roles and on their participation in academia Mihesuah considers how relations between Indigenous women and men across North America continue to be altered by Christianity and Euro American ideologies Sexism and violence against Indigenous women has escalated economic disparities and intratribal factionalism and culturalism threaten connections among women and with men and many women suffer from psychological stress because their economic religious political and social positions are devalued In the last section Mihesuah explores how modern American Indigenous women have empowered themselves tribally nationally or academically Additionally she examines the overlooked role that Native women played in the Red Power movement as well as some key differences

between Native women feminists and activists

**Fiction in the Quantum Universe** Susan Strehle, 2000-11-09 In this outstanding book Susan Strehle argues that a new fiction has developed from the influence of modern physics She calls this new fiction actualism and within that framework she offers a critical analysis of major novels by Thomas Pynchon Robert Coover William Gaddis John Barth Margaret Atwood and Donald Barthelme According to Strehle the actualists balance attention to questions of art with an engaged meditation on the external actual world While these actualist novels diverge markedly from realistic practice Strehle claims that they do so in order to reflect more acutely what we now understand as real Reality is no longer realistic in the new physical or quantum universe reality is discontinuous energetic relative statistical subjectively seen and uncertainly known all terms taken from new physics Actualist fiction is characterized by incompleteness indeterminacy and open endings unsatisfying to the readerly wish for fulfilled promises and completed patterns Gravity's Rainbow for example ends not with a period but with a dash Strehle argues that such innovations in narrative reflect on twentieth century history politics science and discourse

that it includes discussions for general audiences of Oppenheimer's work and contributions to theoretical physics including his famous prediction of black holes sixty years before their confirmed discovery Now David Cassidy brings us the best account of Oppenheimer's life in science with J Robert Oppenheimer and the American Century T Powers New York Review of Books Cassidy covers this ground admirably in his thoughtful biography of Oppenheimer Scientific American Cassidy's book is probably the best single study of Oppenheimer to date B Bernstein Physics World Cassidy's biography of J Robert Oppenheimer is a concise well written book about the life of the famous 20th century scientist A worthwhile read for anyone with an interest in the coming of age of American physics and how the weaknesses and strengths of one of its leaders shaped the relationship between science and the government for decades to come Physics and Society This biography is a detailed and beautifully written work Cassidy expands beyond the traditional scope of a biography and expertly explores the surrounding environment that shaped Oppenheimer's life Atomic Archive This excellent biography of J Robert Oppenheimer places the eminent physicist in the context of twentieth century America Cassidy provides excellent insights into the life and times of this complex man Unlike many other biographers of Oppenheimer Cassidy assesses his role as a twentieth century theoretical physicist Alsos Digital Library for Nuclear Issues A superbly researched biography There is no doubt that Cassidy gives us a valuable perspective on Oppenheimer's life The author is shy neither of editorializing nor of making judgments about the personalities who appear in the story These comments are almost unfailingly fair and justified by the evidence Times Higher Education Cassidy has written a book that neither praises Oppenheimer nor buries his reputation but rather puts some tarnish upon the icon G Herken Science      **Library of American Law and Practice: Personal property.**

**Feeling Strangely in Mid-Century Spanish and Latin American Women's Fiction** Tess C. Rankin, 2023-12-15 An Open Access edition of this book is available on the Liverpool University

Press website and the OAPEN library as part of the Opening the Future project with COPIM The early twentieth century was awash in revolutionary scientific discourse and its uptake in the public imaginary through popular scientific writings touched every area of human experience from politics and governance to social mores and culture Feeling Strangely argues that these shifting scientific understandings and their integration into Hispanic and Lusophone society reshaped the experience of gender The book analyzes gender as a felt experience and explores how that experience is shaped by popular scientific discourse by examining the strange femininity of young protagonists in four novels written by women in Spanish and Portuguese Rosa Chacel's *Memorias de Leticia Valle* published in Argentina in 1945 Norah Lange's *Personas en la sala* Argentina 1950 Carmen Laforet's *Nada* Spain 1945 and Clarice Lispector's *Perto do cora o selvagem* Brazil 1943 It pairs each novel with a broad scientific theme selected from those that captured the contemporary popular imagination to argue that the young female protagonists in these novels all put forth visions of young womanhood as an experience of strangeness Building on Carmen Mart n Gait e's term *chicas raras* Rankin proposes this strangeness as constitutive of a gendered experience inextricable from affective and material engagements with the world
