begins with the story of Isabelle Dinoire the recipient of the first face transplant and chronicles her surgery and battles with tissue rejection Its scope widens with a look at how surgical teams including three U S transplant teams are in a global race to perform the first full face transplant and at how medical history has led up to this point with prior successful transplants ranging from body parts as simple as cornea to those as neurologically complicated as the heart a hand and a penis The most novel among these surgeries the face transplant conjures up particular and expansive psychological issues Authors Bluhm and Clendenin show how transplant recipients struggle with functional issues including a lifetime of anti rejection drugs a danger highlighted by the recent death of the second face transplant patient in China But just as challenging in the case of face transplant is the psychological effect on and potential threat to identity Who are you if suddenly your face or a significant portion of it is not what you were born with What is it like to look in the mirror and see a face that is not the one you have always had Dinoire lamented It will never be me That statement is an absolute simplification of the identity issues a face transplant can create explain the authors Bluhm and Clendenin show how across history and media humankind via medicine literature film and other media has dreamed of a day when face transplants would be possible With so many disfigurements occurring among the military in Iraq and experimental face transplants too expensive for implementation in the private sector it is likely that the U S military will take the reins and further face transplant techniques as quickly as possible to serve injured personnel

Someone Else's Stars Ryan Rose Lee,2017-03-30 If there was anything they knew how to do it was to die New York City 1956 Never has a theater felt bigger The stars have never been more important than when Nick Mauro was a senior in high school Between gang fights relationships and a future that seems to be looming over him like a black cloud Nick is lost It s hard enough being gay in a catholic family but to have enemies around every bend and in every alley Life s a time bomb Nick has his brother and his friends and he has the theater to help him through life But does he really What would happen if he lost it all Everyone constantly spills the contents of their veins taking the blood that flows through them for granted There s trouble brewing deep in the heart of the city and someone may end up taking it too far They never truly realize their own mortality until it s ripped from them All it takes is a single bullet to make everything crumble All it takes is one night to leave everyone thinking What happens if we die when they should really be asking What happens if we live

Culicover, Ray Jackendoff, 2005-07-01 This groundbreaking book offers a new and compelling perspective on the structure of human language The fundamental issue it addresses is the proper balance between syntax and semantics between structure and derivation and between rule systems and lexicon It argues that the balance struck by mainstream generative grammar is wrong It puts forward a new basis for syntactic theory drawing on a wide range of frameworks and charts new directions for research In the past four decades theories of syntactic structure have become more abstract and syntactic derivations have become ever more complex Peter Culicover and Ray Jackendoff trace this development through the history of contemporary syntactic theory showing how much it has been driven by theory internal rather than empirical considerations They develop an alternative that is responsive to linguistic cognitive computational and biological concerns At the core of this alternative is the Simpler Syntax Hypothesis the most explanatory syntactic theory is one that imputes the minimum structure necessary to mediate between phonology and meaning A consequence of this hypothesis is a far richer mapping between syntax and semantics than is generally assumed Through concrete analyses of numerous grammatical phenomena some well studied and some new the authors demonstrate the empirical and conceptual superiority of the Simpler Syntax approach Simpler Syntax is addressed to linguists of all persuasions It will also be of central interest to those concerned with language in psychology human biology evolution computational science and artificial intelligence **National Theatre Connections 2025** Alys Metcalf, Paul Sirett, Danusia Samal, Gary McNair, Jane Bodie, May Sumbwanyambe, Rikki Beadle-Blair, Satinder Chohan, Vickie Donoghue, Chloë Lawrence-Taylor, Amanda Verlaque, 2025-06-26 Marking its 30th anniversary National Theatre Connections 2025 draws together ten new plays for young people to perform from some of the UK s most exciting and popular playwrights These are plays for a generation of theatre makers who want to ask questions challenge assertions and test boundaries and for those who love to invent and imagine a world of possibilities The plays offer young performers an engaging and diverse range of material to perform read or study Wrestling with themes like the cost of living crisis activism neurodiversity the point and pointlessness of regret human rights and loneliness this collection lays bare a rich and complex terrain in which students can fully immerse themselves explore and discover This 2025 anthology represents the full set of ten plays offered by the National Theatre 2025 Festival as well as comprehensive workshop notes
