Musical Creativity in Restoration England Rebecca Herissone, 2013-10-10 Musical Creativity in Restoration England is the first comprehensive investigation of approaches to creating music in late seventeenth century England Understanding creativity during this period is particularly challenging because many of our basic assumptions about composition such as concepts of originality inspiration and genius were not yet fully developed In adopting a new methodology that takes into account the historical contexts in which sources were produced Rebecca Herissone challenges current assumptions about compositional processes and offers new interpretations of the relationships between notation performance improvisation and musical

memory She uncovers a creative culture that was predominantly communal and reveals several distinct approaches to composition determined not by individuals but by the practical function of the music Herissone s new and original interpretations pose a fundamental challenge to our preconceptions about what it meant to be a composer in the seventeenth century and raise broader questions about the interpretation of early modern notation **French Music Since Berlioz** Richard Langham Smith, Caroline Potter, 2006 French Music Since Berlioz explores key developments in French classical music during the nineteenth and twentieth centuries The volume draws on the expertise of a range of French music scholars who provide their own perspectives on particular aspects of the subject Aimed at teachers and students of French music history it is an essential companion for anyone interested in the field **Catalogue of the King's Music Library, by William Barclay Squire ...** British Museum.
