Sri Aurobindo's Vision of Integral Human Development Monica Gupta, 2014-05-22 This book explores the integral vision of human development contained in the original works of Sri Aurobindo and *The Mother* It delves into multiple layers of the human personality as envisaged by Sri Aurobindo and *The Mother* and explores a new developmental science of consciousness based on the practice of Integral Yoga The book examines the major metatheoretical conceptions that shape

the contemporary discipline of developmental psychology and discusses the ways in which Sri Aurobindo's philosophical and psychological perspective can help break fresh ground for developmental theorisation and research by extending the current understanding of the human evolutionary potential. The author proposes a new agenda for human development which brings together the key ideas of integral individual and collective development and informs practices in the areas of counselling, education, parenting and self-development. This book will be of special interest for researchers of developmental psychology, human development, counselling, psychology, philosophy, social work and education.

[The Yogi and the Devotee \(Routledge Revivals\)](#) Ninian Smart, 2013-01-11. First published in 1968. Ninian Smart's *The Yogi and the Devotee: The Interplay Between the Upanishads and Catholic Theology* is based on lectures given in Delhi and explores in a novel way the relation between Hinduism and Christianity. The author puts forward a general theory of the relationship between religious experience and doctrines, a theory he had developed in earlier works. He argues that a new form of natural theology should be presented which would show the relevance of religious experience and ritual to what is given in revelation. Smart believes this could be the key to a new understanding between Christianity and Indian religions and also examines what Christians can learn from other faiths. During a career as a Professor of Religious Studies and Philosophy, Ninian Smart was hugely influential in the way Religious Studies was taught, not only in Britain but around the world.

The Lives of Sri Aurobindo Peter Heehs, 2008-05-19. Since his death in 1950, Sri Aurobindo Ghose has been known primarily as a yogi and a philosopher of spiritual evolution who was nominated for the Nobel Prize in peace and literature. But the years Aurobindo spent in yogic retirement were preceded by nearly four decades of rich public and intellectual work. Biographers usually focus solely on Aurobindo's life as a politician or sage, but he was also a scholar, a revolutionary, a poet, a philosopher, a social and cultural theorist, and the inspiration for an experiment in communal living. Peter Heehs, one of the founders of the Sri Aurobindo Ashram Archives, is the first to relate all the aspects of Aurobindo's life in its entirety. Consulting rare primary sources, Heehs describes the leader's role in the freedom movement and in the framing of modern Indian spirituality. He examines the thinker's literary, cultural and sociological writings and the Sanskrit, Bengali, English and French literature that influenced them, and he finds the foundations of Aurobindo's yoga practice in his diaries and unpublished letters. Heehs's biography is a sensitive, honest portrait of a life that also provides surprising insights into twentieth-century Indian history.

The Future of the Body Michael Murphy, 1993-04-21. In the oral and written histories of every culture, there are countless records of men and women who have displayed extraordinary physical, mental and spiritual capacities. In modern times, those records have been supplemented by scientific studies of exceptional functioning. Are the limits of human growth fixed? Are extraordinary abilities latent within everyone? Is there evidence that humanity has unrealized capacities for self-transcendence? Are there specific practices through which ordinary people can develop these abilities? Michael Murphy has studied these questions for over thirty years. In *The Future of the Body*, he presents evidence for metanormal perception, cognition, movement, vitality and

spiritual development from more than 3 000 sources Surveying ancient and modern records in medical science sports anthropology the arts psychical research comparative religious studies and dozens of other disciplines Murphy has created an encyclopedia of exceptional functioning of body mind and spirit He paints a broad and convincing picture of the possibilities of further evolutionary development of human attributes By studying metanormal abilities under a wide range of conditions Murphy suggests that we can identify those activities that typically evoke these capacities and assemble them into a coherent program of transformative practice A few of Murphy s central observations and proposal include The observation that cultural conditioning powerfully shapes or extinguishes metanormal capacities The proposition that we cannot comprehend our potentials for extraordinary life without an empirical approach that involves many fields of inquiry and different kinds of knowing The notion that a widespread realization of extraordinary capacities would constitute an evolutionary transcendence analogous to the rise of humankind from its primal ancestry The proposal that all or most instances of significant human development are produced by a limited number of identifiable activities such as disciplined self observation visualization of desired capacities and caring for others The idea that a balanced development of our various capacities is possible through integrated practices In *The Future Of The Body* Murphy states that such practices can carry forward Earth s evolutionary adventure and lead humanity to the next step in its development
