

Stable Isotopes

Carbon and nitrogen generally used (sulfur recently)
- Both abundant throughout nature

Values expressed as ratios of two isotopes
- $^{13}\text{C}/^{12}\text{C}$ or $^{15}\text{N}/^{14}\text{N} = \delta$

Can determine:

primary producer (C&S) - Organic material has “isotopic signature”

trophic level of feeding (N)

Based upon principle of “Fractionation”

Each time stable isotope is metabolized there is “Fractionation” (do not participate equally – bias toward lighter)

Clifford, Hans-Georg Müller, 2013-11-21 Nutrients have been recognized as essential for maximum growth successful reproduction and infection prevention since the 1940s since that time the lion s share of nutrient research has focused on defining their role in these processes Around 1990 however a major shift began in the way that researchers viewed some nutrients particularly the vitamins This shift was motivated by the discovery that modest declines in vitamin nutritional status are associated with an increased risk of ill health and disease such as neural tube defects heart disease and cancer especially in those populations or individuals who are genetically predisposed In an effort to expand upon this new understanding of nutrient action nutritionists are
