Stained Glass: History, Technology and Practice, Etc Edward Liddall ARMITAGE, 1959 Discovering Stained Glass in Detroit Nola Huse Tutag, Lucy Hamilton, 1987 The Detroit area boasts many fine examples of stained glass representing a variety of periods and styles The European stained glass collection at the Detroit Institute of Arts ranks amongst the most important in the United States Churches and synagogues contain panels from notable designers and studios and exquisite glass can also be found in many public and private buildings like the Detroit Public Library Cranbrook House the Guardian Building and the David Whitney Jr house *Discovering Stained Glass in Detroit* contains sixty examples of the area's stained glass treasures each stunningly presented in full color Author Nola Huse Tutag accompanies each illustration with an explanatory text Line drawings illustrate the buildings where the panels are located The windows represent works by designers such as Louis Comfort Tiffany Charles J Connick Frank Lloyd Wright Henry Matisse as well as those from European and American studios *Digital Technology and the Practices of Humanities Research* Jennifer Edmond, 2020-01-30 How does technology impact research practices in the humanities How does digitisation shape scholarly identity How do we negotiate trust in the digital realm What is scholarship what forms can it take and how does it acquire authority This diverse set of essays demonstrate the importance of asking such questions bringing together established and emerging scholars from a variety of disciplines at a time when data is increasingly being incorporated as an input and output in humanities sources and publications Major themes addressed include the changing nature of scholarly publishing in a digital age the different kinds of gate keepers for scholarship and the difficulties of effectively assessing the impact of digital resources The essays bring theoretical and practical perspectives into conversation offering readers not only comprehensive examinations of past and present discourse on digital scholarship but tightly focused case studies This timely volume illuminates the different forces underlying the shifting practices in humanities research today with especial focus on how humanists take ownership of and are empowered by technology in unexpected ways *Digital Technology and the Practices of Humanities Research* is essential reading for scholars students and general readers interested in the changing culture of research practices in the humanities and in the future of the digital humanities on the whole **Raman Spectroscopy in Cultural Heritage Preservation** Howell G. M. Edwards, Peter Vandenabeele, Philippe Colomban, 2022-10-13 This book addresses the application of Raman spectroscopic techniques to a range of diverse problems which arise in the study conservation and restoration of artefacts and sites closely related to our cultural heritage as well as in authentication These themes are naturally wider than what at first might be considered as artworks and archaeological artefacts and the topics include pigments paintings ceramics glass sculpture and patination corrosion textiles industrial archaeology the degradation and preservation of biomaterials mummies and human skeletal remains An interesting feature is the inclusion of modern case studies which describe specific problems and approaches to the Raman spectral analysis of items important to our cultural heritage The

text is prefaced with an introduction to the important parameters used in nondestructive Raman measurements and also highlights some future applications based upon novel miniaturised instrumentation for in field studies and potential screening work which will identify specimens which would repay further studies in the laboratory An attempt is made to give a snapshot of the state of the art evolution since the beginning of the technique 1970s and to point out potential further development The book is co edited by three international experts with many years experience in the application of Raman spectroscopy to artworks archaeological artefacts and in the investigation of materials and sites for cultural heritage preservation and each editor has undertaken to write individual chapters and different topics personally The adopted approach is designed to convey the sort of information which has become available from the adoption of analytical Raman spectroscopy to different problems in the field of cultural heritage preservation through the spectral interrogation of artefacts and how the interpretation of the spectral data can assist museum curators archaeologists and cultural heritage historians in the preservation and conservation of ancient materials and sites a particular advantage in this respect is the ability of Raman spectroscopy to determine generally in a strictly noninvasive procedure at the laboratory or on site with mobile instruments the presence of both organic and inorganic components in a particular specimen together nondestructively without any chemical and mechanical pretreatment being undertaken which is an essential requirement for rare and valuable samples An important aside from this work is the means of spectral identification of ongoing biodeterioration and biological colonisation in specimens in storage and the effects of environmental deterioration such as humidity and temperature upon their integrity
