Standard Grade Biology 3ed:

Evolution Education Around the Globe Hasan Deniz, Lisa A. Borgerding, 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to people's views about evolution; b) designing/implementing/evaluating evolution education curriculum that reflects contemporary evolution understanding; and c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

Standard Grade Biology with Answers James Fullarton, 2008-01-01 Now in full colour throughout. Standard Grade Biology 3rd edition continues to provide comprehensive coverage of the arrangements. This new With Answers edition provides an extra resource for this course. This new edition retains its highly successful format which encompasses clear differentiation, key questions and problem-solving questions. It has been updated to include a glossary at the end of every section, encouraging students to use scientific language, a wealth of supporting diagrams and photographs which benefit from being presented in full colour, integration of the extensive reference section into each chapter, helping students to develop skills such as drawing graphs, using microscopes and constructing and testing hypotheses. *X-kit FET Grade 12 LIFE SCIENCE*, 2008.
