Verriest, 2012-12-06 Colour Vision Deficiencies VIII brings together information on the latest trends in the following areas of research Visual effects of intense lights Effects of intoxications on colour vision Ageing and vision Methods of examination Congenital defects Acquired defects Practical aspects Physiological bases This volume is a natural follow up on Volumes VI and VII published in 1981 and 1983 respectively by Dr W Junk Publishers **Colour Vision Deficiencies X** B. Drum, J.D. Moreland, A. Serra, 2012-12-06 Since its inception the International Research Group on Colour Vision Deficiencies IRGCVD has followed the policy that the Symposium Proceedings should be as close as possible to a complete record of the scientific content of the meeting This policy has the advantage of providing an accurate picture of the current state of the art in research on color vision deficiencies but it also has the disadvantage that papers typically span a wide range of quality In this volume however we have instituted a system of peer review in an effort to enhance scientific quality as much as possible while continuing our past policy of publishing all submitted manuscripts In addition to being edited for English composition and grammar each of the papers included here has been carefully reviewed by an IRGCVD member selected for his or her expertise in the specific

topic of the paper Reviewers were instructed to include in their comments suggestions for improvement rather than recommendation or rejection In our opinion this review process has resulted in substantial improvement of many of the articles and has enhanced the value of the publication We are pleased to acknowledge the efforts of our reviewers and offer them our sincere thanks for their important contributions to *Colour Vision Deficiencies X* The Editors B Drum J D Moreland A Serra eds *Colour Vision Deficiencies X* p xiii
