Shen,2018-03-12 This volume brings together state of the art reviews of the non biostratigraphic and biostratigraphic data that are used to define and correlate Permian time intervals It includes analyses of Permian radio isotopic ages magnetostratigraphy isotope based stratigraphy and timescale relevant biostratigraphy It is the first book devoted to this subject and represents the cutting edge of Permian time scale research The Permian of Northern Pangea Peter A. Scholle,Tadeusz M. Peryt,Dana S. Ulmer-Scholle,2012-12-06 The Permian was a remarkable time period It represents the maximum stage of Pangean continental assembly includes a major global climatic shift from glacial to nonglacial conditions icehouse greenhouse transition and is terminated by one of the most profound faunal floral extinction events in the Earth s history In addition Permian oceans although poorly understood must have had some quite unique characteristics Permian seas reached the most extreme values of carbon sulfur and strontium isotopic ratios ever achieved in Phanerozoic time and the isotopic ratios of all three elements abruptly returned to more normal values at or very close to the Permo Triassic boundary Finally the Permian is marked by an abundance of important sedimentary mineral resources It has large fossil fuel concentrations coal oil and natural gas enormous phosphate reserves and very extensive evaporite deposits including gypsum anhydrite and halite as well as a variety of potash salts Study of the Permian has been hampered however by a number of factors These include a scattered geologic literature presented in a variety of languages a confusing regional and global stratigraphic framework based in part on inadequate type sections and largely provincial often poorly correlatable faunas All have contributed to the sparsity and inadequacy of overviews of this critical geological interval The two volumes attempts to bring together some of the widely scattered observations about these fascinating rocks at least for the northern pre dominantly nonglacial parts of Pangea Lower Permian Colonial Rugose Corals, Western and Northwestern Pangea Jerzy Fedorowski,E.
