Standards For Ibm And The International Computer Industry:

Standards for IBM and the International Computer Industry Computer Technology Research Corp,1992-01-01

Keeping the U.S. Computer Industry Competitive National Research Council,Computer Science and Telecommunications Board,1990-02-01 This book warns that retaining U S preeminence in computing at the beginning of the next century will require long term planning leadership and collective will that cannot be attained with a business as usual approach by industry or government This consensus emerged from a colloquium of top executives from the U S computer sector university and industry researchers and government policymakers Among the major issues discussed are long term or strategic commitment on the part of large firms in the United States cooperation within and among firms and between industry universities and government weaknesses in manufacturing and in the integration of research development and manufacturing technical standards for both hardware and software manufacture and operation and education and infrastructure in particular computer networks Open Standards and the Digital Age Andrew L. Russell,2014-04-28 This book answers how openness became the defining principle of the information age examining the history of information networks **The Industrial Reorganization Act: The computer industry** United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Antitrust and Monopoly,1973 **Global Competitiveness of U.S.**

Advanced-technology Industries United States International Trade Commission,1993 *The Computer as Medium* Berit Holmqvist,1993 Many industrial training applications educational applications and of course information applications such as databases and hypermedia are all attempts to communicate and yet we really don t know much about the computer as a communicative medium Bringing together a collection of essays presenting such diverse theoretical approaches as general semiotics linguistics communication theory literary and art criticism sociology and history the editors set out to establish and elaborate the role of computer systems as a sign technology The volume is divided into three main parts each focused on a different field of semiotic inquiry Computer Based Signs discusses the special nature of signs produced by means of computers The Rhetoric of Interactive Media deals with codes of aesthetics and composition for the new elastic medium of communication interactive fiction and hypertext Computers in Context analyzes computer technology in the larger cultural historical and organizational contexts Scholars in computer science cognitive science organization theory information and media science semiotics communication and linguistics will find this book invaluable and as current excitement about hypermedia and electronic books continues to grow a broader audience including computer artists and literary critics will also find it a useful resource Electronic Technology, Corporate Strategy, and World Transformation Maurice Estabrooks,1995-05-23 How are the new electronic technologies transforming business here and abroad indeed the entire world economy and what new strategies must business develop to meet the challenges of this transformation Economist writer and communications executive Maurice Estabrooks provides a readable comprehensive survey of how businesses are

using microchips computers and telecommunications to reshape the entire world of work its cultures organization and economic systems With insight and impeccable scholarship he provides concrete evidence of the emergence of artificially intelligent cybernetic network based entities that are creating new linkages between businesses markets and technology itself linkages that will profoundly affect the way businesses create and implement their corporate survival and growth strategies in the future Drawing on the work of economic theorist Joseph Schumpeter Estabrooks shows how Schumpeterian dynamics have played a key role in the breakup of AT T and the Bell System and in the deregulation of telecommunications broadcasting banking finance and other economically critical industries What has emerged he maintains is an increasingly integrated global information and software based services economy Optical fibers satellites and wireless communications systems have already made possible the development of electronic superhighways but in doing so they have also initiated a massive redistribution of economic power and wealth throughout the world the implications of which are only now being understood Historical analytical descriptive Estabrooks book will speak not only to academics and others who observe world transformations from relatively theoretical perspectives but also to corporate and other executives whose organizations and certainly their personal work lives will be changed dramatically by the developments he describes in practical day to day situations
