The Gray Cloth A Novel On Glass Architecture:

The Gray Cloth Paul Scheerbart, 2003-08 The Victorian era German cult novel set in the mid twentieth century serves up a utopian vision of a future of glass architecture as the protagonist Swiss architect Edgar Krug circumnavigates the globe by airship with his wife constructing a wild variety of colored glass buildings in various locales The Gray Cloth Paul Scheerbart, 2001 The Victorian era German cult novel set in the mid twentieth century serves up a utopian vision of a future of glass architecture as the protagonist Swiss architect Edgar Krug circumnavigates the globe by airship with his wife constructing a wild variety of colored glass buildings in various locales *The Gray Cloth and Ten Percent White : a Ladies Novel* , 2001

Material Modernity Deborah Ascher Barnstone, Maria Makela, 2022-01-27 Material Modernity explores creative innovation in German art design and architecture during the Weimar Republic charting both the rise of new media and the re fashioning of old media Weimar became famous for the explosion of creative ingenuity across the arts in Germany due to experiments with new techniques including the move towards abstraction in painting and sculpture and inventive work in such new media as paper and plastic which utilized both new and old methods of art production Individual chapters in this book consider inventions such as the camera and materials like celluloid examine the role of new materials including concrete composites in opening up fresh avenues in the plastic arts and relate advances in the understanding of color perception and psychology to an increased interest in visual perception and the latent potential of color as both architectural ornament and carrier of emotional force in space While art historians usually argue that experimentation in the Weimar Republic was the result of an intentional rejection of traditional modes of expression in the conscious attempt to invent a modern art and architecture unshackled from historic media and methods this volume shows that the drivers for innovation were often far more complex and nuanced It first of all describes how the material shortages precipitated by the First World War along with the devastation to industrial infrastructure and disruption of historic trade routes affected art as did a spirit of experimentation that permeated interwar German culture It then analyzes new challenges in the 1920s to artistic conventions in traditional art modes like painting sculpture drawing architecture textiles and print making and simultaneously probes the likely causes of innovative new methods of artistic production that appeared such as photomontage assemblage mechanical art and multi media art In doing so Material Modernity fills a significant gap in Weimar scholarship and art history literature The Aesthetic Dimensions of Educational Administration & Leadership Eugenie A. Samier, Richard Bates, 2006-11-22 The question of aesthetics as a theoretical framework for thinking about modern leadership issues in educational settings is an emergent area of inquiry that is receiving considerable attention There is a growing sense that the mechanistic approach to leadership which has been widely encouraged over the last ten years is sterile and that a more philosophical approach is now required This approach is covered here taking into account the importance of aesthetics on all aspects of the administrative and leadership world the ways ideas and ideals are created how

their expression is conveyed the impact they have on interpersonal relationships and the organisational environment that carries and reinforces them and the moral boundaries or limits that can be established or exceeded While presenting a significant departure from conventional studies in the field the international contributors reflect a continuity of thought on administrative and leadership authority from the writings of Plato through to current theory *The Glass State* Annette Fierro, 2003 From the Gothic to the contemporary glass has transformed the structural formal and philosophical principles of architecture In *The Glass State* Annette Fierro views the many meanings of transparency in architecture Specifically she analyzes the transparent monumental buildings that were built in Paris between 1981 and 1988 as part of Francois Mitterand's program of Grands Projets The Grands Projets provide a rare opportunity to study a finite set of buildings constructed of similar materials in the same time period in a specific urban landscape and with related ideological missions

New Glass Architecture Brent Richards, Gilbert Dennis, 2006-01-01 A timely look at the ways in which glass is utilized in some of today's most beautiful and experimental building designs For centuries glass has provoked fascination with its properties as a versatile material that permits light to enter buildings in spectacular ways Much of modern architecture has been conceived by using glass to create increasingly minimal structures to promote the notion of lightweight construction solutions and to allow maximum daylight into buildings *New Glass Architecture* showcases the changing ways that aesthetics and methods for using glass have been developing since the 1990s The book begins with an introduction that traces the history of key moments in glass architecture from the stained glass windows of Chartres Cathedral to the Crystal Palace of 1851 and early constructions by John Soane Bruno Taut Le Corbusier and Mies van der Rohe Author Brent Richards explains the importance of glass artists in the second half of the 20th century and describes developments in glass technology over the last twenty years Beautifully illustrated with newly commissioned photographs by Dennis Gilbert the book features twenty five case studies of recent glass constructions from around the world by such leading architects as Foster and Partners Frank Gehry Herzog de Meuron Steven Holl Toyo Ito Associates Jean Nouvel Raphael Violy and Peter Zumthor Each building is illustrated in full color and accompanied by detailed drawings *New Glass Architecture* features these buildings and more Chapel of Ignatius Seattle Cond Nast Caf New York DZ Bank Berlin Kimmel Center for the Performing Arts Philadelphia Kunsthau Graz Austria Laban Dance Centre London Torre Agbar Barcelona

Glass! Love!! Perpetual Motion!!! Paul Scheerbart, 2014-10-19 German writer critic and theorist Paul Scheerbart 1863 1915 died nearly a century ago but his influence is still being felt today Considered by some a mad eccentric and by others a visionary political thinker in his own time he is now experiencing a revival thanks to a new generation of scholars who are rightfully situating him in the modernist pantheon *Glass Love Perpetual Motion* is the first collection of Scheerbart's multifarious writings to be published in English In addition to a selection of his fantastical short stories it includes the influential architectural manifesto *Glass Architecture* and his literary tour de force *Perpetual Motion The Story of an Invention* The latter written in the guise of a scientific work

complete with technical diagrams was taken as such when first published but in reality is a fiction albeit one with an important message Glass Love Perpetual Motion is richly illustrated with period material much of it never before reproduced including a selection of artwork by Paul Scheerbarth himself Accompanying this original material is a selection of essays by scholars novelists and filmmakers commissioned for this publication to illuminate Scheerbarth's importance then and now in the worlds of art architecture and culture Coedited by artist Josiah McElheny and Christine Burgin with new artwork created for this publication by McElheny Glass Love Perpetual Motion is a long overdue monument to a modern master

Childhood by Design Megan Brandow-Faller, 2018-04-19 Informed by the analytical practices of the interdisciplinary material turn and social historical studies of childhood Childhood By Design Toys and the Material Culture of Childhood offers new approaches to the material world of childhood and design culture for children This volume situates toys and design culture for children within broader narratives on history art design and the decorative arts where toy design has traditionally been viewed as an aberration from more serious pursuits The essays included treat toys not merely as unproblematic reflections of socio cultural constructions of childhood but consider how design culture actively shaped commodified and materialized shifting discursive constellations surrounding childhood and children Focusing on the new array of material objects designed in response to the modern invention of childhood what we might refer to as objects for a childhood by design Childhood by Design explores dynamic tensions between theory and practice discursive constructions and lived experience as embodied in the material culture of childhood Contributions from and between a variety of disciplinary perspectives including history art history material cultural studies decorative arts design history and childhood studies are represented critically linking historical discourses of childhood with close study of material objects and design culture Chronologically the volume spans the 18th century which witnessed the invention of the toy as an educational plaything and a proliferation of new material artifacts designed expressly for children's use through the 19th century expansion of factory based methods of toy production facilitating accuracy in miniaturization and a new vocabulary of design objects coinciding with the recognition of childhood innocence and physical separation within the household towards the intersection of early 20th century child centered pedagogy and modernist approaches to nursery and furniture design through the changing consumption and sales practices of the postwar period marketing directly to children through television film and other digital media and into the present where the line between the material culture of childhood and adulthood is increasingly blurred
