The Great American Mismatch:

Mismatched Women Jennifer Fleegeer, 2014-08-01 In *Mismatched Women* author Jennifer Fleegeer introduces readers to a lineage of women whose voices do not match their bodies by conventional expectations from George du Maurier's literary Trilby to Metropolitan Opera singer Marion Talley from Snow White and Sleeping Beauty to Kate Smith and Deanna Durbin. The book tells a new story about female representation by theorizing a figure regularly dismissed as an aberration. The mismatched woman is a stumbling block for both sound and feminist theory argues Fleegeer because she has been synchronized yet seems to have been put together incorrectly as if her body could not possibly house the voice that the camera insists belongs to her. Fleegeer broadens the traditionally cinematic context of feminist film theory to account for literary, animated, televisual and virtual influences. This approach bridges gaps between disciplinary frameworks showing that studies of literature, film, media, opera and popular music pose common questions about authenticity, vocal and visual realism, circulation and reproduction. The book analyzes the importance of the mismatched female voice in historical debates over the emergence of new media and unravels the complexity of female representation in moments of technological change.

Mismatch Peter Gluckman, Mark Hanson, 2008-02-14 We have built a world that no longer fits our bodies. Our genes, selected through our evolution and the many processes by which our development is tuned within the womb, limit our capacity to adapt to the modern urban lifestyle. There is a mismatch. We are seeing the impact of this mismatch in the explosion of diabetes, heart disease and obesity. But it also has consequences in earlier puberty and old age. Bringing together the latest scientific research in evolutionary biology, development, medicine, anthropology and ecology, Peter Gluckman and Mark Hanson, both leading medical scientists, argue that many of our problems as modern day humans can be understood in terms of this fundamental and growing mismatch. It is an insight that we ignore at our peril. *Mismatch* Richard Sander, Stuart Taylor Jr., Stuart Taylor, 2012-10-09 Argues that affirmative action actually harms minority students and that the movement started in the late 1960s is only a symbolic change that has become mired in posturing, concealment and pork barrel earmarks.

Mismatch Ronald Giphart, Mark van Vugt, 2018-02-15 Our brains evolved to solve the survival problems of our Stone Age ancestors so when faced with modern day situations that are less extreme they often encounter a mismatch. Our primitive brains put us on the wrong foot by responding to stimuli that in prehistoric times would have prompted behaviour that was beneficial. If you've ever felt an anxious fight or flight response to a presentation at a board meeting equivalent to facing imminent death by a sabre-toothed tiger then you have experienced a mismatch. Mismatch is about the clash between our biology and our culture. It is about the dramatic contrast between the first few million years of human history when humans lived as hunters and gatherers in small scale societies and the past twelve thousand years following the agricultural revolution which have led us to comfortable lives in a very different social structure. Has this rapid transition been good for us? How do we, using our primitive minds, try to survive in a modern information society that radically changes

every ten years or so Ronald Giphart and Mark van Vugt show that humans have changed their environment so drastically that the chances for mismatch have significantly increased and these conflicts can have profound consequences Reviewed through mismatch glasses social societal and technological trends can be better understood ranging from the popularity of Facebook and internet porn to the desire for cosmetic surgery to our attitudes towards refugees Mismatches can also affect our physical and psychological well being in terms of our attitudes to happiness physical exercise choosing good leaders or finding ways to feel better at home or work Finally Mismatch gives us an insight into politics and policy which could enable governments institutions and businesses to create an environment better suited to human nature its potential and its constraints This book is about converting mismatches into matches The better your life is matched to how your mind operates the greater your chances of leading a happy healthy and productive life

Commerce,1967 **The Great American Housing Bubble** Adam J. Levitin,Susan M. Wachter,2020-06-09 The definitive account of the housing bubble that caused the Great Recession and earned Wall Street fantastic profits The American housing bubble of the 2000s caused the worst global financial crisis since the Great Depression In this definitive account Adam Levitin and Susan Wachter pinpoint its source the shift in mortgage financing from securitization by Fannie Mae and Freddie Mac to private label securitization by Wall Street banks This change set off a race to the bottom in mortgage underwriting standards as banks competed in laxity to gain market share The Great American Housing Bubble tells the story of the transformation of mortgage lending from a dysfunctional local affair featuring short term interest only bullet loans to a robust national market based around the thirty year fixed rate mortgage a uniquely American innovation that served as the foundation for the middle class Levitin and Wachter show how Fannie and Freddie s market power kept risk in check until 2003 when mortgage financing shifted sharply to private label securitization as lenders looked for a way to sustain lending volume following an unprecedented refinancing wave Private label securitization brought a return of bullet loans which had

lower initial payments enabling borrowers to borrow more but much greater back loaded risks These loans produced a vast oversupply of underpriced mortgage finance that drove up home prices unsustainably When the bubble burst it set off a destructive downward spiral of home prices and foreclosures Levitin and Wachter propose a rebuild of the housing finance system that ensures the widespread availability of the thirty year fixed rate mortgage while preventing underwriting competition and shifting risk away from the public to private investors
