Animal Learning and Cognition Nestor A. Schmajuk,1997-04-28 In this advanced text the author starting with the simple assumption that psychological associations are represented by the strength of synaptic connections details several mechanistic descriptions of complex cognitive behaviors Part I presents neural network theories of classical conditioning Part II describes neural networks of operant conditioning and animal communication Part III discusses spatial and cognitive mapping and finally Part IV shows how neural network models permit one to simultaneously develop psychological theories

and models of the brain The book includes computer software that allows the computer simulation of classical conditioning and the effect of different brain lesions on many classical paradigms All those people interested in neural networks from psychologists through neuroscientists to computer scientists working on artificial intelligence and robotics will find this book an excellent advanced guide to the subject
