The Group In Depth:

The Depth Facilitator's Handbook Helene Smit, 2014-05-02 Depth Facilitation assists individuals and groups to achieve their chosen goals by helping them overcome personal and interpersonal barriers as well as assisting them to access additional potential and creativity through building awareness of the psychological processes that determine their behaviour. The Depth Facilitator's Handbook outlines the key principles and provides the tasks, tools and techniques for working effectively as a depth facilitator. Proceedings of Groups - St. Andrews 1985 E. F. Robertson, 1986 A current picture of progress and research in group theory is provided by five leading group theorists: Bachmuth, Baumslag, Neumann, Roseblade and Tits. *The Group in Depth* Helen Elise Durkin, 1965 Focus Group Methodology Pranee Liamputtong, 2011-03-28 A friendly introduction to the basics of focus group methods with an international feel and an ethical sensibility. *The Center, the Group Under Observation, Sources of Information, and Studies in Progress* Harold Coe Stuart, 1939 *Depth Leadership* Hélène Smit, 2025-06-30 Depth Leadership guides leaders to implement their ethical responsibility to ensure that individuals, communities and the planet co-exist as creatively, constructively and sustainably as possible. The book explores a transformative leadership approach based on a foundation of depth psychology and systems thinking in which leaders work beneath between and beyond. By working beneath the leader should actively pursue integration of the whole self or psyche, both the conscious on the surface self and the unconscious under the surface self which includes the body and the imagination to unlock potential, resolve conflict and help the individual psyche to thrive. Leaders must pursue integration and build healthy relationships between people to help groups and communities thrive. They need to consider factors beyond their own group or organisation using an integrative approach towards larger systems including governance systems and the natural environment to ensure a thriving planet. Grounded in academically sound theory but discussed from the perspective of a layperson and extensively illustrated by award-winning artist Katherine Glenday, the ideas discussed in this book will benefit anyone leading a group or a team whether it be in a formal organisation or a more informal social setting. **Pattern Recognition and Image Analysis** Jorge S. Marques, 2005-05-23 The two volume set LNCS 3522 and 3523 constitutes the refereed proceedings of the Second Iberian Conference on Pattern Recognition and Image Analysis IbPRIA 2005 held in Estoril, Portugal in June 2005. The 170 revised full papers presented were carefully reviewed and selected from 292 submissions. The papers are organized in topical sections on computer vision, shape and matching, image and video processing, image and video coding, face recognition, human activity analysis, surveillance, robotics, hardware architectures, statistical pattern recognition, syntactical pattern recognition, image analysis, document analysis, bioinformatics, medical imaging, biometrics, speech recognition, natural language analysis and applications.
